Storytelling with Data teaches you the fundamentals of data visualization and how to communicate effectively with data. You'll discover the power of storytelling and the way to make data a pivotal point in your story. The lessons in this illuminative text are grounded in theory, but made accessible through numerous real-world examples—ready for immediate application to your next graph or presentation. Specifically, you'll learn how to: Understand the importance of context and audience Determine the appropriate type of graph for your situation Recognize and eliminate the clutter clouding your information Direct your audience's attention to the most important parts of your data Think like a designer and utilize concepts of design in data visualization Leverage the power of storytelling to help your message resonate with your audience Together, the lessons in this book will help you turn your data into high impact visual stories that stick with your audience. Rid your world of ineffective graphs, one exploding 3D pie chart at a time. There is a story in your data—Storytelling with Data will give you the skills and power to tell it!

*Early Detection and Intervention in Audiology* Katijah Khoza-Shangase, Amisha Kanji, 2021-02-01 A textbook with case studies for audiologists and speech pathologists to make recommendations for early detection and intervention of hearing impairments in the South African context Early hearing detection and intervention (EHDI) is the gold standard for any practicing audiologist, and for families of infants and children with hearing impairment. EHDI programs aim to identify, diagnose and provide intervention to children with hearing impairment from as early as six months old (as well as those at risk for hearing impairment) to ensure they develop and achieve to their potential. Yet EHDI remains a significant challenge for Africa, and various initiatives are in place to address this gap in transferring policy into practice within the southern African context. The diversity of factors in the southern African context presents unique challenges to teaching and research in this field, which has prompted this book project. The South African government's heightened focus on increasing access to health care which includes ongoing Early Childhood Development (ECD) programs, make this an opportune time for establishing and documenting evidence-based research for current undergraduate and postgraduate students. Early Detection and Intervention in Audiology: An African Perspective aims to address this opportunity. Grounded in an African context with detailed case studies, this book provides rich content that pays careful attention to contextual relevance and contextual responsiveness to both identification and intervention in hearing impairment. With diverse contributions from experts in local and international contexts, but always with an African perspective, this is textbook will be an invaluable resource for students, researchers and practitioners.

It offers a rich and stimulating theoretical account of the central dimension of our contemporary existence--interfacing and navigating both data and physical world through a variety of screens (game consoles, mobile phones, car interfaces, GPS devices, etc.). In the process of exploring these new screen practices, Verhoeff offers fresh perspectives on many of the key questions in media and new media studies as well as a number of new original theoretical concepts. As the first theoretical manual for the society of mobile screens, this book will become an essential reference for all future investigations of our mobile screen condition.--Lev Manovich.--Publisher's description.

**Transgender Marxism** Jules Joanne Gleeson, Elle O'Rourke, 2021-05-20 Transgender Marxism is the first volume of its kind, offering a provocative and groundbreaking synthesis of transgender studies and Marxist theory. Reflecting on the relations between gender and labour, it shows how these linked phenomena structure antagonisms in particular social and historical situations. While no one is spared gendered conditioning, the contributors argue that transgender people nonetheless face particular pressures, oppressions and state persecution. The collection makes a particular contribution to Marxist feminism and social reproduction theory, through both personal and analytic examinations of the social activity demanded of trans people around the world. Exploring trans lives and movements through a Marxist lens, the book also assesses the particular experience of surviving as trans in light of the totality of gendered experience under capitalism. Twinning Marxism with other schools of thought - including psychoanalysis, phenomenology and Butlerian performativity - Transgender Marxism ultimately offers an insight into transgender experience, and an exciting renewal of Marxist theory itself.

*The Self-begetting Novel* Steven G. Kellman, 1980

*Knight* Kristen Ashley, 2012-04-08 Anya Gage has learned that to get anything good in life, you have to work for it. She has no expectations, no dreams. Then she finds herself at a party where she doesn't want to be and she meets Knight. Knight Sebring knows who he is, what he wants and what he likes. And he gets it. But he never expected something as sweet as Anya Gage to wander into his bedroom during a party he did not expect to be having to borrow his phone. Knight tries to leave Anya to the life she deserves of white picket fences and a man who watches football on Sundays - good, normal and clean. But when Anya comes to his

nightclub and finds herself in a situation, he knows someone has to look after her, he can't fight it anymore and he decides that man will be him. Knight teaches Anya that, just as with the bad, in life you should also expect the good. And he teaches her this by giving it to her. But Knight has a dark past and just as he desires Anya for exactly who she is, he fears when she finds out exactly the man he has become and always intends to be, she'll leave him for good, normal and clean.

**The Sense of Being Stared At** Rupert Sheldrake, 2013-06-22 Explores Rupert Sheldrake's more than 25 years of research into telepathy, staring and intention, precognition, and animal premonitions • Shows that unexplained human abilities--such as the sense of being stared at and phone telepathy--are not paranormal but normal, part of our biological nature • Draws on more than 5,000 case histories, 4,000 questionnaire responses, and the results of experiments carried out with more than 20,000 people • Reveals that our minds and intentions extend beyond our brains into the world around us and even into the future Nearly everyone has experienced the feeling of being watched or had their stare result in a glance in their direction. The phenomenon has been cited throughout history in nearly every culture, along with other commonplace "paranormal" occurrences such as premonitions and telepathy. In this newly updated edition, Sheldrake shares his more than 25 years of research into telepathy, the power of staring, remote viewing, precognition, and animal premonitions. Drawing on more than 5,000 case histories, 4,000 questionnaire responses, and the results of experiments on staring, thought transference, phone telepathy, and other phenomena carried out with more than 20,000 people as well as reports and data from dozens of independent research teams, Sheldrake shows that these unexplained human abilities--such as the sense of being stared at--are not paranormal but normal, part of our biological nature. He reveals that telepathy depends on social bonds and traces its evolution from the connections between members of animal groups such as flocks, schools, and packs. Sheldrake shows that our minds and intentions extend beyond our brains into our surroundings with invisible connections that link us to each other, to the world around us, and even to the future.

**Nationalism, Its Meaning and History** Hans Kohn, 1965 Reprint. Originally published: Rev. ed. Princeton, N.J.: Van Nostrand 1965. (An Anvil original; 8)

**Messages, Signs, and Meanings** Marcel Danesi, 2004 Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do hands-on semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages.--Jacket.

**What Media Classes Really Want to Discuss** Greg Smith, 2010-09-13 You probably already have a clear idea of what a discussion guide for students is: a series of not-very-interesting questions at the end of a textbook chapter. Instead of triggering thought-provoking class discussion, all too often these guides are time-consuming and ineffective. This is not that kind of discussion guide. What Media Classes Really Want To Discuss focuses on topics that introductory textbooks generally ignore, although they are prominent in students' minds. Using approachable prose, this book will give students a more precise critical language to discuss "common sense" phenomena about media. The book acknowledges that students begin introductory film and television courses thinking they already know a great deal about the subject. What Media Classes Really Want To Discuss provides students with a solid starting point for discussing their assumptions critically and encourages the reader to argue with the book, furthering the 'discussion' on media in everyday life and in the classroom.

**The Body and the Screen** Michele White, 2006 White shows that despite the onscreen promise of empowerment and coherence (through depictions of materiality that structure the experience), fragmentation and confusion are constant aspects of Internet spectatorship.--BOOK JACKET.

**Introduction to Sociology 2e** Nathan J. Keirns, Heather Griffiths, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff D. Bry, Faye Jones, 2015-04-24 Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface.--Website of text.
