Intellectual Property Law in Cyprus Christos Achilles Theodoulou, 2022-09-20
Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph provides a survey and analysis of the rules concerning intellectual property rights in Cyprus. It covers every type of intellectual property right in depth – copyright and neighbouring rights, patents, utility models, trademarks, trade names, industrial designs, plant variety protection, chip protection, trade secrets, and confidential information. Particular attention is paid throughout to recent developments and trends. The analysis approaches each right in terms of its sources in law and in legislation, and proceeds to such legal issues as subject matter of protection, conditions of protection, ownership, transfer of rights, licences, scope of exclusive rights, limitations, exemptions, duration of protection, infringement, available remedies, and overlapping with other intellectual property rights. The book provides a clear overview of intellectual property legislation and policy, and at the same time offers practical guidance on which sound preliminary decisions may be based. Lawyers representing parties with interests in Cyprus will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative intellectual property law.

District of Columbia Appropriations for Fiscal Year 1978 United States. Congress. Senate. Committee on Appropriations. Subcommittee on District of Columbia, 1977

Balancing Copyright - A Survey of National Approaches Reto Hilty, Sylvie Nérison, 2012-06-15 How does copyright law take into account the interests of third parties, especially the general public's interest in the greatest possible dissemination of knowledge and culture? Twelve basic questions give copyright law experts from more than forty countries the opportunity to provide answers related to their national law on the following matters: categories of works and subject matter, eligibility conditions, duration, "users' rights," the three-step test, misuse, differentiations between categories of right holders, TPM, and relations of copyright law to other legal areas such as fundamental rights, competition law, consumer protection law, media law etc. The standardized form of the reports makes it easy to see the impacts of copyright law in the industrialized countries as well as in emerging economies; in common-law and civil-law approaches; in countries of the Andean Community and of the European Union, as well as in countries that are not party to the WIPO Treaties. A detailed preliminary chapter provides an approachable overview of issues and results. This chapter also discusses the voice of academia, represented by the European Copyright Code of the "Wittem Group."

Free and Open Source Software (FOSS) and other Alternative License Models

Axel Metzger, 2015-11-30 This book discusses the main legal questions raised by free and open source software (FOSS) licenses and other alternative license models, such as Creative Commons. The legal questions raised by FOSS and other alternative licenses have been the subject of an intense international debate among legal scholars and practising lawyers in the last years. Courts in different jurisdictions have confirmed that the core features of FOSS licenses are compliant with the respective applicable laws and thus enforceable in the respective jurisdictions. What is still missing so far is an in-depth comparative analysis of the legal issues raised by FOSS, Creative Commons and other alternative license on a worldwide scale. This book presents a general report on FOSS licenses and alternative license models to establish common ground and enable comparison between jurisdictions. The general report is followed by 24 national reports covering the world's most important IT-markets. General and national reports use the same structure to facilitate the comparison. The book shows that despite the differences in their origins, all FOSS projects use detailed licenses for the organisation of their communities. It also shows the differences in the proofing of these licenses by courts in some jurisdictions and the tailor-made provisions established by some legislators to solve the legal issues raised by the license model.
