**Daniel Kotz,Jochen Cals**

**How to Practice Academic Medicine and Publish from Developing Countries?** Samiran Nundy,Atul Kakar,Zulfiqar A. Bhutta,2021-10-23 This is an open access book. The book provides an overview of the state of research in developing countries – Africa, Latin America, and Asia (especially India) and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle-income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research ethics, and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.

*Scientific writing and publishing in medicine and health sciences* Daniel Kotz,Jochen Cals,2021-04-19 Writing and publishing scientific papers is the core business of every researcher, but is often experienced as difficult and frustrating. Good scientific content of a paper alone does not guarantee its publication in a good journal, because various aspects affect the writing and publishing process. This book is a quick guide into effective writing and publishing papers. It provides authors with clear and concise key information on 12 major parts of the process, from how to get started to dealing with reviewers' comments. We describe each part succinct and easy-to-read, structured into background information (''What you should know''), concrete advice (''What you should do''), and a checklist of the main points to consider. Authors can read the book as a whole but can also use it as a reference book to look-up advice for a particular part while writing. With the information from this book authors from the medical and health sciences increase their joy in writing papers and their effectiveness in getting them published in good journals.
