**Proceedings of the Third International Conference on Computing, Mathematics and Statistics (iCMS2017)** Liew-Kee Kor,Abd-Razak Ahmad,Zanariah Idrus,Kamarul Ariffin Mansor,2019-03-27 This book is a product of the Third International Conference on Computing, Mathematics and Statistics (iCMS2017) to be held in Langkawi in November 2017. It is divided into four sections according to the thrust areas: Computer Science, Mathematics, Statistics, and Multidisciplinary Applications. All sections sought to confront current issues that society faces today. The book brings collectively quantitative, as well as qualitative, research methods that are also suitable for future research undertakings. Researchers in Computer Science, Mathematics and Statistics can use this book as a sourcebook to enrich their research works.

**The Triumph of the Symbol** Tallay Ornan,2005 This book analyzes the history of Mesopotamian imagery from the mid-second to mid-first millennium BCE. It demonstrates that in spite of rich textual evidence, which grants the Mesopotamian gods and goddesses an anthropomorphic form, there was a clear abstention in various media from visualizing the gods in such a form. True, divine human-shaped cultic images existed in Mesopotamian temples. But as a rule, non-anthropomorphic visual agents such as inanimate objects, animals or fantastic hybrids replaced these figures when they were portrayed outside of their sacred enclosures. This tendency reached its peak in first-millennium Babylonia and Assyria. The removal of the Mesopotamian human-shaped deity from pictorial renderings resembles the Biblical agenda not only in its avoidance of displaying a divine image but also in the implied dual perception of the divine: according to the Bible and the Assyro-Babylonian concept the divine was conceived as having a human form; yet in both cases anthropomorphism was also concealed or rejected, though to a different degree. In the present book, this dual approach toward the divine image is considered as a reflection of two associated rather than contradictory religious worldviews. The plausible consolidation of the relevant Biblical accounts just before the Babylonian Exile, or more probably within the Exile - in both cases during a period of strong Assyrian and Babylonian hegemony - points to a direct correspondence between comparable religious phenomena. It is suggested that far from their homeland and in the absence of a temple for their god, the Judahite deportees adopted and intensified the Mesopotamian avoidance of anthropomorphic pictorial portrayals of deities. While the Babylonian representations remained confined to temples, the exiles would have turned a cultic reality - i.e., the nonwritten Babylonian custom - into a written, articulated law that explicitly forbade the pictorial representation of God.

**Pro Git** Scott Chacon, Ben Straub, 2014-11-18 Pro Git (Second Edition) is your fully-updated guide to Git and its usage in the modern world. Git has come a long way since it was first developed by Linus Torvalds for Linux kernel development. It has taken the open source world by storm since its inception in 2005, and this book teaches you how to use it like a pro. Effective and well-implemented version control is a necessity for successful web projects, whether large or small. With this book you'll learn how to master the world of distributed version workflow, use the distributed features of Git to the full, and extend Git to meet your every need. Written by Git pros Scott Chacon and Ben Straub, Pro Git (Second Edition) builds on the hugely successful first edition, and is now fully updated for Git version 2.0, as well as including an indispensable chapter on GitHub. It's the best book for all your Git needs.

*Women Going Public* Lien Foubert, 2012-12-28 The Julio-Claudian period (c. 27 BC to 68 AD) was a time of great tension, witnessing profound challenges to Roman political and social life. One manifestation of this was the increasingly important role played by women in the power struggles that gripped the Empire during the reign of Augustus and his four successors. This study discusses the portrayal of women from imperial families, who developed high public profiles to help to guarantee their family's continuity and create a public image of the princeps and his reign.

**The Math of Food** Hope Martin, Susan Guengerich, 1999 How can math help you improve your diet? Your students will find out as they work the 20 fun math problems involving nutrition, such as proper diet, exercise, and using information from food labels. Activities show how math is part of their everyday lives and connects to other subject areas, such as consumer education and social studies. A unit also examines world hunger. Teacher notes list each lesson's math skills, concepts, needed materials, procedures, assessment, and extension activities. Correlates to NCTM standards.

