The Independent Inventor's Handbook Louis Foreman,Jill Gilbert Welytok,2018-07-27 How do you actually turn a million-dollar idea into a million dollars? From scribble-on-the-napkin to product-on-the market, The Independent Inventor's Handbook explains everything a potential inventor needs to know and the tools he or she needs to use to take a raw concept and turn it into reality. Written by Louis J. Foreman, creator of the PBS series Everyday Edisons and a holder of multiple patents, together with patent attorney Jill Gilbert Welytok, here's a book that speaks directly to the inventive American—the entrepreneur, the tinkerer, the dreamer, the

basement scientist, the stay-at-home mom who figures out how to do it better. (over one million of them file patents each year.) Here is everything a future inventor needs: Understanding the difference between a good idea and a marketable idea. Why investing too much money at the outset can sink you. The downside of design patents, and how best to file an application for a utility patent. Surveys, online test runs, and other strategies for market research on a tight budget. Plus the effective pitch (hint: never say your target audience is everyone), questions to ask a prospective manufacturer, 14 licensing land mines to avoid, looks-like versus works-like prototypes, Ten Things Not to Tell a Venture Capitalist, and how to protect your invention once it's on the market. Appendices include a glossary of legal, manufacturing, and marketing terms, a sample nondisclosure agreement, and a patent application, deconstructed.

Become an App Inventor: The Official Guide from MIT App Inventor Karen Lang, Selim Tezel, MIT App Inventor Project, MIT Computer Science and Artificial Intelligence Laboratory, 2022-02-22 With a foreword by Gitanjali Rao, Time Magazine's inaugural Kid of the Year, this engaging guide from MIT Press teaches anyone to design and publish their own apps—no experience necessary!—and introduces young app creators from around the world. Have you ever wanted to build your own mobile apps? App Inventor, a free and revolutionary online program from MIT, lets you do just that. With the help of this companion guide chock-full of colorful graphics and easy-to-follow instructions, readers can learn how to create six different apps, including a working piano, a maze game, and even their own chat app to communicate with friends—then use what they've learned to build apps of their own imagination. User-friendly code blocks that snap together allow even beginners to quickly create working apps. Readers will also learn about young inventors already using their own apps to make a difference in their communities, such as the girls from Moldova whose app helps alert residents when local well water is contaminated. Or the boys from Malden, Massachusetts, whose app lets users geotag potholes to alert city hall when repairs are needed. With this inspiring guide, curious young dreamers can become real inventors with real-world impact.

Learn to Program with App Inventor Lyra Logan, 2019-11-26 Learn to build mobile apps for Android devices with MIT App Inventor, a visual drag-and-drop programming language like Scratch. You've swiped and tapped your way through countless apps, but have you ever created one? Now you can, thanks to Learn to Program with App Inventor. In less than an hour, you'll be able to build and run your first app! App Inventor is a free software for making Android apps. All you need is a PC with an Internet connection to build your app, and a mobile phone for testing. You'll use a simple drag-and-drop interface, which minimizes errors and avoids too much typing. A certified App Inventor Master Trainer, Logan breaks down each project into logical steps, lists the components you'll need, and then shows you how to create screen designs, control program flow with conditionals and loops, and store data in variables and lists. Once you've tested the app on your phone, you can test what you learned with challenges at the end of each chapter. You'll build cool apps like: * Hi, World!: Use your voice to send a text message * Practice Makes Perfect: Rehearse a speech or dance routine with this video recording app * Fruit Loot: Catch randomly falling fruit in this exciting game * Beat the Bus: Track a friend's journey using location services and maps * Virtual Shades: Take a selfie, then try on some virtual sunglasses Join the 6 million people who have tried App Inventor, and make the journey from app user to app inventor.

The 5-Second Inventor Kenneth Chuah, 2009-08 Countless great products have failed to show up on the market because the creators, average people with five-second flashes of inspiration, didn't know what to do with their ideas. The 5-Second Inventor gives these people a step-by-step guide through the process that professional developers use to produce and market products, but focuses on self-production. Ken Chuah uses his own experiences to help the beginning inventpreneur (an inventor/entrepreneur) with low-budget strategies, a unique screening test to pinpoint the best manufacturers, and an in-depth chapter on understanding Chinese culture for the outsourcing inventpreneur. The 5-Second Inventor streamlines the process of converting ideas into products, emphasizing self-production rather than licensing deals. A reader will learn to identify his or her idea's potential with market research pinpointing the potential product's target audience. For security during this and the development process, The 5-Second Inventor covers different types of patents, non-disclosure agreements, and other ways to protect intellectual property. For the production phase, it outlines strategies for minimizing the initial startup budget. This includes the pros and cons of overseas manufacturing and information for the inventpreneur who chooses an overseas manufacturing partner. Ken gives advice for working with different types of retail buyers, such as big chain stores or online retailers. The 5-Second Inventor gives guides for publicity, marketing, and methods of selling one's innovative product. Written in layman's terms for people new to the invention industry, The 5-Second Inventor is the perfect guide for beginning inventpreneurs.

App Inventor 2 Graphics, Animation & Charts Edward Mitchell, 2016-04-15 MIT App Inventor is the fast and simple way to develop Android apps. Using a programming system that runs in your Internet browser, just drag and drop user interface components and link together program functions on screen, and then run your app directly on your Android phone or tablet. Learn to create apps using simplified interactive image sprites and to control movement using a finger on the screen or by tilting the phone or tablet. Learn how to use the Canvas features for drawing, including a unique way to implement traditional animation features. Includes numerous sample apps, detailed explanations, illustrations, app source code downloads and video tutorials.
