One Hundred Ideas that Changed the Web Jim Boulton,2014 This innovative title looks at the history of the Web from its early roots in the research projects of the US government to the interactive online world we know and use today. Fully illustrated with images of early computing equipment and the inside story of the online world's movers and shakers, the book explains the origins of the Web's key technologies, such as hypertext and mark-up language, the social ideas that underlie its networks, such as open source, and creative commons, and key moments in its development, such as the movement to broadband and the Dotcom Crash. Later ideas look at the origins of social networking and the latest developments on the Web, such as The Cloud and the Semantic Web. Following the design of the previous titles in the series, this book will be in a new, smaller format. It provides an informed and fascinating illustrated history of our most used and fastest-developing technology. -- Provided by publisher.

What is Web 2.0 Tim O'Reilly,2009-09-23 The concept of Web 2.0 began with a conference brainstorming session between O'Reilly and MediaLive International. Dale Dougherty, web pioneer and O'Reilly VP, noted that far from having crashed, the web was more important than ever, with exciting new applications and sites popping up with surprising regularity. What's more, the companies that had survived the collapse seemed to have some things in common. Could it be that the dot-com collapse marked some kind of turning point for the web, such that a call to action such as Web 2.0 might make sense? We agreed that it did, and so the Web 2.0 Conference was born. In the year and a half since, the term Web 2.0 has clearly taken hold, with more than 9.5 million citations in Google. But there's still a huge amount of disagreement about just what Web 2.0 means, with some people decrying it as a meaningless marketing buzzword, and others accepting it as the new conventional wisdom. This article is an attempt to clarify just what we mean by Web 2.0.
