Complex Spreading Phenomena in Social Systems Sune Lehmann,Yong-Yeol Ahn,2018-06-21 This text is about spreading of information and influence in complex networks. Although previously considered similar and modeled in parallel approaches, there is now experimental evidence that epidemic and social spreading work in subtly different ways. While previously explored through modeling, there is currently an explosion of work on revealing the mechanisms underlying complex contagion based on big data and data-driven approaches. This volume consists of four parts. Part 1 is an Introduction, providing an accessible summary of the state of the art. Part 2 provides an overview of the central theoretical developments in the field. Part 3 describes the empirical work on observing spreading processes in real-world networks. Finally, Part 4 goes into detail with recent and exciting new developments: dedicated studies designed to measure specific aspects of the spreading processes, often using randomized control trials to isolate the network effect from confounders, such as homophily. Each contribution is authored by leading experts in the field. This volume, though based on technical selections of the most important results on complex spreading, remains quite accessible to the newly interested. The main benefit to the reader is that the topics are carefully structured to take the novice to the level of expert on the topic of social spreading processes. This book will be of great importance to a wide field: from researchers in physics, computer science, and sociology to professionals in public policy and public health.

Principles of Vibration Benson H. Tongue,1996 Benson Tongue takes a refreshingly informal approach to the understanding and analysis of vibrations. He strikes the right balance between detail

and accessibility, offering in-depth analysis and a friendly writing style. Beginning with classical subjects, e.g., single degree of freedom systems, the text moves into more modern material, emphasizing multiple degree of freedom systems. Numerous problems challenge students to think and analyze outcomes of various techniques employed. Additional modal analysis and linear algebra are incorporated to solve problems, utilizing but not requiring MATLAB. Another innovative feature of the text is a chapter devoted to Seat of the Pants Engineering, which brings together some of the common approaches engineers use to get a quick answer or to verify an analysis. At the same time, he applies them to all the systems that have been discussed in earlier chapters. Principles of Vibration is an ideal text for upper-level undergraduate and graduate students in mechanical, civil, and aeronautical engineering departments.

Investing Cash Transfers to Raise Long Term Living Standards Paul Gertler, Sebastián Martínez, Marta Rubio-Codina, 2006 The authors test whether poor households use cash transfers to invest in income generating activities that they otherwise would not have been able to do. Using data from a controlled randomized experiment, they find that transfers from the Oportunidades program to households in rural Mexico resulted in increased investment in micro-enterprise and agricultural activities. For each peso transferred, beneficiary households used 88 cents to purchase consumption goods and services, and invested the rest. The investments improved the household's ability to generate income with an estimated rate of return of 17.55 percent, suggesting that these households were both liquidity and credit constrained. By investing transfers to raise income, beneficiary households were able to increase their consumption by 34 percent after five and a half years in the program. The results suggest that cash transfers to the poor may raise long-term living standards, which are maintained after program benefits end. --World Bank web site.

In Celebration Karen Hearn, Robert Upstone, Giles Waterfield, Tate Gallery, 1998 Five centuries of private collecting are represented in this publication of some of the finest art treasures preserved in Britain's historic houses. In addition to paintings by Canaletto, Van Dyck, Claude Lorrain, Gainsborough, Stubbs, Augustus John, and Lucian Freud, more unusual works include a death mask of Napoleon, a life mask of Charles I by Bernini, and a bracelet inset with portrait miniatures of Queen Victoria's children. Over 90 objects and paintings are presented from over 50 houses, including

Blenheim Palace, Castle Howard, Chatsworth, Harewood House, and Longleat.

Ace Times Mick Duckworth,2011-03-01 This book by Mick Duckworth, centres on the definitive history of London's Ace Cafe, the roadside pull-in that became the most famous haunt of motorcycle riding Ton-up kids in the Fifties and Rockers in the Sixties. The book also tells the story of other lively bikers haunts of the past, like the 59 Club, the Busy Bee and other cafes around the country.A substantial high-quality volume packed with personal recollections and evocative photos, Ace Times also looks at the fastest motorcycles, the loudest music, the iconic movies and the distinctive clothing of the cafe-racing era. Burn-ups, press hysteria, rock'n'roll riots, police-baiting, Mods and Rockers, pirate radio and loads more besides are all portrayed in a true-to-life, unembroidered way.

Fatigue Handbook A. Almar-Naess,1985 Soon after oil and gas exploration and production began in the North Sea in the 1960s, it became apparent that the steel structure design developed for offshore activities in the Gulf of Mexico was not adequate when transferred to the rigorous North Sea environment. Realizing the great need for a better understanding of the fatigue phenomenon, concerned materials scientists at SINTEF and Det norske Veritas prepared a five-year programme for

intensified research on fatigue of offshore steel structures. It became the National Five Year Programme for Fatigue of Offshore Steel Structures in 1981. This text comprises a study of fatigue in offshore steel structures. It seeks to make results in the area available in a form that can be utilized and understood by those responsible for the different stages in engineering, design, fabrication and service of offshore structures.
