A Year in the National Parks Stefanie Payne,Jonathan Irish,2018-05 On January 1 of 2016, Stefanie Payne, a creative professional working at NASA Headquarters, and Jonathan Irish, a photographer with National Geographic, left their lives in Washington, D.C. and hit the open road on an expedition to explore and document all 59 of America's national parks during the centennial celebration of the U.S. National Park Service - 59 parks in 52 weeks - the Greatest American Road Trip. Captured in more than 300,000 digital photographs, written stories, and videos shared by the national and international media, their project resulted in an incredible view of America's National Park System seen in its 100th year. 'A Year in the National Parks, The Greatest American Road Trip' is a gorgeous visual journey through our cherished public lands, detailing a rich tapestry of what makes each park special, as seen along an epic journey to visit them all within one special celebratory year.

The Fifth Science Exurb1a,2019-02-13 The Galactic Human Empire was built atop four sciences: logic, physics, psychology, and sociology. Standing on those pillars, humans spent 100,000 years spreading out into the galaxy: warring, exploring, partying -- the usual. Then there was the fifth science. And that killed the empire stone dead. The Fifth Science is a collection of 12 stories, beginning at the start of the Galactic Human Empire and following right through to its final days. We'll see some untypical things along the way, meet some untypical folk: galactic lighthouses from the distant future, alien tombs from the distant past, murderers, emperors, archaeologists and drunks; mad mathematicians attempting to wake the universe itself up. And when humans have fallen back into savagery, when the secrets of space folding and perfect wisdom are forgotten, we'll attend the empire's deathbed, hold its hand as it goes. Unfortunately that may well only be the beginning.

Images in Mobile Communication Corinne Martin,Thilo von Pape,2011-10-03 This volume provides an original perspective on mobile communication, focusing on the emerging deployment of images in mobile phone usage: photography, video, mobile television, mobile internet, etc. Deeply embedded in our audiovisual culture, images possess the undeniable power to reshape the future of the mobile phone as an "individual mass medium". In this collection, European researchers in media and communication studies, sociology, anthropology and political science present empirical and conceptual work on a wide range of issues, including cultural change, new forms of sociability on individual and societal levels, tactics and strategies of users and producers, and finally, representations and imaginaries of the mobile phone in other established media. This book is written for researchers and students of sociology, communication studies and cultural studies as well as for practitioners of interactive media and online communication.

Pro Web Gadgets for Mobile and Desktop Sterling Udell,2010-04-06 The miniature web applications known as gadgets (or widgets) are a key component of the distributed web and an ideal way to publish your content far beyond the reach of your own web site. Packaging web content and functionality into a gadget enables it to be seen anywhere from iGoogle to the iPhone—wherever the user may be, on or off the traditional web. Everyone can access your content without having to visit your web site. This book is a practical guide to building gadgets that will work everywhere, from handheld devices to any site on the web. The core methodology is to develop a single code base that will run on all platforms, multiplying the syndication opportunities for maximum return on your development investment. Extending this approach is a technique of abstracting key API calls from the various gadget platforms into a single interface layer, implemented in the book as a compact JavaScript class, allowing your gadgets full access to every platform's power without your having to rewrite your code for each. Learn the key concepts for successfully syndicating web content via gadgets. Build platform-agnostic gadgets that run on all the major web portals. Deploy your gadgets to web-enabled handheld devices.

Moving Images, Mobile Viewers Renate Brosch,2011 Vision and movement seem to have shifted center stage in modes of experience in the last century: as a result of their joint effect, slow contemplative gazes at static images seem to be increasingly displaced by distracted vernacular ways of seeing. Looking out of the window of a speeding car, receiving photographs of Earth from outer space, watching the flickering images of the TV screen, scrolling through a text, zooming in on a

location in Google Earth, or sending images via mobile phones or webcams - all these are unique visual experiences that were impossible before various inventions in the 20th century originated completely new kinds of movement. The double meaning of moving images is meant to signal the specificity of motion to these imagi(ni)ngs and, at the same time, to express the emotional power of those visual images which are able to transcend the constant stream of images in contemporary perception. (Series: Kultur und Technik. Schriftenreihe des Internationalen Zentrums für Kultur- und Technikforschung der Universität Stuttgart - Vol. 20)

