Soundscape Ecology Almo Farina,2013-10-28 Soundscape Ecology represents a new branch of ecology and it is the result of the integration of different disciplines like Landscape ecology, Bioacoustics, Acoustic ecology, Biosemiotics, etc. The soundscape that is the object of this discipline, is defined as the acoustic context resulting from natural and human originated sounds and it is considered a relevant environmental proxy for animal and human life. With Soundscape Ecology Almo Farina means to offer a new cultural tool to investigate a partially explored component of the environmental complexity. For this he intends to set the principles of this new discipline, to delineate the epistemic domain in which to develop new ideas and theories and to describe the necessary integration with all the other ecological/environmental disciplines. The book is organized in ten chapters. The first two chapters delineate principles and theory of soundscape ecology. Chapters three and four describe the bioacoustic and communication theories. Chapter five is devoted to the human dimension of soundscape. Chapters six to eight regard the major sonic patterns like noise, choruses and vibrations. Chapter nine is devoted to the methods in soundscape ecology and finally chapter ten describes the application of the soundscape analysis.

You Can Do Anything George Anders,2017-08-08 In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature:

learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In *YOU CAN DO ANYTHING*, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren't unruly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist's grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why telling your story is taking its place. You will learn how to create jobs that don't exist yet, and to translate your campus achievements into a new style of expression that will make employers' eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

The Reporter's Notebook Dennis Bloodworth, 2010-09-02 Caught pants down by a dance hostess in a Laotian nightclub; hitching a ride into battle with a chain-smoking pilot in a plane filled with cans of leaking kerosene; fielding cables that arrive in the dead of night from an editor screaming for urgent copy overnight... It's all in a day's work for the foreign correspondent, says author Dennis Bloodworth, who ought to know. He took it all in his stride during the more than 30 years that he spent as foreign correspondent of the London Observer. For those who have always wondered how the news gets into the papers, here's the story behind the stories, and even some stories that couldn't be told

Bridging the Gaps Danny Zborover, Peter Kroefges, 2015-04-02 Bridging the Gaps: Integrating Archaeology and History in Oaxaca, Mexico does just that: it bridges the gap between archaeology and history of the Precolumbian, Colonial, and Republican eras of the state of Oaxaca, Mexico, a cultural area encompassing several of the longest-enduring literate societies in the world. Fourteen case studies from an interdisciplinary group of archaeologists, anthropologists, ethnohistorians, and art historians consciously compare and contrast changes and continuities in material culture before and after the Spanish conquest, in Prehispanic and Colonial documents, and in oral traditions rooted in the present but reflecting upon the

deep past. Contributors consider both indigenous and European perspectives while exposing and addressing the difficulties that arise from the application of this conjunctive approach. Inspired by the late Dr. Bruce E. Byland's work in the Mixteca, which exemplified the union of archaeological and historical evidence and inspired new generations of scholars, Bridging the Gaps promotes the practice of integrative studies to explore the complex intersections between social organization and political alliances, religion and sacred landscape, ethnic identity and mobility, colonialism and resistance, and territoriality and economic resources.

Only by understanding the nature and pattern of loving can we begin to understand the problems of grieving. Conversely, the loss of a loved person can teach us much about the nature of love. Love and Loss, the result of a lifetime's work, has important implications for the study of attachment and bereavement. In this volume, Colin Murray Parkes reports his innovative research that enables us to bring together knowledge of childhood attachments and problems of bereavement, resulting in a new way of thinking about love, bereavement and other losses. Areas covered include: patterns of attachment and grief loss of a parent, child or spouse in adult life social isolation and support. The book concludes by looking at disorders of attachment and considering bereavement in terms of its implications on love, loss, and change in a wider context.
