It's a Disaster!... and What Are You Gonna Do about It? Bill Liebsch, Janet Liebsch, 2000-04 This information is not intended as a substitute for a first aid course, but reviews some basic first aid measures that could be used when medical assistance is delayed or temporarily unavailable due to a major disaster or crisis--Page 5

Forest Hydrology Devendra Amatya, Thomas Williams, Leon Bren, Carmen de Jong, 2016-09-14 Forests cover approximately 26% of the world's land surface area and represent a distinct biotic community. They interact with water and soil in a variety of ways, providing canopy surfaces which trap precipitation and allow evaporation back into the atmosphere, thus regulating how much water reaches the forest floor as through fall, as well as pull water from the soil for transpiration. The discipline forest hydrology has been developed throughout the 20th century. During that time human intervention in natural landscapes has increased, and land use and management practices have intensified. The book will be useful for graduate students, professionals, land managers, practitioners, and researchers with a good understanding of the basic principles of hydrology and hydrologic processes.

Red Hot Lies Christopher C. Horner, 2008-11-11 Liars--Al Gore, the United Nations, the New York Times. The global warming lobby, relentless in its push for bigger government, more spending, and more regulation, will use any means necessary to scare you out of your wits--as well as your tax dollars and your liberties--with threats of rising oceans, deadly droughts, and unspeakable future consequences of climate change. In pursuing their anti-energy, anti-capitalist, and pro-government agenda, the global warming alarmists--and unscrupulous scientists who see this scare as their gravy train to federal grants and foundation money--resort to dirty tricks, smear campaigns, and outright lies, abandoning scientific standards, journalistic integrity, and the old-fashioned notions of free speech and open debate. In Red Hot Lies, bestselling author Christopher Horner--himself the target of Greenpeace dirty tricks and alarmist smears--exposes the dark underbelly of the environmental movement. Power-hungry politicians blacklist scientists who reject global warming alarmism. U.S. senators threaten companies that fund climate change dissenters. Mainstream media outlets openly reject the notion of balance. The occasional unguarded scientist candidly admits the need to twist the facts to paint an uglier picture in order to keep the faucet of government money flowing. In the name of saving the planet, anything goes. But why the nasty tactics? Why the cover ups, lies, and intimidation? Because Al Gore and his ilk want to use big government at the local, state, federal, and global level to run your life, and they can brook no opposition. But the actual facts, as Red Hot Lies makes clear, aren't nearly as scary as their fiction.

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's Traite de langue

amharique (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

A Fresh Look at Writing Donald H. Graves,1994 Describes techniques that teachers can use to increase their students' appreciation for writing and offers a detailed, week-by-week description of fourteen sessions designed to improve students' writing and reading skills.

RHYTHM AND DRUMMING DEMYSTIFIED Dave DiCenso,2014-10 The lessons in Rhythm and Drumming Demystified (R.A.D.D.) utilize a process of adapting the rudiments---and the countless variations and grooves they spawn---to the framework of five systems of common rhythmic figures, as a means to increase one's control and flexibility with any sticking or time-feel. The book also contains a groundbreaking system for using the voice to develop one's internal clock. By using this system, drummers can improve their groove by learning to generate time with their mind and allow their body to simply be a conduit between their perception of the time and its manifestation on the drumset.