Moving Images, Mobile Bodies Horea Avram, 2018-07-27 The book comprises a series of contributions by international scholars and practitioners from different backgrounds researching in the fields of contemporary visual culture and performance studies. This collection addresses the issue of corporeality as a discursive field (which asks for a “poetics”), and the possible ways in which technology affects and is affected by the body in the context of recent artistic and theoretical developments. The common denominator of the contributions here is their focus on the relationship between body and image expressed as the connection between reality and fiction, presence and absence, private and public, physical and virtual. The essays cover a wide range of topics within a framework that integrates and emphasises recent artistic practices and current academic debates in the fields of performance studies, visual arts, new aesthetics, perception theories, phenomenology, and media theory. The book addresses these recent trends by articulating issues including the relationship between immediate experience and mediated image; performing the image; the body as fictional territory; performative idioms and technological expression; corporeality, presence and memory; interactivity as a catalyst for multimodality and remediation; visibility, performativity and expanded spectatorship; and the tensions between public space and intimacy in (social) media environments. The main strength of this volume is the fact that it provides the reader with a fresh, insightful and transdisciplinary perspective on the body-image relationship, an issue widely debated today, especially in the context of global artistic and technological transformations.

From Zero to Market with Flutter: Desktop, Mobile, and Web Distribution Viachaslau Lyskouski, 2023-11-01 This book is more than a set of instructions; it's an invitation to embark on a collaborative journey through the thrilling realm of platform-agnostic application development using Flutter. Together, we'll explore every phase of the application lifecycle, starting from the initial concept to the final distribution, with essential stops at development, testing, and automation along the way. This collaborative learning experience promises to be both exciting and educational as we delve deeper into this process as reading through. The goal of this book is not to teach how to create applications; it empowers to become a proficient, well-rounded developer.

The Camera Phone Book Aimee Baldrige, 2007-06-12 Marketing experts predict that by 2009, nearly 90% of all cell phones will contain a camera, as manufacturers race to create cheaper, easier-to-use models with more sophisticated cameras, more pixels, flash units and even multiple lenses. Already revolutionizing audiovisual communication, it's a trend that will only grow more explosively—and who better than National Geographic to create a how-to book aimed directly at the millions who carry a camera phone everywhere and want to make the most of it? Created by two top

professionals, this generously illustrated nuts-and-bolts guide is the first of its kind to treat these units as genuine cameras instead of novelties, and the only one to include a full-color photo-essay demonstrating the full capabilities of the latest camera phones. In five easy-to-read chapters, the book explains how to choose good equipment; take better pictures; and store, print and send the best images. Readers will find practical tips on preventing or repairing water damage, protecting easily-scratched lenses inside pockets and purses, and retrieving accidentally-erased images. They'll also learn to access the events, advice, and opportunities of the burgeoning camera phone community, from film festivals to news organizations, moblogs, and more. Featuring the technical savvy of CNet.com's Aimee Baldrige and the creative skill of National Geographic photographer Robert Clark, a camera phone pioneer, this compact yet comprehensive reference combines up-to-the-minute expertise with superb examples, at an inexpensive price that makes it a perfect gift book—or an ideal impulse buy.

Mobile Aviation Billy J. Singleton, 2011-02-28 Local businessman and inventor John Ellis Fowler introduced the concept of the flying machine to Mobile and South Alabama. Fowler's innovative designs mark the beginning of the remarkable aviation heritage of Alabama's port city, a legacy further enhanced by the evolution of military and civilian aviation on Alabama's Gulf Coast. A mild climate and abundance of flat terrain made the region attractive for the establishment of military flight training programs during the World War II while the availability of air, rail, and sea transportation made Mobile an ideal location for construction of a supply and repair depot to support military aviation in the Southeast. *Images of Aviation: Mobile Aviation* is the story of the first century of powered flight in Mobile and South Alabama.

Mobile Cloud Visual Media Computing Gang Hua, Xian-Sheng Hua, 2015-11-23 This book explores the internet and mobile ecosystems which are powered by cloud computing – an essential, if not indispensable, part of our everyday lives. Billions of users world-wide use this technology for information sharing, communication and social networking and a high proportion of activity is driven by massive media content such as images, videos and other emerging 3D visual media. However, managing, searching and visualizing this gigantic amount of data to facilitate communication is difficult which has led to an influx of innovation and research in these areas. The research is from academics from all around the world, focusing on the intersection of mobile, cloud, visual and multimedia computing and is split into five clear parts. Topics covered in the book include mobile augmented reality, computational photography, mobile visual recognition and search, and human-computer interaction (HCI). The findings discussed is meant to spur on further creative development in both academia and industry within this area. *Mobile Cloud Visual Media Computing* would of great interest to researchers and academics wishing to see how the state-of-the-art in media computing research is applied to innovative applications, whilst engineers and software designers from industry will gain an insight into the key set of technologies which support mobile and cloud media computing.
