The Compensation Solution John E. Tropman, 2002-02-28 Money isn't everything to today's employees. This book shows companies how to combine traditional compensation with the educational, emotional, and psychological benefits that will attract the best and brightest. It identifies the ten elements--including learning, advancement, emotional rewards, and quality of life--that job seekers rank highest among desired benefits. Then it shows employers how to combine them with monetary benefits to create effective, employee-driven compensation packages.

Knick Knack Paddy Whack Ardal O'Hanlon, 2015-04-14 A surprise best-seller in Britain, this outrageous, weirdly funny first novel will appeal to fans of Paddy Clark Ha Ha Ha. Not since Holden Caulfield in *The Catcher in the Rye* has literature seen a young man with as much contempt for hypocrisy and phoniness as Patrick Scully, the narrator of this brilliantly observed tale of a nineteen-year-old's frustrations and dreams. Stuck in a dead-end job in Dublin, while his friends pursue useless degrees at the university, Patrick escapes for a week to his hometown of Killeeny, a few hours' bus ride from Dublin. There he hooks up with his childhood chum, Balls O'Reilly, and his on-again, off-again girlfriend, Francesca, who, as we learn in chapters from her diary, is more interested in Balls than she'd want anyone, especially Patrick, to know. What follows is a rollicking week of carousing, drinking, and depravity, all seen through Patrick's searing and unforgiving eyes. Laced with hilarious small-town insight, this gripping first novel builds to a shocking climax as Patrick's insight into the duplicity of his so-called friends becomes more than he can bear.

Power and Time Dan Edelstein, Stefanos Geroulanos, Natasha Wheatley, 2021-01-01 Time is the backdrop of historical inquiry, yet it is much more than a featureless setting for events. Different temporalities interact dynamically; sometimes they coexist tensely, sometimes they clash violently. In this innovative volume, editors Dan Edelstein, Stefanos Geroulanos, and Natasha Wheatley challenge how we interpret history by focusing on the nexus of two concepts—"power" and "time"—as they manifest in a wide variety of case studies. Analyzing history, culture, politics, technology, law, art, and science, this engaging book shows how power is constituted through the shaping

of temporal regimes in historically specific ways. Power and Time includes seventeen essays on human rights; sovereignty; Islamic, European, Chinese, and Indian history; slavery; capitalism; revolution; the Supreme Court; the Anthropocene; and even the Manson Family. Power and Time will be an agenda-setting volume, highlighting the work of some of the world's most respected and original contemporary historians and posing fundamental questions for the craft of history.

Oliver Heaviside Paul J. Nahin,2002-11-13 Acclaimed biography of the pioneer of modern electrical theory featuring a new preface by author. He was a man who often was incapable of conducting himself properly in the most elementary social interactions. His only continuing contacts with women were limited to his mother, nieces, and housekeepers. He was a man who knew the power of money and desired it, but refused to work for it, preferring to live off the sweat of his family and long-suffering friends, whom he often insulted even as they paid his bills.—Excerpt from the book This, then, was Oliver Heaviside, a pioneer of modern electrical theory. Born into a low social class of Victorian England, Heaviside made advances in mathematics by introducing the operational calculus; in physics, where he formulated the modern-day expressions of Maxwell's Laws of electromagnetism; and in electrical engineering, through his duplex equations. With a new preface by the author, this acclaimed biography will appeal to historians of technology and science, as well as to scientists and engineers who wish to learn more about this remarkable man.

Interior Structure of the Earth and Planets Vladimir Naumovich Zharkov,1986 This text provides a solid introduction to advanced geophysics. Part I focuses on the interior structure of the earth, featuring a large section on plate tectonics and discussing such problems as the source mechanisms of earthquakes, tides, the rheology of the crust and mantle and the evolution of the lunar orbit. Part II focuses on the interior structure of the moon, the giant planets and the structure of the Galilean satellites of Jupiter and Titan and the icy satellites of Saturn.

Mobile Computing Solutions for Healthcare Systems Sivakumar R.,2023-02-28 This book focuses on recent developments in integrating AI, machine learning methods, medical image processing, advanced network security, and advanced antenna design techniques to implement practical Mobile Health (M-Health) systems. The editors bring together researchers and practitioners who address several developments in the field of M-Health. Chapters highlight intelligent healthcare IoT and Machine Learning based systems for personalized healthcare delivery and remote monitoring applications. The contents also explain medical applications of computing technologies such as Wireless Body Area Networks (WBANs), wearable sensors, multi-factor authentication, and cloud computing. The book is intended as a handy resource for undergraduate and graduate biomedical engineering students and mobile technology researchers who want to know about the recent trends in mobile health technology.

Modernity Britain David Kynaston,2014-12-02 The late 1950s and early 1960s was a period in its own right—neither the stultifying early to midfifties nor the liberating mid- to late-sixties—and an action-packed, dramatic time in which the contours of modern Britain started to take shape. These were the “never had it so good” years, in which mass affluence began to change, fundamentally, the tastes and even the character of the working class; when films like *Saturday Night and Sunday Morning* and TV soaps like *Coronation Street* and *Z Cars* at last brought that class to the center of the national frame; when Britain gave up its empire; when economic decline relative to France and Germany became the staple of political discourse; when “youth” emerged as a fully fledged cultural force; when the Notting Hill riots made race and immigration an inescapable reality; when a new breed of meritocrats came through; and when the Lady Chatterley trial, followed by the Profumo scandal, at last signaled the end of Victorian morality. David Kynaston argues that a deep and irresistible modernity zeitgeist was at work, in these and many other ways, and he reveals as never before how that spirit of the age unfolded, with consequences that still affect us today.
