The 13th Power War Terry Wright,2016-09-10 In this final installment of The 13th Power Trilogy, the peaceful Beltzans of the green planet, 100,000 light years from earth, encounter a Tarreedea spacecraft in orbit. The race of warmongers had been banished from their planet 1000 generations ago. However, Luthes Rez, helmsman of the Orbital Patrol Ship Questnar doubts it's the Tarreedea. The craft displays strange symbols that mean nothing to him: NASA - USA. Janis Mackey and Tracy have been invited to NASA for a meeting with General Brigham and the unveiling of the greatest attack force ever conceived. Brigham needs Janis's mathematical prowess to return to the 13th Power, conquer the aliens, and steal their technology. However, Janis wants nothing to do with an intergalactic war, so Brigham arrests Tracy. If Janis fails, she'll be put to death for treason.Ray Crawford, now an alcoholic recluse, refuses to take calls from NASA until news of alien prisoners of war brought back to earth drags him out of the bottle.Lisa has finally found her man. He's a

quiet soul, peaceful, and a hero in his own right, but Luthes Rez is a prisoner of war, and her father will never approve. Meanwhile, in Ethiopia, archeologist Milton Spears discovers an alien truth buried on Choke Mountain for 20,000 years, a truth the government's secret Aquarius Project wants protected at any cost. This is a story of mankind's treachery, the horrors of galactic war, and the only hope for peace on earth

**Confronting the Costs of War** Michael N.

Barnett, 2012-09-14 What determines the strategies by which a state mobilizes resources for war? And does war preparation strengthen or weaken the state in relation to society? In addressing these questions, Michael Barnett develops a novel theoretical framework that traces the connection between war preparation and changes in state-society relations, and applies that framework to Egypt from 1952 to 1977 and Israel from 1948 through 1977. *Confronting the Costs of War* addresses major issues in international relations, comparative politics, and Middle Eastern studies.

War in the Modern Great Power System Jack S.

Levy, 2014-07-15 The apparently accelerating arms race between the United States and the Soviet Union and the precarious political conditions existing in many parts of the world have given rise to new anxiety about the possibility of military confrontation between the superpowers. Despite the fateful nature of the risk, we have little knowledge, as Jack S. Levy has pointed out, of the conditions, processes, and events which might combine to generate such a calamity. No empirically confirmed theory of the causes of war exists, and the hypotheses -- often contradictory -- that have been proposed remain untested. As a step toward the

formulation of a theory of the causes of war that can be tested against historical experience, Levy has developed a unique data base that will serve as an invaluable resource for students of international conflict in coming years. War in the Modern Great Power System provides a much-needed perspective on the major wars of the past. In this thorough and systematic study, Levy carefully defines the Great Power concept and identifies the Great Powers and their international wars since the late fifteenth century. The resulting compilation of war data is unique because of its five-century span and its focus on a well-defined set of Great Powers. Turning to a quantitative analysis of the characteristics, patterns, and trends in war, Levy demonstrates that although wars between the Great Powers have become increasingly serious in every respect but duration over the last five hundred years, their frequency has diminished. He rejects the popular view that the twentieth century has been the most warlike on record, and he demonstrates that it instead constitutes a return to the historical norm after the exceptionally peaceful nineteenth century. Applying his data to the question whether war is contagious, he finds that the likelihood of war is indeed highest when another war is under way, but that this contagious effect disappears after the first war is over. Contrary to the popular war-weariness theory, he finds no evidence that war generates an aversion to subsequent war. This study, extending the scientific analysis of war back over five centuries of international history, constitutes a major contribution to our knowledge of international conflict.

*The Diffusion of Military Power* Michael C.

Horowitz, 2010-07-01 The Diffusion of Military Power examines how the financial and organizational challenges of adopting new methods of fighting wars can influence the international balance of power. Michael Horowitz argues that a state or actor wishing to adopt a military innovation must possess both the financial resources to buy or build the technology and the internal

organizational capacity to accommodate any necessary changes in recruiting, training, or operations. How countries react to new innovations--and to other actors that do or don't adopt them--has profound implications for the global order and the likelihood of war. Horowitz looks at some of the most important military innovations throughout history, including the advent of the all-big-gun steel battleship, the development of aircraft carriers and nuclear weapons, and the use of suicide terror by nonstate actors. He shows how expensive innovations can favor wealthier, more powerful countries, but also how those same states often stumble when facing organizationally complicated innovations. Innovations requiring major upheavals in doctrine and organization can disadvantage the wealthiest states due to their bureaucratic inflexibility and weight the balance of power toward smaller and more nimble actors, making conflict more likely. This book provides vital insights into military innovations and their impact on U.S. foreign policy, warfare, and the distribution of power in the international system.

