Content Management Systems in Libraries Bradford Lee Eden, 2008 *Content Management Systems in Libraries: Case Studies* brings together a number of case studies on current content management system (CMS) implementations, using both open-source and proprietary systems, and also reflects on the current state and future of CMS in libraries. There is presently no one source or research guide for CMS given that this area is in flux, yet this type of book is needed in the literature, as many libraries are just starting to implement CMS for their website, instructional content, or other institutional repository settings. Book jacket.

Leadership and Change Management Javon Morin, 2018-10-04 An organization that is established as an instrument or means for achieving defined objectives has been referred to as a formal organizations. Its design specifies, how goals are subdivided and reflected in subdivisions of the organization. Divisions, departments, sections, positions, jobs, and tasks make up this work structure. Thus, the formal organization is expected to behave impersonally in regard to relationship with clients or with its members. Change Management provides readers with frameworks for applying different models of change to different scenarios, offers proactive approaches to change that relate to business performance and gives practical, step-by-step guidance on handling change. The reference book covers a breadth of leadership and change management topics. It draws upon an extensive review of relevant change management literature in order to encourage a critical perspective, as well as a deeper understanding of this important subject area. This book offers the reader answers to questions including why change management tends to fail and why individuals are neglected in traditional accounts of change management. The present book has been written in a lucid style that a layman may understand it easily. The book has been written after a detailed study of concepts and assumptions of several leadership and change management styles in modern business word.
