Connected Viewing Jennifer Holt, Kevin Sanson, 2013-12-04 As patterns of media use become more integrated with mobile technologies and multiple screens, a new mode of viewer engagement has emerged in the form of connected viewing, which allows for an array of new relationships between audiences and media texts in the digital space. This exciting new collection brings together twelve original essays that critically engage with the socially-networked, multi-platform, and cloud-based world of today, examining the connected viewing phenomenon across television, film, video games, and social media. The result is a wide-ranging analysis of shifting business models, policy matters, technological infrastructure, new forms of user engagement, and other key trends affecting screen media in the digital era. Connected Viewing contextualizes the dramatic transformations taking place across both media industries and national contexts, and offers students and scholars alike a diverse set of methods and perspectives for studying this critical moment in media culture.

Mobile phone charges in the EU Great Britain: Parliament: House of Lords: European Union Committee, 2007-04-23 This report looks at the proposal from the European Commission to introduce a price cap on roaming charges for using mobile phones across the EU. It concludes that there is evidence of a market failure in roaming charges and, because the service is cross-border in nature, it is appropriate for action to be taken at the Community level. However the Committee has some reservations about the Commission's proposal and favours regulation at the wholesale end rather than charges to the retail customer. It thinks that regulation based on the average wholesale price would allow companies to offer a range of charges, provide a competitive framework and avoid market rigidities. The Committee believes the regulation should apply for a minimum amount of time and there should be a 'sunset clause'. The proposals are limited to voice messages but there are also market abuses in data roaming and the Commission should consider extending the regulations to these services.

Control of Price Related Terms in Standard Form Contracts Yeşim M. Atamer, Pascal Pichonnaz, 2019-11-19 This book explores various approaches around the world regarding price term control, and particularly discusses the effectiveness of two major paths: ex ante regulatory and ex post judicial intervention. Price control and its limits are issues that affect all liberal market economies, as well as more regulated markets. For the past several years, courts in many different countries have been confronted with the issue of whether, and to what extent, they should intervene regarding price-related terms in standard form contracts – especially in the area of consumer contracts. Open price clauses, flat remunerations, price adjustment clauses, clauses giving the seller/supplier the right to ask for additional payments, bundling or partitioning practices, etc.: a variety of price related terms are used to manipulate customers' choices, often also by exploiting their behavioral biases. The result is an unfavorable contract that is later challenged in court. However, invalidating a given price term in standard forms e.g. of a banking or utilities contract only has an inter partes effect, which means that in thousands if not millions of similar contracts, the same clauses continue to be used. Effective procedural rules are often lacking. Therefore, pricing patterns that serve to hide rather than to reveal the real cost of goods and services require special attention on the part of regulators. The aim of this book is to determine the various approaches in the world regarding price term control, and particularly to discuss the efficiency of both paths, ex ante regulatory and ex post judicial intervention. Thanks to its broad comparative analysis, this book offers a thorough overview of the methods employed in several countries. It gathers twenty-eight contributions from national rapporteurs and one supra-national rapporteur (EU) to the 2018 IACL Congress held in Fukuoka. These are supplemented by a general report presented at the same IACL Congress, which includes a comparative analysis of the national and supranational reports. The national contributors hail from around the globe, including Africa (1), Asia (5), Europe (17), the European Union (1) and the Americas (5).

After Access Jonathan Donner,2015-11-20 An expert considers the effects of a more mobile Internet on socioeconomic development and digital inclusion, examining both potentialities and constraints. Almost anyone with a \$40 mobile phone and a nearby cell tower can get online with an ease unimaginable just twenty years ago. An optimistic narrative has proclaimed the mobile phone as the device that will finally close the digital divide. Yet access and effective use are not the same thing, and the digital world does not run on mobile handsets alone. In *After Access*, Jonathan Donner examines the implications of the shift to a more mobile, more available Internet for the global South, particularly as it relates to efforts to promote socioeconomic development and broad-based inclusion in the global information society. Drawing on his own research in South Africa and India, as well as the burgeoning literature from the ICT4D (Internet and Communication Technologies for Development) and mobile communication communities, Donner introduces the “After Access Lens,” a conceptual framework for understanding effective use of the Internet by those whose “digital repertoires” contain exclusively mobile devices. Donner argues that both the potentialities and constraints of the shift to a more mobile Internet are important considerations for scholars and practitioners interested in Internet use in the global South.

The Chromaffin Cell Daniel T. O'Connor, Lee E. Eiden,2002 Catecholamines are crucial pathophysiologic actors in such neuropsychiatric and cardiovascular disease processes as movement disorders, mood and thought disturbances, hypertension, congestive heart failure, myocardial infarction, cardiac arrhythmias and stroke. This important model system therefore bridges clinical medicine to basic cardiovascular and neurobiological research. Within the basic sciences, chromaffin cell biology benefits from advances in neurobiology, pharmacology, endocrinology and cardiovascular biology. This volume emphasizes the role of new technologies in chromaffin cell biology, especially emerging developments in bioinformatics for the practising chromaffin cell biologist. Other papers tackle fast-breaking advances in such areas as chromaffin cells and the pathophysiology of human disease, developmental biology of the chromaffin system, new optical and electrochemical probes of intracellular events, and new model cell types for the chromaffin cell biologist.

Vulnerable Consumers and the Law Christine Riefa,Severine Saintier,2020-10-27 This book charts the difficulties encountered by vulnerable consumers in their access to justice, through the contributions of prominent authors (academic, practitioners and consultants) in the field of consumer law and access to justice. It demonstrates that despite the development of ADR, access to justice is still severely lacking for the vulnerable consumer. The book highlights that a broad understanding of access to justice, which encompasses good regulation and its public enforcement, is an essential ingredient alongside access to the mechanisms of traditional private justice (courts and ADR) to protect the vulnerable consumer. Indeed, many of the difficulties are linked to normative obstacles and lack of access to justice is primarily a vulnerability in itself that can exacerbate existing ones. In addition, because it may contribute to ‘pushing’ already vulnerable consumers into social exclusion it is not simply about economic justice but also about social justice. The book shows that lack of access to justice is not irreversible nor is it necessarily linked to consumer apathy. New technologies could provide solutions. The book concludes with a plea for developing ‘inclusive’ justice systems with more emphasis on public enforcement alongside effective courts systems to offer the vulnerable with adequate means to defend themselves. This book will be suitable for both students and practitioners, and all those with an interest in the justice system.
