Earth Observation for Water Resources Management Luis García, Diego Rodríguez, Marcus Wijnen, Inge Pakulski, 2016-04-14 Water systems are building blocks for poverty alleviation, shared growth, sustainable development, and green growth strategies. They require data from in-situ observation networks. Budgetary and other constraints have taken a toll on their operation and there are many regions in the world where the data are scarce or unreliable. Increasingly, remote sensing satellite-based earth observation is becoming an alternative. This book briefly describes some key global water challenges, perspectives for remote sensing approaches, and their importance for water resources-related activities. It describes eight key types of water resources management variables, a list of sensors that can produce such information, and a description of existing data products with examples. Earth Observation for Water Resources Management provides a series of practical guidelines that can be used by project leaders to decide whether remote sensing may be useful for the problem at hand and suitable data sources to consider if so. The book concludes with a review of the literature on reliability statistics of remote-sensed estimations.

Learning to Change Léon de Caluwe, Hans Vermaak, 2002-08-01 A good balance between theory and practice . . . it definitely fills a void in the [lack of] texts in the area and the change literature in general . . . a good fit for my graduate class on 'Managing Organizational Change.' —Anthony F. Buono, McCallum Graduate School of Business, Bentley College Like Gareth Morgan's Images of Organization, this book is a superb blend of theory and practicality. It demystifies chaos and paradox, and it encourages the understanding of organizational dynamics from multiple perspectives. It is refreshing to read a book that presents diverse theories and interventions so even-handedly. —Andrea Markowitz, Ph.D., President, OB&D, Inc. Learning to Change: A Guide for Organizational Change Agents provides a comprehensive overview of organizational change theories and practices developed by both U.S. and European change theorists. The authors compare and contrast five fundamentally different ways of thinking about change: yellow print thinking, blue print thinking, red print thinking, green print thinking and white print thinking. They also discuss in detail the steps change agents take, such as diagnosis, change strategy, the intervention plan, and interventions. In addition, they explore the attributes of a successful change agent and provide advice for career and professional development. The book includes case studies that describe multiple approaches to organizational change issues. This book will appeal to both the practitioner and academic audiences. It can be used as a text in graduate courses in change management and will also be a useful reference for consultants and managers. Features: Discusses the abilities, attitudes, and styles of successful change agents Describes five fundamentally different ways of thinking about change Presents a state-of-the-art overview of change management insights, methods, and instruments Summarizes an extensive amount of organizational change literature Supplies readers with useful insights and courses of action that will allow them to design and implement change professionally Learning to Change became a bestseller upon its initial publication in the Netherlands. The color-model on change is very popular among thousands of managers and change consultants and presents a new approach to change processes and a new language for change.

Ubiquitous Intelligence and Computing Zhiwen Yu, Ramiro Liscano, Guanlilng Chen, Daqing Zhang, Xingshe Zhou, 2010-10-05 Ubiquitous sensors, devices, networks and information are paving the way toward a smart world in

which computational intelligence is distributed throughout the physical environment to provide reliable and relevant services to people. This ubiquitous intelligence will change the computing landscape because it will enable new breeds of applications and systems to be developed, and the realm of computing possibilities will be significantly extended. By enhancing everyday objects with intelligence, many tasks and processes could be simplified, the physical spaces where people interact, like workplaces and homes, could become more efficient, safer and more enjoyable. Ubiquitous computing, or pervasive computing, uses these many “smart things” or “u-things” to create smart environments, services and applications. A smart thing can be endowed with different levels of intelligence, and may be c- text-aware, active, interactive, reactive, proactive, assistive, adaptive, automated, sentient, perceptual, cognitive, autonomic and/or thinking. Research on ubiquitous intelligence is an emerging research field covering many disciplines. A series of grand challenges exists to move from the current level of computing services to the smart world of adaptive and intelligent services. Started in 2005, the series of UIC conferences has been held in Taipei, Nagasaki, Three Gorges (China), Hong Kong, Oslo and Brisbane. The proceedings contain the papers presented at the 7th International Conference on Ubiquitous Intelligence and Computing (UIC 2010), held in Xi’an, China, October 26–29, 2010. The conference was accompanied by six vibrant workshops on a variety of research challenges within the area of ubiquitous intelligence and computing.

Advanced Age Geriatric Care Nages Nagaratnam,Kujan Nagaratnam,Gary Cheuk,2018-11-26 As the Baby Boomers age, concerns over healthcare systems' abilities to accommodate geriatric patients grow increasingly challenging. This is especially true with the population deemed to be “the oldest of the old,” specifically those over the age of 85. Unlike any other time in history, this demographic is the fastest growing segment of most developed countries. In the United States the oldest old is projected to double from 4.3 million to 9.6 million by 2030. The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions, diet, public health and advancement in medical care. With this we have seen a steady decline in the age-specific prevalence of vascular and heart diseases, stroke and even dementia. Older persons are healthier today than their counterparts decades ago. More importantly than in any other age group, the care of the oldest old must be individualized; management decisions should be made taking into consideration the older persons’ expressed wishes, quality of life, function and mental capacity. The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases, multiple co-existing pathologies and neuro-degenerative diseases. The oldest of the aging population are often excluded from drug trials and their treatments are largely based on findings extrapolated from that of the younger old. Furthermore, among the oldest old, physiologically they are more diverse than other segments of the population. Their demographic characteristics are unparalleled and different compared to that of the younger old. Several studies have drawn attention to the differing attitudes among health professionals towards elderly people and many show prejudice because they are old. As a result, the use of age as a criteria in determining the appropriateness of treatment is of very limited validity, yet there are limited resources that guide physicians through these challenges. This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic. This book is designed for geriatricians, primary care physicians, junior medical officers, specialty geriatrics nurses, and gerontologists. It is divided into 3 sections: General Considerations, Chronic diseases and Geriatric Syndromes. Each chapter provides a summary of important and essential information under the heading of Key Points. Case studies are included in some of the chapters to highlight the principles of management.
