In the New England Fashion Catherine E. Kelly,2018-08-06 In the first half of the nineteenth century, rural New England society underwent a radical transformation as the traditional household economy gave way to an encroaching market culture. Drawing on a wide array of diaries, letters, and published writings by women in this society, Catherine E. Kelly describes their attempts to make sense of the changes in their world by elaborating values connected to rural life. In her hands, the narratives reveal the dramatic ways female lives were reshaped during the antebellum period and the women's own contribution to those developments. Equally important, she demonstrates how these writings afford a fuller understanding of the capitalist transformation of the countryside and the origins of the Northern middle class. Provincial women exalted rural life for its republican simplicity while condemning that of the city for its aristocratic pretension. The idyllic nature of the former was ascribed to the financial independence that the household economy had long provided those in the farming community. Kelly examines how the juxtaposition of rural virtue to urban vice served as a cautionary defense against the new realities of the capitalist market society. She finds that women responded to the transition to capitalism by upholding a set of values which point toward the creation of a provincial bourgeoisie.

The Artist-Enterprise in the Digital Age Xavier

Greffe,2016-06-29 This book is a monograph of cultural economics of a new concept, artist-enterprises. It explores various dimensions that artists embody, i.e., aesthetic, critical,

messianic, and economic ones, and screens the multiple challenges faced by the artist-enterprises in terms of pricing, funding, and networking in the Digital Age. It shows how these artist-enterprises are at the core of the contemporary creative industries. Even when they are on their own, artists have to demonstrate or manage a variety of skills, sign contracts both in the early and later stages of their activities, and also maintain relationships and networks that enable them to attain their artistic and economic goals. They are no longer simply entrepreneurs managing their own skills but are the enterprises themselves. The artist-enterprises thus find themselves at the confluence of two dynamics of production—artistic and economic: artistic because they invent new expressions and meanings; and economic because these expressions must be supported by monetary values on the market. The artistic dynamic is part of a long process of artistic enhancement and only an artist can say whether it has reached the point of presentation or equilibrium. The economic dynamic is dependent on the constant endorsement of artists' works by the market to ensure their survival as artist-enterprises. The tension created by this disparity is further aggravated by another tension: the need to overcome a number of risks so that artist-enterprises can progress. This book will be of special interest to artists, managers, students, professionals, and researchers in the fields of the arts, creativity, economics, and development. The author is Emeritus Professor at the University Paris I Panthéon-Sorbonne.
