A Decade of the Berkeley Math Circle Zvezdelina Stankova,Tom Rike,2008-11-26 Many mathematicians have been drawn to mathematics through their experience with math circles: extracurricular programs exposing teenage students to advanced mathematical topics and a myriad of problem solving techniques and inspiring in them a lifelong love for mathematics. Founded in 1998, the Berkeley Math Circle (BMC) is a pioneering model of a U.S. math circle, aspiring to prepare our best young minds for their future roles as mathematics leaders. Over the last decade, 50 instructors--from university professors to high school teachers to business tycoons--have shared their passion for mathematics by delivering more than 320 BMC sessions full of mathematical challenges and wonders. Based on a dozen of these sessions, this book encompasses a wide variety of enticing mathematical topics: from inversion in the plane to circle geometry; from combinatorics to Rubik's cube and abstract algebra; from number theory to mass point theory; from complex numbers to game theory via invariants and monovariants. The treatments of these subjects encompass every significant method of proof and emphasize ways of thinking and reasoning via 100 problem solving techniques. Also featured are 300 problems, ranging from beginner to intermediate level, with occasional peaks of advanced problems and even some open questions. The book presents possible paths to studying mathematics and inevitably falling in love with it, via teaching two important skills: thinking creatively while still ``obeying the rules," and making connections between problems, ideas, and theories. The book encourages you to apply the newly acquired knowledge to problems and guides you along the way, but rarely gives you ready answers. ``Learning from our own mistakes" often occurs through discussions of non-proofs and common problem solving pitfalls. The reader has to commit to mastering the new theories and techniques by ``getting your hands dirty" with the problems, going back and reviewing necessary problem solving techniques and theory, and persistently moving forward in the book. The mathematical world is huge: you'll never know everything, but you'll learn where to find things, how to connect and use them. The rewards will be substantial. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession.

Put Your Money Where Your House Is Lisa Solomon, Fred Solomon, Jr.,2008-09

The Red Circle Brandon Webb,John David Mann,2012-04-10 Explosive, revealing, and intelligent, *The Red Circle* provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world. Now including an excerpt from *The Killing School: Inside the World's Deadliest Sniper Program BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS... HE HAD TO BECOME ONE HIMSELF*. Brandon Webb's experiences in the world's most elite sniper corps are the stuff of legend. From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan, *The Red Circle* provides a rare and riveting look at the inner workings of the U.S. military through the eyes of a covert operations specialist. Yet it is Webb's

distinguished second career as a lead instructor for the shadowy sniper cell and Course Manager of the Navy SEAL Sniper Program that trained some of America's finest and deadliest warriors-including Marcus Luttrell and Chris Kyle-that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to become the U.S. military's top marksman, with more than 150 confirmed kills. From a candid chronicle of his student days, going through the sniper course himself, to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness, to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century, Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military.

Amazonian Spanish Stephen Fafulas, 2020-07-15 Amazonian Spanish: Language contact and evolution explores the unique origins, linguistic features, and geo-political situation of the Spanish that has emerged in the Amazon. While this region boasts much linguistic diversity, many of the indigenous languages found within its limits are now being replaced by Spanish. This situation of language expansion, contact, and bilingualism is reshaping the sociolinguistic landscape of the Amazon by creating a number of Spanish varieties with innovative linguistic features that require closer scholarly attention. The current book documents this situation in detail. The chapters in this volume include work on distinct geographical regions of the Amazon, with primary data collected using different methodologies and language contact situations. The scholars in this volume specialize in an array of fields, including anthropological linguistics, bilingualism, language contact, dialectology, and language acquisition. Their work represents both formal and functional approaches to linguistics.

A Light Affliction: a History of Film Preservation and Restoration Michael Binder, 2015-11-27 A history of film preservation and restoration, telling the story from the earliest days of the cinema to the modern days of digital restorations. The cinema was invented in the Victorian era, but for the first four decades of its existence almost no effort was made to preserve the millions of feet of celluloid which rolled through the cameras and projectors of the world. As a result, thousands of movies were lost forever. In the 1930s, the first concerted attempts at film preservation were begun by pioneering individuals such as Iris Barry at New York's Museum of Modern Art; Ernest Lindgren at the British Film Institute, and the indomitable Henri Langlois at the Cinémathèque française, a man who performed heroics in occupied France to save the world's cinematic heritage from destruction by the Nazis. The 1980s video boom encouraged the studios finally to instigate asset protection programmes and in the digital age new methods of producing, exhibiting and restoring motion pictures emerged.

Teacher Education in Globalised Times Jillian Fox, Colette Alexander, Tania Aspland, 2020-05-12 This book provides commentary on the influence of multi-layered political contexts that surround the work of teacher educators worldwide. It addresses the drawbacks of the massification, standards-based movements and marketisation of universal business that threaten authenticity, innovation and entrepreneurship within teacher education on a global scale. The chapters celebrate the richly described local stories that explore the often tacit political activity that underpins teacher educators' work. The book highlights the commitment of both teachers and teacher educators to social justice, and human rights and critical consciousness as central to the process of teacher development. Teacher formation, teacher education policies and curriculum development in an era of globalisation, super-diversity and the positioning of Indigenous populations, and national regulation and localisation are topics that are explored in this book.

People-Centered Approaches Toward the Internationalization of Higher Education Malfatti, Gabrielle, 2020-08-14 Traditionally, internationalization efforts in higher education have been rooted in (neo)liberal transactional models that restrict or compromise the space for meaningful exchanges of socio-cultural capital. Recently, researchers and practitioners

in the international education field have taken issue with programming and practices in education abroad; international student recruitment; and internationalization of the curricula that perpetuate systems of imbalance, fossilize prejudices, adversely impact host communities abroad, and limit student learning to the confines of the Western epistemological traditions. As a result, scholars and practitioners are creating new paradigms for engagement and exchange. *People-Centered Approaches Toward the Internationalization of Higher Education* is an essential scholarly publication that examines the praxis of internationalization in higher education with empirical research and relevant models of practice that approach the topic critically and responsibly. The book innovates and (re)humanizes internationalization efforts, including education abroad, international recruitment, international scholar and student services, and internationalization of curriculum, by focusing on the people and communities touched, intentionally and unintentionally, by said efforts. It is ideal for higher education faculty, education professionals, academic advisors, academicians, administrators, curriculum designers, researchers, and students.
