The Mirage Matt Ruff,2012-02-07 A mind-bending novel in which an alternate history of 9/11 and its aftermath uncovers startling truths about America and the Middle East 11/9/2001: Christian fundamentalists hijack four jetliners. They fly two into the Tigris & Euphrates World Trade Towers in Baghdad, and a third into the Arab Defense Ministry in Riyadh. The fourth plane, believed to be bound for Mecca, is brought down by its passengers. The United Arab States declares a War on Terror. Arabian and Persian troops invade the Eastern Seaboard and establish a Green Zone in Washington, D.C. . . . Summer, 2009: Arab Homeland Security agent Mustafa al Baghdadi interrogates a captured suicide bomber. The prisoner claims that the world they are living in is a mirage—in the real world, America is a superpower, and the Arab states are just a collection of backward third-world countries. A search of the bomber's apartment turns up a copy of The New York Times, dated September 12, 2001, that appears to support his claim. Other captured terrorists have been telling the same story. The president wants answers, but Mustafa soon discovers he's not the only interested party. The gangster Saddam Hussein is conducting his own investigation. And the head of the Senate Intelligence Committee—a war hero named Osama bin Laden—will stop at nothing to hide the truth. As Mustafa and his colleagues venture deeper into the unsettling world of terrorism, politics, and espionage, they are confronted with questions without any rational answers, and the terrifying possibility that their world is not what it seems. Acclaimed novelist Matt Ruff has created a shadow world that is eerily recognizable but, at the same time, almost unimaginable. Gripping, subversive, and unexpectedly moving, *The Mirage* probes our deepest convictions and most arresting fears.

Operation Thunderclap and the Black March Richard Allison,2014-10-29 This unique dual biography chronicles the WWII experiences of two US airmen, one of whom was captured by Nazis, while the other bombed Germany. In February 1945, the Allies launched Operation Thunderclap, a series of maximum efforts against cities in eastern Germany. These deep-penetration raids would tax the bomber crews immensely, as well as bring new devastation to cities yet untouched by US airpower. Meanwhile, the Nazis attempted to move all their prisoners beyond the reach of the Soviet Army's advancing spearheads, forcing thousands of Allied POWs on a five-hundred-mile, three-month trek that would come to be known as the Black March. Two B-17 crew members, a copilot and gunner, trained together in Gulfport, MS, and, in Fall 1944, were assigned to the longest-serving and most decorated US bomb group in England. However, their paths then diverged. The copilot flew thirty-one missions until the war's end; the gunner was shot down and captured on his very first combat mission. These crew members both lived—one through Thunderclap and one through the Black March—and this is their story: an account of both constant air combat and travail on the ground. The copilot participated in the bombing of Dresden, where he witnessed a city already too far destroyed to expend additional bombs. The gunner survived the March, and once time was up for Germany, experienced a period in Soviet captivity. This unique book on the Allied air campaign offers new insights into what our fliers truly saw and experienced during the war.

Informed Consent in Predictive Genetic Testing Jessica Minor,2015-06-15 This important book proposes revising the current informed consent protocol for predictive genetic testing to reflect the trend toward patient-centered medicine. Emphasizing the predictive aspect of testing, the author analyzes the state of informed consent procedure in terms of three components: comprehension of risk assessment, disclosure to select appropriate treatment, and voluntariness. The book's revised model revisits these cornerstones, restructuring the consent process to allow for expanded comprehension time, enhanced patient safety, greater patient involvement and autonomy, and reduced chance of coercion by family or others. A comparison of the current and revised versions and case studies showing the new model in real-world applications add extra usefulness to this resource. Included in the coverage: The science behind PGT. Understanding genetic risks and probability. The history of informed consent. Revised model of informed consent: comprehension, disclosure, voluntariness, patient safety. Applications of the model in DTC and pleiotropic genetic testing. Implementation of the revised model, and assessing its effectiveness. A milestone in the bioethics literature, *Informed Consent in Predictive Genetic Testing* will be of considerable interest to genetic counselors, medical and bioethicists, and public health professionals.

The Lightning Stones Jack Du Brul,2016-07-26 Geologist and adventurer Philip Mercer is visiting an old friend who's working far down in Minnesota's Leister Deep Mine—but he arrives too late to save Abe Jacobs and his climate-research team from a shocking, brutal attack. Mercer vows to seek revenge as well as answers, hoping to pick up Jacobs's search for a cache of the rare crystals known as lightning stones—rumored to have been aboard Amelia Earhart's plane when it vanished in 1937. From a harrowing close call in the Midwestern U.S. to a nailbiting showdown in the rugged mountains of Afghanistan, to a remote island in the middle of the Pacific, Mercer must race to stay ahead of a team of highly-trained assassins—and to figure out if he's chasing a rare scientific discovery, or merely a historical fairy tale.

Last of the Breed Louis L'Amour,2005-03-29 "For sheer adventure L'Amour is in top form."—Kirkus Reviews Here is the kind of authentically detailed epic novel that has become Louis L'Amour's hallmark. It is the compelling story of U.S. Air Force Major Joe Mack, a man born out of time. When his experimental aircraft is forced down in Russia and he escapes a Soviet prison camp, he must call upon the ancient skills of his Indian forebears to survive the vast Siberian wilderness. Only one route lies open to Mack: the path of his ancestors, overland to the Bering Strait and across the sea to America. But in pursuit is a legendary tracker, the Yakut native Alekhin, who knows every square foot of the icy frontier—and who knows that to trap his quarry he must think like a Sioux.
