Cloud Native Infrastructure Justin Garrison, Kris Nova, 2017-10-25 Cloud native infrastructure is more than servers, network, and storage in the cloud—it is as much about operational hygiene as it is about elasticity and scalability. In this book, you'll learn practices, patterns, and requirements for creating infrastructure that meets your needs, capable of managing the full life cycle of cloud native applications. Justin Garrison and Kris Nova reveal hard-earned lessons on architecting infrastructure from companies such as Google, Amazon, and Netflix. They draw inspiration from projects adopted by the Cloud Native Computing Foundation (CNCF), and provide examples of patterns seen in existing tools such as Kubernetes. With this book, you will: Understand why cloud native infrastructure is necessary to effectively run cloud native applications Use guidelines to decide when—and if—your business should adopt cloud native practices Learn patterns for deploying and managing infrastructure and applications Design tests to prove that your infrastructure works as intended, even in a variety of edge cases Learn how to secure infrastructure with policy as code

**Remix Strategy** Benjamin Gomes-Casseres, 2015-08-11 How to Create Joint Value Alliances, partnerships, acquisitions, mergers, and joint ventures are no longer the exception in most businesses—they are part of the core strategy. As managers look to external partners for resources and capabilities, they need a practical roadmap to ensure that these relationships will create value for their firm. They must answer questions like these: Which business combinations do we need? How should we govern them? Will their results justify our investments? Benjamin Gomes-Casseres explains how companies create value by “remixing” resources with other companies. Based on decades of consulting and academic research, Remix Strategy shows how three laws shape the success of any business combination: • First Law: The combination must have the potential to create more value than the parties could create on their own. Which elements from each business need to be combined to create joint value? • Second Law: The combination must be designed and managed to realize the joint value. Which partners best fit our strategic goals? How should we manage the integration? • Third Law: The value earned by the parties must motivate them to contribute to the collaboration. How will we share the joint value created? Will the returns shift over time? Supported by examples from a wide range of industries and companies, and filled with practical tools for applying the three laws, this book helps managers design and lead a coherent strategy for creating joint value with outside partners.