Limited War Revisited Robert E. Osgood, 1979-10-02 In this elegant and carefully woven essay, Osgood reviews the lessons of Vietnam and their limits. But more interesting is his sophisticated discussion of the implications, for the limited use of force, of the Soviet Union's growing tendency to exploit conflicts in the Third World, and the need to contain this trend.

**Under the Color of Law** Martin Henn, 2012-07-10 Under the Color of Law constitutes a full and critical scholarly commentary to the text of five key Bush administration legal memoranda formative of U.S. counterterrorism policy from 2001 to 2009. This volume is dedicated to the idea that these documents are worthy of being read and critically examined in themselves as primary text, precisely because the act of critical assessment may yield meaningful policy reform in the ongoing debate facing the nation over balancing security interests with the preservation of civil liberties. This volume is intended to provide counterpoint for, and

antithesis to, positions vigorously defended by President Bush's attorneys working at the OLC inside the Department of Justice, and it is designed to be used primarily in conjunction with and examined as response to the Bush-era documents themselves. Martin Henn investigates five central questions, each framed around commentary to a specific administration document. This work addresses the Yoo-Flanigan Memorandum of September 25, 2001, and asks whether any President has constitutional power to initiate a foreign war without congressional authorization. Regarding President Bush's November 13 executive order of 2001, Henn asks whether an emergency of war permits any President to usurp judicial and legislative powers to interpret law and define and punish offences against the law of nations. Along with many other questions these documents initiate, the author carefully analyzes and seeks to answer questions regarding the Bush administration, the use of interrogational coercion and torture in the war on terror.

### **War, Power and the Economy** A. González

Enciso, 2016-10-04 War, Power and the Economy contains a comparative history of Great Britain, France and Spain, the three rival empires of the 1700s. It explores how the states prepared for war, what kind of economic means they had, what institutional changes they implemented, and how efficient this was. As such, the book presents the first comparative synthesis aiming to understand the outcome of the global confrontation in the eighteenth century. Faced with the challenge of paying for new and more costly wars, some countries found flexible ways to get more money and better supplies, whereas others did not. The development of freer colonial markets, the increase of consumption and its taxation, the problems of venal administration or the different systems of patronage with contractors, are some of the factors explaining the divergences

that were made clear by 1815. This book explores political and economic dimensions of the eighteenth-century European state in order to explain why and how changes in power as an outcome of war depended upon the available means and the way they were obtained and used. The book takes the idea that making war or preparing for it obliged governments to make important changes in their institutions, so that during the eighteenth century the state in many ways formed itself through war efforts. Ultimately, this study aims to show how closely political and military success was entwined with economic interests. This volume is of great interest to those who study economic history, political economy and European history.

**Model Rules of Professional Conduct** American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

It's time to change your mind so God can change your life.

**War and Power in the Twenty-First Century** Paul Hirst, 2002-01-21 Future developments in war, armed conflict and international relations are central to our collective fate in this century. This book looks forward by considering the forces that will drive changes in military organizations, sources of conflict, the power of states and the nature of the international system. New military technologies will alter how wars are fought and will influence the balance of power. Changes in the global

environment will provide new causes of conflict and will change economic priorities. As a result, the state will survive as the key social institution and populations will look to it to acquire and to distribute scarce resources like water, energy and land. Many of the changes that seem transformatory today, like globalization, the internet and mass consumerism, will be shown to be less significant than we believe them to be. Hirst puts such changes into perspective by comparing them with the revolutionary changes in the sixteenth and seventeenth centuries in Europe: the firepower revolution, the rise of the sovereign territorial state and the parallel development of the international system, and the creation of world trade. These basic structures of the modern world are still with us and will remain, despite major changes in twenty-first-century society. This book will appeal to students of politics, political sociology & international relations as well as the interested general reader.
