ColdFusion Web Development with Macromedia Dreamweaver MX 2004 Peter de Haan,Curtis Hermann,Simon Horwith,Edoardo Zubler,Massimo Foti,2004-04-18 * Competitively priced, comprehensively illustrated, with in-depth real world applied content. There are only 2 other books that approach this subject matter, and our book is more concise, practical, and reaches a more advanced level that than the others. All source code for examples and case study will be openly available for download from www.apress.com. * In-depth final case study – in the final chapter we explore the planning, design, and implementation of an entire fully working website, using all of the code, concepts, and techniques learnt in earlier chapters. This highly applied look at integrating ColdFusion and Dreamweaver in a complete project unifies all of the concepts learnt and takes our book above and beyond the competitors, which rely heavily on theory and small isolated examples. * The authors (in Particular Jen deHaan, Massimo Foti and Simon Horwith) are highly experienced and renowned members of the Dreamweaver and ColdFusion web communities.

Learn Programming with Flash MX Ben Renow-Clarke,Kristian Besley,2003-10-01 * First Flash book to use the unique virtual classroom approach to teaching ActionScript programming to absolute beginners, so it meets a need head-on that no other book addresses directly—providing the missing link between technology and creativity. * Flash and ActionScript are extremely simple to learn, so this book provides the ideal entry point for any aspiring programmer and web designer, compared with technologies like VB and C++, which can be very intimidating to the novice. Additionally, this book is complementary to any other entry-level Flash titles – it recognizes that as well as mastering the design side of the toolset, effective designer/developers also need to grasp basic programming skills. Having Flash on your machine doesn't miraculously turn you into a web designer – you need to work at learning design and programming skills too. * The authors are highly experienced authors and Flash tutors, well versed in communicating technical information to a low level consumer audience. They are also active web community members and will provide personal technical support for the book direct to the reader via the Friends of ED support forums.