Social Constructivism as a Philosophy of Mathematics Paul Ernest, 1998-01-01 Extends the ideas of social constructivism to the philosophy of mathematics, developing a powerful critique of traditional absolutist conceptions of mathematics, and proposing a reconceptualization of the philosophy of mathematics.

*Teaching Without Indoctrination: Implications for Values Education* Charlene Tan, 2008-01-01 "This book presents a comprehensive, well-structured and enlightening survey of the problem of indoctrination as manifested in scientific, moral, religious and social fields within the context of an intellectual milieu that prides itself in being liberal and democratic. In the craft of intellectual midwifery which she masters, Professor Tan has but one prescription: constant reflection, but not of the solipsistic or sterile kind. Rather, she advocates fearless questioning within the bounds of a community of learning, which is what schools should ideally be, wherein we all recognise ourselves to be at once students and teachers." - Professor Alejo José G. Sison, Rafael Escolà Chair of Professional Ethics, University of Navarra, Pamplona, Spain

*The Mind-Body Problem* Jonathan Westphal, 2016-09-30 An introduction to the mind-body problem, covering all the proposed solutions and offering a powerful new one. Philosophers from Descartes to Kripke have struggled with the glittering prize of modern and contemporary philosophy: the mind-body problem. The brain is physical. If the mind is physical, we cannot see how. If we cannot see how the mind is physical, we cannot see how it can interact with the body. And if the mind is not physical, it cannot interact with the body. Or so it seems. In this book the philosopher Jonathan Westphal examines the mind-body problem in detail, laying out the reasoning behind the solutions that have been offered in the past and presenting his own proposal. The sharp focus on the mind-body problem, a problem that is not about the self, or consciousness, or the soul, or anything other than the mind and the body, helps

clarify both problem and solutions. Westphal outlines the history of the mind-body problem, beginning with Descartes. He describes mind-body dualism, which claims that the mind and the body are two different and separate things, nonphysical and physical, and he also examines physicalist theories of mind; antimaterialism, which proposes limits to physicalism and introduces the idea of qualia; and scientific theories of consciousness. Finally, Westphal examines the largely forgotten neutral monist theories of mind and body, held by Ernst Mach, William James, and Bertrand Russell, which attempt neither to extract mind from matter nor to dissolve matter into mind. Westphal proposes his own version of neutral monism. This version is unique among neutral monist theories in offering an account of mind-body interaction.

Chemical Process Equipment - Selection and Design (Revised 2nd Edition) James R. Couper, W Roy Penney, James R. Fair PhD, 2009-08-11 A facility is only as efficient and profitable as the equipment that is in it: this highly influential book is a powerful resource for chemical, process, or plant engineers who need to select, design or configure plant successfully and profitably. It includes updated information on design methods for all standard equipment, with an emphasis on real-world process design and performance. The comprehensive and influential guide to the selection and design of a wide range of chemical process equipment, used by engineers globally; Copious examples of successful applications, with supporting schematics and data to illustrate the functioning and performance of equipment Revised edition, new material includes updated equipment cost data, liquid-solid and solid systems, and the latest information on membrane separation technology Provides equipment rating forms and manufacturers' data, worked examples, valuable shortcut methods, rules of thumb, and equipment rating forms to demonstrate and support the design process Heavily illustrated with many line drawings and schematics to aid understanding, graphs and tables to illustrate performance data

Challenging Gender Norms Sharyn Graham Davies, 2007 As part of the Case Studies in Cultural Anthropology series, edited by George Spindler and Janice E. Stockard, Sharyn Graham brings us CHALLENGING GENDER NORMS: THE FIVE GENDERS OF INDONESIA. This case study explores the Bugis ethnic group, native to the Indonesian island of Sulawesi, that recognizes five gender categories rather than the two acknowledged in most societies. The Bugis acknowledge three sexes (female, male, hermaphrodite), four genders (women, men, calabai, and calalai), and a fifth meta-gender group, the bissu. This ethnography presents individuals' stories, opinions and deliberations, grounding discussions of how gendered identities are constructed in a rapidly changing cultural milieu. The rich ethnographic material contained in this book challenges two types of Western theory ? queer theory, which tends to focus on sexuality, and feminist theory, which tends to focus on social gender enactment. Neither theory is well-equipped for articulating the complexities of multiple gender identities and a multifarious gender system. By unraveling social negotiations and examining both individual embodiment and the impact of global forces on localized identities, the book proposes a new theory of gender which incorporates appreciation of variously gendered subjectivities.

