**Mobile Narratives** Eleftheria Arapoglou,Mónika Fodor,Jopi Nyman,2013-08-15 Emphasizing the role of travel and migration in the performance and transformation of identity, this volume addresses representations of travel, mobility, and migration in 19th-21st-century travel writing, literature, and media texts. In so doing, the book analyses the role of the various cultural, ethnic, gender, and national encounters pertinent to narratives of travel and migration in transforming and problematizing the identities of both the travelers and travelees enacting in the borderzones between cultures. While the individual essays by scholars from a wide range of countries deal with a variety of case studies from various historical, spatial, and cultural locations, they share a strong central interest in the ways in which the narratives of travel contribute to the imagining of ethnic encounters and how they have acted as sites of transformation and transculturation from the early nineteenth century to the present day. In addition to discussing textual representations of travel and migration, the volume also addresses the ways in which cultural texts themselves travel and are reconstructed in various cultural settings. The analyses are particularly attentive to the issues of globalization and migration, which provide a general frame for interpretation. What distinguishes the volume from existing books is its concern with travel and migration as ways of forging transcultural identities that are able to subvert existing categorizations and binary models of identity formation. In so doing, it pays particular attention to the performance of identity in various spaces of cultural encounter, ranging from North America to the East of Europe, putting particular emphasis on the representation of intercultural and ethnic encounters.

**Dark Nature** Richard Schneider,2016-10-04 In *The Ecological Thought*, eco-philosopher Timothy Morton has argued for the inclusion of "dark ecology" in our thinking about nature. Dark ecology, he argues, puts hesitation, uncertainty, irony, and thoughtfulness back into ecological thinking." The ecological thought, he says, should include "negativity and irony, ugliness and horror." Focusing on this concept of "dark ecology" and its invitation to add an anti-pastoral perspective to ecocriticism, this collection of essays on American literature and culture offers examples of how a vision of nature's darker side can create a fuller understanding of humanity's relation to nature. Included are essays on canonical American literature, on new voices in American literature, and on non-print American media. This is the

first collection of essays applying the “dark ecology” principle to American literature.

**Say What You Really Mean!** Debra Johanyak, 2014-11-06 Most of us claim to value honesty and openness in communication, but we often settle for insincerity and ambiguity. We valiantly try to say what we mean, all the while using words, attitudes, and expressions that sabotage the real message. Results can be frustrating, or even devastating. A recent workplace report claims that 25% of the business sector experience communication problems on the job. The actual percentage is probably much higher. Most large companies recruiting and hiring employees are looking for effective communication as one of the top three skills, in addition to being a team player and having job expertise. Knowing what to say, as well as how and when to say it, are critical factors in communicating about important issues. Finding the courage to give an honest response can give you a bad case of nerves or insomnia. Yet, keeping quiet or minimizing a message can be potentially problematic. In romantic relationships, avoiding sensitive topics may seem like the right thing to do. But chances are women are lighting the fuse to a cache of fireworks that's bound to explode sooner or later, ruining any chance of a truly meaningful relationship. Frank and focused discussion can build positive interactions and mutually respectful relationships. Say What You Really Mean! How Women Can Learn to Speak Up offers hope for improving personal and professional communication for those who struggle to find the right words: Why being direct is respectful, not rude How silence plays a key role when used appropriately Knowing when to listen and when to speak up Bridging gender differences Using a message plan to get results Saying “no” without causing friction This book has grown out of years of research, observation, and practice of effective communication in college teaching, and from consulting and training in the business world. The author's articles and workshops have helped people learn how to become more articulate and enjoy satisfying relationships based on meaningful conversations. The book features: Anecdotes and observations from real-life situations Statistics on communication problems in personal and professional relationships Case histories from actual companies (names changed) Tips from employers, employees, parents, and spouses who rely on clear communication for occupational and relational needs Inspirational quotes Self-quizzes

**Encyclopedia of Criminology** J. Mitchell Miller, Richard A. Wright, 2013-12-17 This three-volume work offers a comprehensive review of the pivotal concepts, measures, theories, and practices that comprise criminology and criminal justice. No longer just a subtopic of sociology, criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology, political science, behavioral science, law, economics, public health, family studies, social work, and many others. The three-volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single, authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive, international resource. The pivotal concepts, measures, theories, and practices of the field are addressed with an emphasis on comparative criminology and criminal justice. While the primary focus of the work is on American criminology and contemporary criminal justice in the United States, extensive global coverage of other nations' justice systems is included, and the increasing international nature of crime is explored thoroughly. Providing the most up-to-date scholarship in addition to the traditional theories on criminology, the Encyclopedia of Criminology is the essential one-stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field.

**Comics and the U.S. South** Brannon Costello, Qiana J. Whitted, 2012-01-20 Comics and the U.S. South offers a wide-ranging and long overdue assessment of how life and culture in the United States South is represented in serial comics, graphic novels, newspaper comic strips, and webcomics. Diverting the lens of comics studies from the skyscrapers of Superman's Metropolis or Chris Ware's Chicago to the swamps, back roads, small towns, and cities of the U.S. South, this collection critically examines the pulp genres associated with mainstream comic books alongside independent and alternative comics. Some essays seek to discover what Captain America can reveal about southern regionalism and how slave narratives can help us reread Swamp Thing; others examine how creators such as Walt Kelly (Pogo), Howard Cruse (Stuck Rubber Baby), Kyle Baker (Nat Turner), and Josh Neufeld (A.D.: New Orleans after the Deluge) draw upon the unique formal properties of the comics to question and revise familiar narratives of race, class, and sexuality; and another considers how southern writer Randall Kenan adapted elements of comics form to prose fiction. With essays from an interdisciplinary group of scholars, Comics and the U.S. South contributes to and also productively reorients the most significant and compelling conversations in both comics scholarship and in southern studies.
