**Ada 95** David A. Wheeler,2012-12-06 Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.

**The Participatory Condition in the Digital Age** Darin Barney,Gabriella Coleman,Christine Ross,Jonathan Sterne,Tamar Tembeck,2016-11-01 Just what is the “participatory condition”? It is the situation in which taking part in something with others has become both environmental and normative. The fact that we have always participated does not mean we have always lived under the participatory condition. What is distinctive about the present is the extent to which the everyday social, economic, cultural, and political activities that comprise simply being in the world have been thematized and organized around the priority of participation. Structured along four axes investigating the relations between participation and politics, surveillance, openness, and aesthetics, The Participatory Condition in the Digital Age comprises fifteen essays that explore the promises, possibilities, and failures of contemporary participatory media practices as related to power, Occupy Wall Street, the Arab Spring uprisings, worker-owned cooperatives for the post-Internet age; paradoxes of participation, media activism, open source projects; participatory civic life; commercial surveillance; contemporary art and design; and education. This book represents the most comprehensive and transdisciplinary endeavor to date to examine the nature, place, and value of participation in the digital age. Just as in 1979, when Jean-François Lyotard proposed that “the postmodern condition” was characterized by the questioning of historical grand narratives, The Participatory Condition in the Digital Age investigates how participation has become a central preoccupation of our time. Contributors: Mark Andrejevic, Pomona College; Bart Cammaerts, London School of Economics and Political Science (LSE); Nico Carpentier, Vrije Universiteit Brussel (VUB - Free University of Brussels) and Charles University in Prague; Julie E. Cohen, Georgetown University; Kate Crawford, MIT; Alessandro Delfanti, University of Toronto; Christina Dunbar-Hester, University of Southern California; Rudolf Frieeling, California College of Arts and the San Francisco Art Institute; Salvatore Iaconesi, La Sapienza University of Rome and ISIA Design Florence; Jason Edward Lewis, Concordia University; Rafael Lozano-Hemmer; Graham Pullin, University of Dundee; Trebor Scholz, The New School in New York City; Cayley Sorochan, McGill University; Bernard Stiegler, Institute for Research and Innovation in Paris; Krzysztof Wodiczko, Harvard Graduate School of Design; Jillian C. *The Perversity of Things* Hugo Gernsback,2016-11-21 In 1905, a young Jewish immigrant from Luxembourg founded an electrical supply shop in New York. This inventor, writer, and publisher Hugo Gernsback would later become famous for launching the first science fiction magazine, *Amazing Stories*, in 1926. But while science fiction’s annual Hugo Awards were named in his honor, there has been surprisingly little understanding of how the genre began among a community of tinkerers all drawn to Gernsback’s vision of comprehending the future of media through making. In *The Perversity of Things*, Grant Wythoff makes available texts by Hugo Gernsback that were foundational both for science fiction and the emergence of media studies. Wythoff argues that Gernsback developed a means of describing and assessing the cultural impact of emerging media long before media studies became an academic discipline. From editorials and blueprints to media histories, critical essays, and short fiction, Wythoff has collected a wide range of Gernsback’s writings that have been out of print since their magazine debut in the early 1900s. These articles cover such topics as television; the regulation of wireless/radio; war and technology; speculative futures; media-archaeological curiosities like the dynamophone and hypnobioscope; and more. All together, this collection shows how Gernsback’s publications evolved from an electrical parts catalog to a full-fledged literary genre. *The Perversity of Things* aims to reverse the widespread misunderstanding of Gernsback within the history of science fiction criticism. Through painstaking research and extensive annotations and commentary, Wythoff reintroduces us to Gernsback and the origins of science fiction.
