It features: * a detailed discussion of the items involved in evaluating Web information; * checklists tailored to the creation and evaluation of specific Web page types (advocacy, business, informational, news, personal, entertainment); * over 40 screen captures illustrating the principles presented in the book; * discussion of copyright issues and meta tags; and * a glossary of terms and bibliography.

Knitting the Semantic Web Jane Greenberg, Eva Méndez Rodriguez, 2013-04-03 The Semantic Web, extends the popular, day-to-day Web, enabling computers and people to effectively work together by giving information well-defined meaning. *Knitting the Semantic Web* explains the interdisciplinary efforts underway to build a more library-like Web through "semantic knitting." The book examines foundation activities and initiatives leading to standardized semantic metadata. These efforts lead to the Semantic Web—a network able to support computational activities and provide people with services efficiently. Leaders in library and information science, computer science, and information intensive

domains provide insight and inspiration to give readers a greater understanding of the evolution of the Semantic Web. Librarians and information professionals are uniquely qualified to play a major role in the development and maintenance of the Semantic Web. *Knitting the Semantic Web* closely examines this crucial relationship in detail. This single source reviews the foundations, standards, and tools underlying the Semantic Web and presents thoughtful perspectives in the context of 2.0 developments. Many chapters include figures to illustrate concepts and ideas, and the entire text is extensively referenced. Topics in *Knitting the Semantic Web* include: RDF, its expressive power, and its ability to underlie the new Library catalog card for the coming century the value and application for controlled vocabularies SKOS (Simple Knowledge Organization System), the newest Semantic Web language managing scheme versioning in the Semantic Web Physnet portal service for physics Semantic Web technologies in biomedicine developing the United Nations Food and Agriculture ontology Friend Of A Friend (FOAF) vocabulary specification—with a real world case study at a university Web/Library 2.0 and more *Knitting the Semantic Web* is a stimulating resource for professionals, researchers, educators, and students in library and information science, computer science, information architecture, Web design, and Web services.

E-mail, e-marketing, e-commerce, e-business, and e-communities - just a few years ago, having a presence on the Web was considered innovative. Today, a Web presence is not only innovative; it's imperative. With the advent of home banking, package tracking, order entry, order status inquiry, and other customer services, a business without a Web strategy will soon be out of business. Driven by the needs of e-commerce, *Web-to-Host Connectivity* demonstrates how to connect legacy systems and databases to the Web and describes the technologies needed to do it. It provides comprehensive coverage of web-to-host solutions and technologies in addition to security, server, network and system management usage. This book places an emphasis on improving data access and data exchange, no matter where it resides.
