**Optimal Interconnection Trees in the Plane** Marcus Brazil,Martin

Zachariasen,2015-04-13 This book explores fundamental aspects of geometric network optimisation with applications to a variety of real world problems. It presents, for the first time in the literature, a cohesive mathematical framework within which the properties of such optimal interconnection networks can be understood across a wide range of metrics and cost functions. The book makes use of this mathematical theory to develop efficient algorithms for constructing such networks, with an emphasis on exact solutions. Marcus Brazil and Martin Zachariasen focus principally on the geometric structure of optimal interconnection networks, also known as Steiner trees, in the plane. They show readers how an understanding of this structure can lead to practical exact algorithms for constructing such trees. The book also details numerous breakthroughs in this area over the past 20 years, features clearly written proofs, and is supported by 135 colour and 15 black and white figures. It will help graduate students, working mathematicians, engineers and computer scientists to understand the principles required for designing interconnection networks in the plane that are as cost efficient as possible.

**The Trees of Florida** Gil Nelson,1994 First comprehensive guide to Florida's amazing variety of trees, both natives and exotics, from scrub oak to mangroves, from bald cypress and gumbo limbo, from sabal palm to the Florida yew. Serves as both a reference

and a field guide. Includes suggested field sites for observing the species described. Color photos where color is important in identification, as well as line drawings. Useful to the naturalist, professional botanist, landscape architect, and weekend gardener.

**In the Company of Trees** Andrea Sarubbi Fereshteh, 2019-01-15 Fascinating facts, trivia, and stories celebrating nature and the magnificent life of trees and their invaluable place in our lives, including beautiful, full-color photographs throughout. When was the last time you spent time outside? The space between your front door and your car doesn't count. Nature holds incredible power to soothe our spirits, calm our minds, and open us up to creativity, if we can unplug long enough to step away from our screens and embrace it. And while they say you can't see the forest for the trees, they play perhaps the leading role in our enjoyment of the outdoors. *In the Company of Trees* helps you rediscover your own connection to the world outside, with over 195 quotes, facts, and stories honoring trees from across the world and in our own back yards alike. Inviting, full-color photos of sun-dappled forests and tree-filled hikes throughout will inspire you to do some forest-bathing of your own and embrace the healing power of nature.

**Field Guide to the Forest Trees of Uganda** James Kalema, Alan Hamilton, 2020-06-08 This book is a guide for the identification of the indigenous forest trees of Uganda. It will be useful for those who wish to contribute towards the conservation of the forests or to plant indigenous trees. Information is provided on how to propagate and cultivate about 80 of the most valuable species. The book will be invaluable for botanists, foresters, rural development workers and members of the general public concerned about contributing to conservation and sustainable development in Uganda.

Many of the species grow in neighbouring countries, so the book has relevance there too.

**Advances in Visual Data Compression and Communication** Feng Wu, 2014-07-25  
Visual information is one of the richest and most bandwidth-consuming modes of communication. To meet the requirements of emerging applications, powerful data compression and transmission techniques are required to achieve highly efficient communication, even in the presence of growing communication channels that offer increased bandwidth. Presenting the results of the author's years of research on visual data compression and transmission, *Advances in Visual Data Compression and Communication: Meeting the Requirements of New Applications* provides a theoretical and technical basis for advanced research on visual data compression and communication. The book studies the drifting problem in scalable video coding, analyzes the reasons causing the problem, and proposes various solutions to the problem. It explores the author's Barbell-based lifting coding scheme that has been adopted as common software by MPEG. It also proposes a unified framework for deriving a directional transform from the nondirectional counterpart. The structure of the framework and the statistic distribution of coefficients are similar to those of the nondirectional transforms, which facilitates subsequent entropy coding. Exploring the visual correlation that exists in media, the text extends the current coding framework from different aspects, including advanced image synthesis—from description and reconstruction to organizing correlated images as a pseudo sequence. It explains how to apply compressive sensing to solve the

data compression problem during transmission and covers novel research on compressive sensor data gathering, random projection codes, and compressive modulation. For analog and digital transmission technologies, the book develops the pseudo-analog transmission for media and explores cutting-edge research on distributed pseudo-analog transmission, denoising in pseudo-analog transmission, and supporting MIMO. It concludes by considering emerging developments of information theory for future applications.

