Barry Sautman, Hairong Yan

Hardened Images Asgede Hagos, 2000-01-01 Examines the nature of the interplay between the U.S. press and the American state on Africa, with a special focus on its armed struggles waged to complete the decolonization process.

Trade Profiles 2006 World Trade Organization, 2006 This booklet is a quick source for national and trade statistics of WTO members and countries which are in the process of negotiating WTO membership. These Trade Profiles combine information on trade flows and trade policy measures of members, observers and other selected economies. The indicators are divided into five categories: (1) Basic economic indicators - population, GDP, current account balance, etc.; (2) Trade policy indicators - specific WTO relevant information, including tariff binding information, import duties collected in total tax revenue, the number of dispute rulings, notifications outstanding and contingency measures in force; (3) Merchandise trade indicators (customs-based statistics) - information on total trade flows broken down by broad product categories and major origins and destinations; (4) Commercial services indicators (balance of payments based statistics) - trends in total trade flows and a breakdown by major components; (5) Industrial property indicators - annual number of patents granted and marks registered in the name of residents and non-residents in the economy.

The Rise of the Global South Justin Dargin, 2013 This book provides a broad and in-depth introduction to the geopolitical, economic and trade changes wrought with the increasing influence of the countries of the Global South in international affairs. The global role of the developing countries came to the forefront in 1974, when the United Nations General Assembly promulgated The New International Economic Order. Since then, the countries of the Global South, particularly China, India, Brazil, Saudi Arabia, South Africa and Qatar, made an indelible impact upon the world's economic architecture. However, their true influence became starkly illustrated during the onset of the 2000s, when several seismic events occurred. The September Eleventh terrorist attacks with the resultant debilitating wars in Iraq and Afghanistan extreme world commodity price increases and the global financial crisis of 2007 2008 all served to wrench the epicenter of global influence increasingly southward. While the developed countries of the Global North became mired in economic stagnation with problems associated with the global financial crisis, their collective influence waned. Since then, the world has been attempting to accommodate, somewhat unevenly, the rising geopolitical and economic clout of the Global South. This book presents a collection of scholarly articles that, taken together, functions as a primer on the workings of the immense global changes at the beginning of the twenty-first century.
