Personal, Accessible, Responsive, Strategic Jessie Borgman,Casey McArdle,2019 By focusing on being Personal, Accessible, Responsive, and Strategic (PARS), this book explores the complexities and anxieties associated with Online Writing Instruction (OWI). The book offers examples of how to create personal assignments, syllabi, and learning spaces that connect with students while teaching instructors how to be accessible and craft accessible documents and spaces. The authors argue that when instructors create an online writing course, they are crafting a user experience and that, by borrowing from user experience practices, they encourage instructors to be strategic in planning and teaching their online courses--

viruses, worms, Trojans, and botnets. IDA Pro's interactive interface and programmable development language provide you with complete control over code disassembly and debugging. This is the only book which focuses exclusively on the world's most powerful and popular tool for reverse engineering code. *Reverse Engineer REAL Hostile Code To follow along with this chapter, you must download a file called !DANGER!INFECTEDMALWARE!DANGER!... 'nuff said. *Portable Executable (PE) and Executable and Linking Formats (ELF) Understand the physical layout of PE and ELF files, and analyze the components that are essential to reverse engineering. *Break Hostile Code Armor and Write your own Exploits Understand execution flow, trace functions, recover hard coded passwords, find vulnerable functions, backtrace execution, and craft a buffer overflow. *Master Debugging Debug in IDA Pro, use a debugger while reverse engineering, perform heap and stack access modification, and use other debuggers. *Stop Anti-Reversing Anti-reversing, like reverse engineering or coding in assembly, is an art form. The trick of course is to try to stop the person reversing the application. Find out how! *Track a Protocol through a Binary and Recover its Message Structure Trace execution flow from a read event, determine the structure of a protocol, determine if the protocol has any undocumented messages, and use IDA Pro to determine the functions that process a particular message. *Develop IDA Scripts and Plug-ins Learn the basics of IDA scripting and syntax, and write IDC scripts and plug-ins to automate even the most complex tasks.

The Internet Literacy Handbook Betsy Burdick, Chris Coakley, Janice Patricia Richardson, 2006-01-01 Over the past decade, Internet technology, now merging into that of mobile technology, has transformed the multiple facets of life in society across the world, changing work and leisure patterns, and placing greater demands on us as active, democratic citizens. The Internet literacy handbook, intended for parents, teachers and young people throughout Europe, is a guide to exploiting to the fullest this complex network of information and communication. The handbook is comprised of 21 fact sheets, each covering a particular topic on Internet use, from searching for information to setting up blogs through to e-shopping and e-citizenship. These fact sheets offer teachers and parents sufficient technical know-how to allow them to share young people's and children's voyages through communication technology. They highlight ethical and safety considerations, give insight into added value in education, provide ideas for constructive activities in class or at home, share best practice in Internet use, and provide a wealth of definitions and links to sites that give practical examples and further in-depth information.

Cosmococa Hélio Oiticica, Neville d' Almeida, 2005 Comprehensive edition regarding the first 5 multimedia installations as originally envisioned by artist Oiticica (b. Brazil) and conceived in collaboration with the filmmaker D'Almeida (b. Brazil). The Cosmococa photographic series consist of single rolls of film in accordance with the artist's concept of quasi-cinema, participative spaces that transcend the cinematographic experience and call into question the contemplative nature of the art object and designed as collective experiences making the spectator an active participant. The present edition is faithful to the artist's original concept in its presentation of facsimiles of both his notebooks in which the works were conceptualized and Oiticica's own typewritten transcriptions along photographs of installations recently mounted at the Pinacoteca de São Paulo and at the Centro de Arte Hélio Oiticica in Rio de Janeiro, two multimedia installations that precede the original photographs for Cosmococa. The book also contains critical essays by César Oiticica Filho (curator of Projeto Hélio Oiticica), Paulo Herkenhoff and Kátia Maciel.

Innovations in Biomedical Engineering Marek Gzik, Zbigniew Paszenda, Ewa Piętka, Ewaryst Tkacz, Krzysztof Milewski, Jacek Jurkojć, 2022-05-31 This book presents the latest developments in the field of biomedical engineering and includes practical solutions and strictly scientific considerations. The development of new methods of treatment, advanced diagnostics or personalized rehabilitation requires close cooperation of experts from many fields, including, among others, medicine, biotechnology and finally biomedical engineering. The latter, combining many fields of science, such as computer science, materials science, biomechanics, electronics not only enables the development and production of modern medical equipment, but also participates in the development of new directions and methods of treatment. The presented monograph is a collection of scientific papers on the use of engineering methods in medicine. The topics of the work include both practical solutions and strictly scientific considerations expanding knowledge about the functioning of the human body. We believe that the presented works will have an impact on the development of the field of science, which is biomedical engineering, constituting a contribution to the discussion on the directions of development of cooperation between doctors, physiotherapists and engineers. We would also like to thank all the people who contributed to the creation of this monograph—both the authors of all the works and those involved in technical works.

Data and Mobility Julia Düh, Hartwig Hufnagl, Erhard Juritsch, Reinhard Pfliegl, Helmut-Klaus Schimany, Hans Schönegger, 2010-09-08 Over the last few years, the local

value of mobility and information in our society has grown tremendously. As the importance of Information and Communication Technologies (ICT) increases, we expect more changes in future mobility behavior. This includes not only mobility behavior for the single user, but also for the transportation of goods and infrastructure operators. It will also affect the regulation of resources and political decision-making. Both, data and mobility become more connected. To cope effectively with the anticipated changes, we must expand our focus and take current developments in both areas into account. The topic of the Lakeside Conference 2010, Data and Mobility – Transforming Information into Intelligent Traffic and Transportation Services, was chosen to underline the importance of information and mobility in transport and to offer an opportunity to discuss and question current activities in this sector. We will consider intermodal concepts and deployments in particular, where data transfer plays a major role, as this could help to reduce the current lack of infrastructure capacity (especially on roads and at airports and seaports). Using modern technologies, traffic management could become more sustainable and efficient. The Lakeside Conference is, again, organized by a consortium composed of the Lakeside Technology Park, the Austrian Transport Telematic Cluster, AustriaTech and the American Embassy in Austria.

Telemedicine: Opportunities and Developments in Member States discusses the results of the telemedicine module, which was completed by 114 countries (59% of Member States).

Designing Inclusive Futures P. Langdon, P. John Clarkson, P. Robinson, 2008-03-07 "Designing Inclusive Futures" reflects the need to explore, in a coherent way, the issues and practicalities that lie behind design that is intended to extend our active future lives. This encompasses design for inclusion in daily life at home but also extends to the workplace and for products within these contexts. For example, given trends in employment sector growth, skills requirements, labour supply and demographic change, there is a need to predict the critical areas where individual capabilities are mismatched with the physical, social and organisational demands of work. This mismatch, which can be addressed within the domain of inclusive design, is pervasively linked to real artefacts in workspaces and their intersection with the health factors that relate to ageing. This book is the result of the fourth CWUAAT workshop held in Cambridge, England in April 2008.