**Salmonella** Steffen Porwollik, 2011 Salmonellae are important pathogens, responsible for an estimated one million deaths and 100 million human infections annually. Their genomes are mosaic puzzles, results of lateral transfer events that occur within a stable genetic background. Extraordinary diversity of host ranges and pathogenicity traits between different strains are the consequence of both specific genome insertions/deletions and minute changes in genome composition. Genomic information decoded from a multitude of different Salmonella strains and new dramatic insights into pathogenic processes emphasize the fact that Salmonella research is currently at a very exciting juncture. In addition to their fascinating resilience in both the environment and eukaryotic hosts, Salmonella prefer tumors over any other location within the human host (by a factor of 1000 or more). This ability could propel Salmonella into future use as a therapeutic delivery agent to control and/or cure cancers. In this book, internationally acclaimed experts review cutting-edge topics in Salmonella genomics and molecular biology, providing a timely snapshot of the current state of research. Topics include the latest approaches to sub-species level classification and phage typing of Salmonella, comparative genomics, the search for genetic determinants for survival of the bacterium in different environments, and the evolution of niche specialization by Salmonella. The book also explores the latest genomic information and molecular characterizations of sRNAs and complements of fimbriae, flagella, and secreted virulence factors. Moreover, S. Typhi pathogenesis, interactions of the host with intracellular Salmonella, and the host's anti-Salmonella immune response are reviewed. The current knowledge on Salmonella biofilm formation and a progress report on using Salmonella as an anti-tumor tool conclude this compendium. This book will be essential reading for all researchers working with Salmonella and related organisms, and is recommended reading for other scientists working on bacterial genomics, molecular biology, and bacterial molecular and cellular pathogenesis.

**For God and the Empire** Roger Willoughby, 2012 The full story of the Order of the British Empire, and its medal, the British Empire medal -originally intended to honour civilian heroes of the Great War, which developed into a much sought after award for a wide variety of roles, including women, secret agents and war workers--Naval & Military Press.

*Volunteer Tourism* Stephen Wearing, 2001-01-01 Volunteer tourism describes a field of tourism, in which travelers visit a destination and take part in projects in the local community. Projects are commonly nature-based, people-based or involve restoration of buildings and artifacts (e.g. restoration of a Buddhist temple in Mongolia).

**Parent-Child Relations: A Guide to Raising Children (Revised Edition)** Hisham Altalib ,AbdulHamid Ahmad AbuSulayman ,Omar Hisham Altalib , 2024-03-11 Modern families face challenges unprecedented in human history. The time, attention and vigilance required of parents is exhausting and consuming family life. Parents are required to balance complex schedules, be technology aware, social media informed, constantly monitor children's screen time and media communication, cope with academic problems, shield them from the dangers of immorality, find inventive ways to overcome their boredom, organize extracurricular activities, and handle everything within financially constrained circumstances that increasingly require both to be working. Little wonder that anxiety is on

the rise and parents are increasingly fearing for their children's future. The authors in this book attempt to address parents' concerns and equip them with the confidence and tools necessary to work towards understanding and addressing the real needs of both themselves and their children, to nurture the child's character, self-confidence, life skills, moral boundaries, spiritual development and much more. There is no quick-fix. Myths are debunked, and practical tips offered throughout which can be implemented immediately, with fun activities outlined at the end of each chapter with the aim of improving parent-child relationships through bonding, love, patience, openness, respect and communication.
