Pro SharePoint 2003 Development Techniques Margriet Bruggeman,2007-03-01 SharePoint is obviously a hot technology. But the last year in development technology has seen such major releases as Ajax, ASP.NET 2.0, SQL Server 2005, and more. These technologies combined have an audience too wide to estimate. However, SharePoint 2003 was built before these new techniques and methodologies were ready for public consumption. And while the newer versions of SharePoint support development using these new techniques, the installed base of SharePoint 2003 is still growing, and migration to SharePoint 2007 is still at least 18 months off. Therefore, developers are hungry to webify their existing SharePoint sites and applications. This book is the intersection between contemporary development techniques and SharePoint application development.

Governance of Radioactive Waste, Special Waste and Carbon Storage Thomas Flüeler,2023-04-05 This book demonstrates that the long-term safety of nuclear waste repositories, special waste disposal and carbon storage (CCS) is highly challenging and monitoring may contribute to

substantiate evidence, support decision making and legitimise the programme. Deep geological disposal is a long-term safety issue and, in parallel, requires long-term institutional involvement of the technoscientific community, waste producers, public administrators, NGOs and the public. What, where and when to monitor is determined by its goal setting: It may be operational, confirmatory (in the near field) or environmental (far field). Strategic monitoring as proposed here contributes to process, implementation or policy and institutional surveillance. It not only addresses the controversial long-lasting "problem" (of nuclear, other toxic or CO2 waste) but investigates some ways to approach for "solutions" or solution spaces – not just technical but also institutional, societal and personal. It includes the tailored transfer of knowledge, concept and system understanding, experience and documentation to specific audiences above. It is an integrative tool of targeted yet adaptive management and may be applicable to other long-term sociotechnical fields.
