Model Rules of Professional Conduct American Bar Association. House of Delegates,Center for Professional Responsibility (American Bar Association),2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Princes of the Renaissance Mary Hollingsworth,2021-03-02 A vivid history of the lives and times of the aristocratic elite whose patronage created the art and architecture of the Italian Renaissance. The fifteenth and sixteenth centuries was an era of dramatic political, religious, and cultural change in the Italian peninsula, witnessing major innovations in the visual arts, literature, music, and science. Princes of the Renaissance charts these developments in a sequence of eleven chapters, each of which is devoted to two or three princely characters with a cast of minor ones—from Federigo da Montefeltro, Duke of Urbino, to Cosimo I de' Medici, Duke of Florence, and from Isabella d'Este of Mantua to Lucrezia Borgia. Many of these princes were related by blood or marriage, creating a web of alliances that held Renaissance society together—but whose tensions could spark feuds that threatened to tear it apart. A vivid depiction of the lives and times of the aristocratic elite whose patronage created the art and architecture of the Renaissance, Princes of the Renaissance is a narrative that is as rigorous and definitively researched as it is accessible and entertaining. Perhaps most importantly, Mary Hollingsworth sets the aesthetic achievements of these aristocratic patrons in the context of the volatile, ever-shifting politics of an age of change and innovation.

The fifth BMW Art Guide by Independent Collectors BMW Group, Independent Collectors,2020-07-14 The revised and extended BMW Art Guide by Independent Collectors presents nearly 300 private collections of contemporary art accessible to the public—featuring large and small, famous and the relatively unknown. Succinct portraits of the collections with countless color illustrations take the reader to more than 40 countries, often to regions or urban districts that are off the beaten path. This practical guide is a collaborative publication stemming from the partnership between BMW and Independent Collectors, the international online platform for collectors of contemporary art. To date, neither the Internet nor any book has ever contained a comparable assembly of international private collections, including several that have opened their doors to art lovers and connoisseurs for the first time.

Experiment and Evaluation in Information Retrieval Models K. Latha,2017-07-28 Experiment and Evaluation in Information Retrieval Models explores different algorithms for the application of evolutionary computation to the field of information retrieval (IR). As well as examining existing approaches to resolving some of the problems in this field, results obtained by researchers are critically evaluated in order to give readers a clear view of the topic. In addition, this book covers Algorithmic Solutions to the Problems in Advanced IR Concepts, including Feature Selection for Document Ranking, web page classification and recommendation, Facet Generation for Document Retrieval, Duplication Detection and seeker satisfaction in question answering community Portals. Written with students and researchers in the field on information retrieval in mind, this book is also a useful tool for researchers in the natural and social sciences interested in the latest developments in the fast-moving subject area. Key features: Focusing on recent topics in Information Retrieval research, Experiment and Evaluation in Information Retrieval Models explores the following topics in detail: Searching in social media Using semantic annotations Ranking documents based on Facets Evaluating IR systems offline and online The role of evolutionary computation in IR Document and term clustering, Image retrieval Design of user profiles for IR Web page classification and recommendation Relevance feedback approach for Document and image retrieval

Pottery, Pavements, and Paradise Annewies van den Hoek,John Joseph Herrmann,2013-09-26 New perspectives are provided on late antique cults, popular entertainment, and the decoration of Christian churches through a fresh look at Christian writings, popular ceramics, and elite works of mosaic, metalwork, and marble sculpture.

Progress in Location-Based Services Jukka M. Krisp,2013-01-03 The book consists of peer-reviewed papers from the 9th symposium on Location Based Services (LBS) which is targeted to researchers, industry/market operators and students of different backgrounds (scientific, engineering and humanistic). As the research field is developing and changing fast, this book follows up on current trends and gives suggestions and guidance to further research. This book offers a common ground bringing together various disciplines and practice, knowledge, experiences, plans and ideas on how LBS can and could be improved and on how it will influence both science and society. The book comprises front-end publications organized into sections on: spatial-temporal data acquisition, processing & analysis; positioning / indoor positioning; way-finding / navigation (indoor / outdoor) & smart mobile phone navigation; interactions, user studies and evaluations; innovative LBS systems & applications.

