Critical Materials Strategy Steven Chu, 2011-05 This report examines the role of rare earth metals and other materials in the clean energy economy. It was prepared by the U.S. Department of Energy (DoE) based on data collected and research performed during 2010. In the report, DoE describes plans to: (1) develop its first integrated research agenda addressing critical materials, building on three technical workshops convened by the DoE during November and December 2010; (2) strengthen its capacity for information-gathering on this topic; and (3) work closely with international partners, including Japan and Europe, to reduce vulnerability to supply disruptions and address critical material needs. *Bitumens and Bitumen Emissions, and Some N- and S-heterocyclic Polycyclic Aromatic Hydrocarbons* IARC Working Group on the Evaluation of Carcinogenic Risks to Humans, International Agency for Research on Cancer, World Health Organization, 2013 This volume of the IARC Monographs provides evaluations of the carcinogenicity of bitumens and their emissions, the N-heterocyclic polycyclic aromatic hydrocarbons benz[a]acridine, benz[c]acridine, dibenz[a,h]acridine, dibenz[a,j]acridine, dibenz[c,h]acridine, carbazole and 7H-dibenzo[c,g]carbazole, as well as the S-heterocyclic polycyclic aromatic hydrocarbons benzo[b]naphtho[2,1-d]thiophene and dibenzothiophene. Bitumens are produced by distillation of crude oil during petroleum refining, and also occur naturally. Bitumens can be divided into six broad classes, according to their physical properties and specifications required for different applications. The major use (about 80%) of bitumens is for road paving; other uses include roofing, waterproofing, sealing and painting. The term bitumen should not be confused with asphalt, which refers to the mixture of bitumen (4-10% by weight), small stones, sand and filler used for road paving. Bitumens are complex mixtures that contain a large number of organic chemical compounds. Application of bitumens may generate emissions (fumes and vapours) that may contain, among volatile and non-volatile compounds, a number of known or probable carcinogens. An IARC Monographs Working Group reviewed epidemiological evidence, animal bioassays, and mechanistic and other relevant data to reach conclusions as to the carcinogenic hazard to humans of various occupations that entail exposure to bitumens and bitumen emissions, including road paving, roofing, and application of mastic asphalt, and to various heterocyclic polycyclic aromatic compounds.

*Approaches to the History of Written Culture* Martyn Lyons, Rita Marquilhas, 2017-08-07 This book investigates the history of writing as a cultural practice in a variety of contexts and periods. It analyses the rituals and practices determining intimate or 'ordinary' writing as well as bureaucratic and religious writing. From the inscribed images of 'pre-literate' societies, to the democratization of writing in the modern era, access to writing technology and its public and private uses are examined. In ten studies, presented by leading historians of scribal culture from seven countries, the book investigates the uses of writing in non-alphabetical as well as alphabetical script, in societies ranging from Native America and ancient Korea to modern Europe. The authors emphasise the material characteristics of writing, and in so doing they pose questions about the definition of writing itself. Drawing on expertise in various disciplines, they give an up-to-date account of the current state of knowledge in a field at the forefront of 'Book History'.

**The Nomadic Object** Christine Göttler, Mia Mochizuki, 2017-11-06 A team of renowned scholars examines how sacred art and artefacts responded to the demands of a world stage in the age of reform, demonstrating the significance of religious systems for a global art history.

**Electric Power Systems** João P. S. Catalão, 2017-12-19 Electric Power Systems: Advanced Forecasting Techniques and Optimal Generation Scheduling helps readers develop their skills in modeling, simulating, and optimizing electric power systems. Carefully balancing theory and practice, it presents novel, cutting-edge developments in forecasting and scheduling. The focus is on understanding and solving pivotal problems in the management of electric power generation systems. Methods for Coping with Uncertainty and Risk in Electric Power Generation Outlining real-world problems, the book begins with an overview of electric power generation systems. Since the ability to cope with uncertainty and risk is crucial for power generating companies, the second part of the book examines the latest methods and models for self-scheduling, load forecasting, short-term electricity price forecasting, and wind power forecasting. Toward Optimal Coordination between Hydro, Thermal, and Wind Power Using case studies, the third part of the book investigates how to achieve the most favorable use of available energy sources. Chapters in this section discuss price-based scheduling for generating companies, optimal scheduling of a hydro producer, hydro-thermal coordination, unit commitment with wind generators, and optimal optimization of multigeneration systems. Written in a pedagogical style that will appeal to graduate students, the book also expands on research results that are useful for engineers and researchers. It presents the latest techniques in increasingly important areas of power system operations and planning.

