## **CICS and SOA: Architecture and Integration**

**Choices** Chris Rayns, Mark Cocker, Regis David, Subhajit Maitra, Dan Millwood, Ian Mitchell, Phil Wakelin, Nigel Williams, IBM Redbooks, 2012-03-26 The service-oriented architecture (SOA) style of integration involves breaking an application down into common, repeatable services that can be used by other applications (both internal and external) in an organization, independent of the computing platforms on which the business and its partners rely. In recent years CICS® has added a variety of support for SOA and now provides near seamless connectivity with other IT environments. This IBM® Redbooks® publication helps IT architects to select, plan, and design solutions that integrate CICS applications as service providers and requesters. First, we provide an introduction to CICS service enablement and introduce the architectural choices and technologies on which a CICS SOA solution can be based. We continue with an in-depth analysis of how to meet functional and non-functional requirements in the areas of application interface, security, transactional scope, high availability, and scalability. Finally, we document three integration scenarios to illustrate how these technologies have been used by customers to build robust CICS integration solutions.

Chemical Communication in Crustaceans Thomas Breithaupt, Martin Thiel, 2010-11-25 The crustaceans are ecologically and economically important organisms. They constitute one of the dominant

invertebrate groups on earth, particularly within the aquatic realm. Crustaceans include some of the preferred scientific model organism, profitable aquaculture specimen, but also invasive nuisance species threatening native animal communities throughout the world. Chemoreception is the most important sensory modality of crustaceans, acquiring important information about their environment and picking up the chemical signals that mediate communication with conspecifics. Significant advances have been made in our understanding of crustacean chemical communication during the past decade. This includes knowledge about the identity, production, transfer, reception and behavioral function of chemical signals in selected crustacean groups. While it is well known that chemical communication is an integral part of the behavioral ecology of most living organisms, the intricate ways in which organisms allocate chemicals in communication remains enigmatic. How does the environment influence the evolution of chemical communication? What are the environmental cues that induce production or release of chemicals? How do individuals economize production and utilization of chemicals? What is the importance of molecule specificity or mix of a molecule cocktail in chemical communication? What is the role of chemical cues in multimodal communication? How does the ontogenetic stage, the sex or the physiological status of an individual affect its reaction to chemical cues? Many of these questions still represent important challenges to biologists.

## **Threadsafe Considerations for CICS** Chris

Rayns, George Bogner, Philip Hale, Em James, Peter Klein, John Tilling, IBM Redbooks, 2012-04-05

Beginning with IBM® CICS® Version 2, applications can run on TCBS apart from the QR TCB, which has positive implications for improving system throughput and for implementing new technologies inside of CICS. Examples of implementing new technologies include using the IBM MVSTM Java virtual machine (JVM) inside CICS and enabling listener tasks written for other platforms to be imported to run under CICS. The newest release, CICS Transaction Server for z/OS® (CICS TS) V4.2, includes scalability enhancements so that you can perform more work more quickly in a single CICS system. The advantage of this enhancement is that you can increase vertical scaling and decrease the need to scale horizontally, reducing the number of regions that are required to run the production business applications. The scalability enhancements in CICS TS V4.2 fall into two broad areas, which are increased usage of open transaction environment (OTE) and of 64-bit storage. This IBM Redbooks® publication is a comprehensive guide to threadsafe concepts and implementation for IBM CICS. This book explains how systems programmers, applications developers, and architects can implement threadsafe applications in an environment. It describes the real-world experiences of users, and our own experiences, of migrating applications to be threadsafe. This book also highlights the two most critical aspects of threadsafe applications: system performance and integrity.

**z/OS Identity Propagation** Karan Singh, Rogerio Camargo, Simon Dodge, Bob McCormack, Alain Roessle, Martina Schmidt, Ruben Thumbiran, Phil Wakelin, Nigel Williams, IBM Redbooks, 2011-09-29 This IBM® Redbooks® publication explores various implementations of z/OS® Identity Propagation where the distributed identity of an end user is passed to z/OS and used to map to a RACF® user ID, and any related events in the audit trail from RACF show both RACF and distributed identities. This book describes the concept of identity propagation and how it can address the end-to end accountability issue of many customers. It describes, at a high level, what identity propagation is, and why it is important to us. It shows a conceptual view of the key elements necessary to accomplish this. This book provides details on the RACMAP function, filter management and how to use the SMF records to provide an audit trail. In depth coverage is provided about the internal implementation of identity propagation, such as providing information about available callable services. This book examines the current exploiters of z/OS Identity Propagation and provide several detailed examples covering CICS® with CICS Transaction Gateway, DB2®, and CICS Web services with Datapower.

