The Horse Wendy Williams, 2015-10-27 A New York Times Bestseller and New York Times Book Review Editors' Choice A Best Book of 2015, The Wall Street Journal Love is the driver for Wendy

Williams's new book, *The Horse* . . . [an] affectionate, thoroughgoing, good-hearted book. —Jaimy Gordon, *The New York Times Book Review* Charming and deeply interesting . . . Ms. Williams does a marvelous job. —Pat Shipman, *The Wall Street Journal* The book horse-lovers have been waiting for *Horses* have a story to tell, one of resilience, sociability, and intelligence, and of partnership with human beings. In *The Horse*, the journalist and equestrienne Wendy Williams brings that story brilliantly to life. Williams chronicles the 56-million-year journey of horses as she visits with experts around the world, exploring what our biological affinities and differences can tell us about the bond between horses and humans, and what our longtime companion might think and feel. Indeed, recent scientific breakthroughs regarding the social and cognitive capacities of the horse and its ability to adapt to changing ecosystems indicate that this animal is a major evolutionary triumph. Williams charts the course that leads to our modern *Equus*—from the protohorse to the Dutch Warmbloods, Thoroughbreds, and cow ponies of the twenty-first century. She observes magnificent ancient cave art in France and Spain that signals a deep respect and admiration for horses well before they were domesticated; visits the mountains of Wyoming with experts in equine behavior to understand the dynamics of free-roaming mustangs; witnesses the fluid gracefulness of the famous Lipizzans of Vienna; contemplates what life is like for the sure-footed, mustachioed Garrano horses who thrive on the rugged terrain of Galicia; meets a family devoted to rehabilitating abandoned mustangs on their New Hampshire farm; celebrates the Takhi horses of Mongolia; and more. She blends profound scientific insights with remarkable stories to create a unique biography of the horse as a sentient being with a fascinating past and a

finely nuanced mind. The Horse is a revealing account of the animal who has been at our side through the ages, befriending us and traveling with us over the mountains and across the plains. Enriched by Williams's own experience with horses, The Horse is a masterful work of narrative nonfiction that pays tribute to this treasure of the natural world.

Decolonizing Methodologies Linda Tuhiwai Smith, 2016-03-15 'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

The History of Cartography, Volume 6 Mark Monmonier, 2015-05-18 For more than thirty years, the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, Cartography in the Twentieth Century, continues this tradition with a groundbreaking survey of the century just ended and a new full-color, encyclopedic format. The twentieth century is a pivotal period in map history. The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps. Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps. Satellite positioning and mobile communications revolutionized wayfinding. Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the

globe and at all levels of society. Volume 6 covers these changes comprehensively, while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society—and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images. Hundreds of expert contributors provide both original research, often based on their own participation in the developments they describe, and interpretations of larger trends in cartography. Designed for use by both scholars and the general public, this definitive volume is a reference work of first resort for all who study and love maps.

Transporting Atlanta Miriam Konrad, 2010-07-02
America's worsening nightmare of gridlock is given full attention in this illuminating study of the transportation crisis in Atlanta. Inconveniences and hardships created by too many automobiles and too few alternatives for movement have reached untenable levels. Miriam Konrad investigates three major transportation projects involving public transit and use of space issues in the Atlanta area: the Metropolitan Atlanta Rapid Transit Authority (MARTA), the bus and rail system that has been the backbone of metropolitan Atlanta's public transportation system for the past thirty years; the Georgia Regional Transportation Authority (GRTA), a superagency created in 1999 to address air quality issues in the region; and the Belt Line, a popular proposal to build a twenty-two-mile loop of greenspace, transit, and other amenities around an inner loop of the city on existing rail beds. She reveals how gridlock, over regional transportation policy and procedures, has emerged out of the competition between growth promoters, environmentalists, and social justice actors.