**Identity, Ritual and State in Tibetan Buddhism** Martin A. Mills, 2013-11-05 This is a major anthropological study of contemporary Tibetan

Buddhist monasticism and tantric ritual in the Ladakh region of North-West India and of the role of tantric ritual in the formation and maintenance of traditional forms of state structure and political consciousness in Tibet. Containing detailed descriptions and analyses of monastic ritual, the work builds up a picture of Tibetan tantric traditions as they interact with more localised understandings of bodily identity and territorial cosmology, to produce a substantial re-interpretation of the place of monks as ritual performers and peripheral householders in Ladakh. The work also examines the central and indispensable role of incarnate lamas, such as the Dalai Lama, in the religious life of Tibetan Buddhists.

Toys from Trash Arvind Gupta, 2001 Get the junk out of the trunk and fashion it into cool toys that promise endless hours of fun. Create over 50 toys- a cool stick figure from ice cream sticks, a snazzy goody bag from an old plastic bottle, a simple spoon propeller from plastic spoons and even a complicated water turbine from a water bottle and drinking straws. All out of readily available material. The step-by-step instructions and simple and clear illustrations make this a handy book to have at home to tide over long vacations.

Japanese Psychotherapies Velizara Chervenкова, 2017-12-26 The book presents three Japanese psychotherapeutic approaches, Morita, Naikan, and Dohsa-hou, in the chronological order of their development, giving a thorough account of both their underlying concepts and practical applications. In addition to describing their idiosyncrasies, a major focus of the book is also to elucidate as to how the deeply imprinted cultural specificities of these approaches, emanating from their common cultural ground, converge to two focal points—silence and body-mind interconnectedness—that vest the approaches with their therapeutic power. In so doing, the book gives an insight into the intrinsic dynamics of the methods and emphasizes on their potential for universal applicability notwithstanding their indisputable cultural peculiarities. This self-contained and well-structured book fills the gap in the yet scarce English-language literature on Japanese psychotherapies.

**Until Debt Do Us Part** Otaviano Canuto, Lili Liu, 2013-02-13 With decentralization and urbanization, the debts of state and local governments and of quasi-public agencies have grown in importance. Rapid urbanization in developing countries requires large-scale infrastructure financing to help absorb influxes of rural populations. Borrowing enables state and local governments to capture the benefits of major capital investments immediately and to finance infrastructure more equitably across multiple generations of service users. With debt comes the risk of insolvency. Subnational debt crises have reoccurred in both developed and developing countries. Restructuring debt and ensuring its sustainability confront moral hazard and fiscal incentives in a multilevel government system; individual subnational governments might free-ride common resources, and public officials at all levels might shift the cost of excessive borrowing to future generations. This book brings together the reform experiences of emerging economies and developed countries. Written by leading practitioners and experts in public finance in the context of multilevel government systems, the book examines the interaction of markets, regulators, subnational borrowers, creditors, national governments, taxpayers, ex-ante rules, and ex-post insolvency systems in the quest for subnational fiscal discipline. Such a quest is intertwined with a country's historical, political, and economic context. The formal legal framework interacts with political reality to influence the dynamics of and incentives for reform. Often, the resolution of a subnational debt crisis unfolds in the context of macroeconomic stabilization and structural reforms. The book includes reforms that have not been covered by previous literature, such as those of China, Colombia, France, Hungary, Mexico, and South Africa. The book also presents a comprehensive review of how the United States developed its debt market for state and local governments, through a series of reforms that are path dependent, including the reforms and lessons learned following state defaults in the 1840s and the debates that shaped the enactment of Chapter 9 of the Bankruptcy Code in 1937. Looking forward, pressures on subnational finance are likely to continue from the fragility of global recovery, the potentially higher cost of capital, refinancing risks, and sovereign risks. This book is essential reading for anyone wanting to know the challenges and reform options in debt restructuring, insolvency frameworks, and public debt market development.

**Creative research methods in the social sciences** Kara, Helen, 2015-04-10 With foreword by Kenneth J. Gergen and Mary M. Gergen. Creative research methods can help to answer complex contemporary questions, which are hard to answer using traditional methods alone. Creative methods can also be more ethical, helping researchers to address social injustice. This accessible book is the first to identify and examine the four areas of creative research methods: arts-based research, research using technology, mixed-method research and transformative research frameworks. Written in a practical and jargon-free style, with over 100 boxed examples, it offers numerous examples of creative methods in practice, from the social sciences, arts, and humanities around the world. Spanning the gulf between academia and practice, this useful book will inform and inspire researchers by showing readers why, when, and how to use creative methods in their research.