*Beach Mysteries* Nancy Sakaduski, 2020-10-29 What is a beach mystery? Is it a mermaid washing up on shore? A beach cottage with a spirit? A murder on the boardwalk? A painting with a past? *Beach Mysteries* includes mysteries of many kinds. You'll meet hit men, ghosts, and crime solvers. Find long-lost treasure, encounter figures from the

**Cattle Inspection** Institute of Medicine, Food and Nutrition Board, 1990-02-01 The result of a federally-mandated study to evaluate the streamlined inspection systems now in place at cattle slaughter plants throughout the US, this volume compares the streamlined system to the traditional cattle inspection system; recounts on-site reviews of two high-volume plants; surveys procedures for monitoring chemicals and pathogens in carcasses; and evaluates the overall efficacy of the streamlined system in protecting the public's health. *Pheromones and Animal Behaviour* Tristram D. Wyatt, 2003-02-27 We are entering one of the most exciting periods in the study of chemical communication since the first pheromones were identified some 40 years ago. This rapid progress is reflected in this book, the first to cover the whole animal kingdom at this level for 25 years. The importance of chemical communication is illustrated with examples from a diverse range of animals including humans, marine copepods, *Drosophila*, *Caenorhabditis elegans*, moths, snakes, goldfish, elephants and mice. It is designed to be advanced, but at the same time accessible to readers whatever their scientific background. For students of ecology, evolution and behaviour, this book gives an introduction to the rapid progress in our understanding of olfaction at the molecular

and neurological level. In addition, it offers chemists, molecular and neurobiologists an insight into the ecological, evolutionary and behavioural context of olfactory communication.

**The Kaiser's Reluctant Conscript** Dominik Richert, 2012 As a conscript from Alsace, Dominik Richert realized from the outset of the First World War that his family was likely to be at or near the front line. He was a reluctant soldier who was willing to stand up to authority - and to avoid risks - in order to survive. His honest account of his part in the conflict, which saw him serving on both the Western and Eastern Front over the duration of the War, gives a lively picture of major events. He took part in fighting French and Indian troops in 1914, in the battle on Mount Zwinin in the Carpathians in 1915 and in the subsequent invasion of the western parts of the Ukraine and Poland. Later he was involved in the capture of Riga in 1917, before returning to the Western Front in 1918, where he witnessed German tanks in action at the Battle of Villers-Bretonneux. As he could see no point in the war, he subsequently crossed no-man's-land and surrendered to the French, becoming a 'deserteur Alsacienne'. The book ends with Richert's return home early in 1919. A fascinating aspect of the book is the character author himself. He is increasingly willing to act independently as the narrative progresses, and he refuses to accept the propaganda that he encounters. He fights to survive, but feels little respect for his own army or the society that sent him to war.

*Beach Secrets* Nancy Sakaduski, 2021-11 Beach

Beach Secrets contains the winning entries from the 2021 Rehoboth Beach Reads Short Story Contest as chosen by a panel of judges.

*How Fighting Ends* Holger Afflerbach, Hew Strachan, 2012-07-26 The history of surrender is one of the most neglected in the history of war, and yet it is vital to understanding not only how wars end but also how they are contained. This is a book with a chronological sweep that runs from the Stone Age to the present day, written by a team of truly distinguished scholars.

Dictionary of Louisiana French Albert

Valdman, Kevin James Rottet, 2010 The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected

from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane .

**Marine Fisheries Ecology** Simon Jennings, Michel  
Kaiser, John D. Reynolds, 2013-04-16 This topical  
and exciting textbook describes fisheries  
exploitation, biology, conservation and  
management, and reflects many recent and important  
changes in fisheries science. These include  
growing concerns about the environmental impacts  
of fisheries, the role of ecological interactions  
in determining population dynamics, and the  
incorporation of uncertainty and precautionary  
principles into management advice. The book draws

upon examples from tropical, temperate and polar environments, and provides readers with a broad understanding of the biological, economic and social aspects of fisheries ecology and the interplay between them. As well as covering 'classical' fisheries science, the book focuses on contemporary issues such as industrial fishing, poverty and conflict in fishing communities, marine reserves, the effects of fishing on coral reefs and by-catches of mammals, seabirds and reptiles. The book is primarily written for students of fisheries science and marine ecology, but should also appeal to practicing fisheries scientists and those interested in conservation and the impacts of humans on the marine environment. particularly useful are the modelling chapters which explain the difficult maths involved in a user-friendly manner describes fisheries exploitation, conservation and management in tropical, temperate and polar environments broad coverage of 'classical' fisheries science emphasis on new approaches to fisheries science and the ecosystem effects of fishing examples based on the latest research and drawn from authors' international experience comprehensively referenced throughout extensively illustrated with photographs and line drawings
