Finding God in the Ordinary Pierce Taylor

Hibbs,2018-09-19 We tend to look for God in the grand and spectacular, but most of our lives are filled with ordinary moments and routines: drinking coffee, reading a book, driving to work. Can we find God in the banalities of everyday life? In *Finding God in the Ordinary*, the author shows that we can, and that we must. Our world is not an ordinary world. Because it was spoken into being and maintained by the word of God's power (Heb 1:3), everything around us is always revealing the nature and character of the triune God. Our world is extraordinarily ordinary, always calling our attention to the God of glory and his work in the commonplace.

Cellular Neural Networks, Multi-scroll Chaos and Synchronization M. Tak E. Yalcin, Johan A. K. Suykens, Joos Vandewalle, 2005 For engineering applications that are

based on nonlinear phenomena, novel information processing systems require new methodologies and design principles. This perspective is the basis of the three cornerstones of this book: cellular neural networks, chaos and synchronization. Cellular neural networks and their universal machine implementations offer a well-established platform for processing spatial-temporal patterns and wave computing. Multi-scroll circuits are generalizations to the original Chua's circuit, leading to chip implementable circuits with increasingly complex attractors. Several applications make use of synchronization techniques for nonlinear systems. A systematic overview is given for Lur'e representable systems with global synchronization criteria for master-slave and mutual synchronization, robust synchronization, HV synchronization, time-delayed systems and impulsive synchronization.

The Elizabethan Secretariat and the Signet Office

Angela Andreani, 2017-03-31 This book investigates the work of the Elizabethan secretariat during the fascinating decade of the 1590s, when, after the death of Francis Walsingham, the place of principal secretary remained vacant for six years. Through original sources in the collections of the State Papers and Cecil Papers, this study reconstructs the activities of the clerks and secretaries who worked in close contact with the Queen at court. An estimated fifty people, many unidentified, saw to every minute detail of the production of official documents and letters in an array of offices, rooms and locations within and outside the court. The book introduces the staff of the Elizabethan writing offices as a community of shared knowledge with a privileged and constant access to papers of state, working behind the scenes of court display and high politics. While the production of the state papers is explored as a means to re-construct the functioning of the inner mechanisms of state, it also provides a lens through which to access the knowledge of the administration in a

pre-bureaucratic age.