  Dark Web Hsinchun Chen,2011-12-16 The University of Arizona Artificial Intelligence Lab (AI Lab) Dark Web project is a long-term scientific research program that aims to study and understand the international terrorism (Jihadist) phenomena via a computational, data-centric approach. We aim to collect ALL web content generated by international terrorist groups, including web sites, forums, chat rooms, blogs, social networking sites, videos, virtual world, etc. We have developed various multilingual data mining, text mining, and web mining techniques to perform link analysis, content analysis, web metrics (technical sophistication) analysis, sentiment analysis, authorship analysis, and video analysis in our research. The approaches and methods developed in this project contribute to advancing the field of Intelligence and Security Informatics (ISI). Such advances will help related stakeholders to perform terrorism research and facilitate international security and peace. This monograph aims to provide an overview of the Dark Web landscape, suggest a systematic, computational approach to understanding the problems, and illustrate with selected techniques, methods, and case studies developed by the University of Arizona AI Lab Dark Web team members. This work aims to provide an interdisciplinary and understandable monograph about Dark Web research along three dimensions: methodological issues in Dark Web research; database and computational techniques to support information collection and data mining; and legal, social, privacy, and data confidentiality challenges and approaches. It will bring useful knowledge to scientists, security professionals, counterterrorism experts, and policy makers. The monograph can also serve as a reference material or textbook in graduate level courses related to information security, information policy, information assurance, information systems, terrorism, and public policy.

  Reference and Information Services Richard E. Bopp,Linda C. Smith,2011-05-23 Reflecting the dramatic changes shaped by rapidly developing technologies over the past six years, this new fourth edition of Reference and Information Services takes the introduction to reference sources and services significantly beyond the content of the first three editions. In Part I, Concepts and Processes, chapters have been revised and updated to reflect new ideas and methods in the provision of reference service in an era when many users have access to the Web. In Part II, Information Sources and Their Use, discussion of each source type has been updated to encompass key resources in print and on the Web, where an increasing number of freely available sources join those purchased or licensed by libraries. A number of new authors are contributors to this new edition, bringing to their chapters their experience as teachers of reference and as practitioners in different

types of libraries. Discussions of services in Part I integrate digital reference as appropriate to each topic, such as how to conduct a reference interview online using instant messaging. Boxes interspersed in the text are used to present scenarios for discussion, to highlight key concepts, or to present excerpts from important documents. Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources. The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources. Each chapter concludes with an updated list of additional readings to guide further study. A new companion website will provide links to Web-accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text.

Beginning Visual C# 2005 Express Edition Heather Wright,2006-11-17 * Written by Peter Wright, who taught 100,000 new programmers how to program in Visual Basic when Microsoft last launched a new product so suitable for new/hobbyist and aspirant programmers. The same Peter Wright style today makes this book the best Express tutorial available. * Covers all the key features of Express C# in a friendly, accessible style, and opens up a whole range of exciting continuation products in the Apress roadmaps for when the new programmers wants to continue their journey. * C# is the language of the future and a lot of aspirant programmers are going to choose C# as their entry-point into programming. This book serves that new community of programmers and presents a first-class author to guide them.

Encyclopedia of Archival Science Luciana Duranti,Patricia C. Franks,2015-06-17 Here is the first-ever comprehensive guide to archival concepts, principles, and practices. Encyclopedia of Archival Science features 154 entries, which address every aspect of archival professional knowledge. These entries range from traditional ideas (like appraisal and provenance) to today's challenges (digitization and digital preservation). They present the thoughts of leading luminaries like Ernst Posner, Margaret Cross-Norton, and Philip Brooks as well as those of contemporary authors and rising scholars. Historical and ethical components of practice are infused throughout the work. Edited by Luciana Duranti from the University of British Columbia and Patricia C. Franks from San José State University, this landmark work was overseen by an editorial board comprised of leading archivists and archival educators from every continent: Adrian Cunningham (Queensland State Archives, Australia), Fiorella Foscarini (University of Toronto and University of Amsterdam), Pat Galloway (University of Texas at Austin), Shadrack Katuu (International Atomic Energy Agency), Giovanni Michetti (University of Rome La Sapienza), Ken Thibodeau (National Archives and Records Administration, US), and Geoffrey Yeo (University College London, UK).