**A Collection of Voyages and Travels** Awnsham Churchill,2002

**Introduction to Computer Theory** Daniel I. A. Cohen,1996-10-25 This text strikes a good balance between rigor and an intuitive approach to computer theory. Covers all the topics needed by computer scientists with a sometimes humorous approach that reviewers found refreshing. It is easy to read and the coverage of mathematics is fairly simple so readers do not have to worry about proving theorems.

Handbook of Bioenergy Crops N. El Bassam,N El Bassam,2010 This completely revised second edition includes new information on biomass in relation to climate change, new coverage of vital issues including the food versus fuel debate, and essential new information on second generation fuels and advances in conversion techniques. The book begins with a guide to biomass accumulation, harvesting, transportation and storage, as well as conversion technologies for biofuels. This is followed by an examination of the environmental impact and economic and social dimensions, including prospects for renewable energy. The book then goes on to cover all the main potential energy crops.

**Machine Learning, Big Data, and IoT for Medical Informatics** Pardeep Kumar,Yugal Kumar,Mohamed A. Tawhid,2021-06-13 Machine Learning, Big Data, and IoT

for Medical Informatics focuses on the latest techniques adopted in the field of medical informatics. In medical informatics, machine learning, big data, and IOT-based techniques play a significant role in disease diagnosis and its prediction. In the medical field, the structure of data is equally important for accurate predictive analytics due to heterogeneity of data such as ECG data, X-ray data, and image data. Thus, this book focuses on the usability of machine learning, big data, and IOT-based techniques in handling structured and unstructured data. It also emphasizes on the privacy preservation techniques of medical data. This volume can be used as a reference book for scientists, researchers, practitioners, and academicians working in the field of intelligent medical informatics. In addition, it can also be used as a reference book for both undergraduate and graduate courses such as medical informatics, machine learning, big data, and IoT. Explains the uses of CNN, Deep Learning and extreme machine learning concepts for the design and development of predictive diagnostic systems. Includes several privacy preservation techniques for medical data. Presents the integration of Internet of Things with predictive diagnostic systems for disease diagnosis. Offers case studies and applications relating to machine learning, big data, and health care analysis.

**Tale of Two Families - John Brown and Abbe Lavina Colaw** Diana J Muir,2019

One might think that a common name such as Brown would lead to an ordinary family. That is not the case for this family. Descended from John Brown and his family, who traveled on board the Mayflower, they descended from the Kings and Queens of Europe

and can be traced back to the Merovingian Kings of France and the Sea Kings of Norway. Among the most notable ancestors are John Brown of the Mayflower, Robert Dudley (a favorite of Queen Elizabeth), the Lords of Kerr in Selkirk, Scotland, the Dukes of Northumberland, and the Douglas family. The Colaw/Coler/Kohler family shares the same German ancestors as President Roosevelt and includes the Comte Jean de Graf in Picardy, France.--

**Sustainable Forest Management** John L. Innes, Anna V. Tikina, 2016-12-19

Sustainable Forest Management provides the necessary material to educate students about forestry and the contemporary role of forests in ecosystems and society. This comprehensive textbook on the concept and practice of sustainable forest management sets the standard for practice worldwide. Early chapters concentrate on conceptual aspects, relating sustainable forestry management to international policy. In particular, they consider the concept of criteria and indicators and how this has determined the practice of forest management, taken here to be the management of forested lands and of all ecosystems present on such lands. Later chapters are more practical in focus, concentrating on the management of the many values associated with forests. Overall the book provides a major new synthesis which will serve as a textbook for undergraduates of forestry as well as those from related disciplines such as ecology or geography who are taking a course in forests or natural resource management.
