*Standards and Their Stories* Martha Lampland, Susan Leigh Star, 2009

Standardization is one of the defining aspects of modern life, its presence so pervasive that it is usually taken for granted. However cumbersome, onerous, or simply puzzling certain standards may be, their fundamental purpose in streamlining procedures, regulating behaviors, and predicting

results is rarely questioned. Indeed, the invisibility of infrastructure and the imperative of standardizing processes signify their absolute necessity. Increasingly, however, social scientists are beginning to examine the origins and effects of the standards that underpin the technology and practices of everyday life. *Standards and Their Stories* explores how we interact with the network of standards that shape our lives in ways both obvious and invisible. The main chapters analyze standardization in biomedical research, government bureaucracies, the insurance industry, labor markets, and computer technology, providing detailed accounts of the invention of standard humans for medical testing and life insurance actuarial tables, the imposition of chronological age as a biographical determinant, the accepted means of determining labor productivity, the creation of international standards for the preservation and access of metadata, and the global consequences of ASCII imperialism and the use of English as the lingua franca of the Internet. Accompanying these in-depth critiques are a series of examples that depict an almost infinite variety of standards, from the controversies surrounding the European Union's supposed regulation of banana curvature to the minimum health requirements for immigrants at Ellis Island, conflicting (and ever-increasing) food portion sizes, and the impact of standardized punishment metrics like Three Strikes laws. The volume begins with a pioneering essay from Susan Leigh Star and Martha Lampland on the nature of standards in everyday life that brings together strands from the several fields

represented in the book. In an appendix, the editors provide a guide for teaching courses in this emerging interdisciplinary field, which they term infrastructure studies, making *Standards and Their Stories* ideal for scholars, students, and those curious about why coffins are becoming wider, for instance, or why the Financial Accounting Standards Board refused to classify September 11 as an extraordinary event.

Island Light Alexander Key,Susan Nosco Wolfe,2014-07-04 A fugitive from federal justice, Lieutenant Max Ewing returns home to the Gulf port city of Apalachicola determined to seek revenge. The War Between the States has ended, but Apalachicola remains occupied by federal troops and local opportunists, emboldened and empowered by the war. Max's brother Randy has died, a victim of shipboard hostilities in the Bay of Cardenas. Soon, Ewing learns of other losses incurred in his absence: his mother's death from yellow fever, the confiscation of his family's property, and the fates and deaths of many friends. Revenge, loyalty, honor, passion and greed clash in this dramatic tale, which Key sets among the raw and rugged elements of Florida's Gulf coast at a turbulent time in its history.

**Central America Regional Security Initiative** Peter J. Meyer,Clare Ribando Seelke,2014 This report examines the extent of the security problems in

Central America, the current efforts being undertaken by Central American governments to address them, and U.S. support for Central American efforts through the Central America Regional Security Initiative. It also raises potential policy issues for congressional consideration such as funding levels, human rights concerns, and how CARSI relates to other U.S. government policies.

**China's Techno-Warriors** Evan A. Feigenbaum, 2003 This book skillfully weaves together four stories: Chinese views of technology during the Communist era; the role of the military in Chinese political and economic life; the evolution of open and flexible conceptions of public management in China; and the technological dimensions of the rise of Chinese power.

**Forging China's Military Might** Tai Ming Cheung, 2014-02-24 "His collection of nine essays offers a comprehensive and insightful assessment of the Chinese defense science and technology (S&T)." –Pacific Affairs Among the most important issues in international security today are the nature and the global implications of China's emergence as a world-class defense technology power. Since the beginning of the twenty-first century, the Chinese defense industry has reinvented itself by emphasizing technological innovation and

technology. This reinvention and its potential effects, both positive and negative, are attracting global scrutiny. Drawing insights from a range of disciplines, including history, social science, business, and strategic studies, Tai Ming Cheung and the contributors to Forging China's Military Might develop an analytical framework to evaluate the nature, dimensions, and spectrum of Chinese innovation in the military and broader defense spheres. Forging China's Military Might provides an overview of the current state of the Chinese defense industry and then focuses on subjects critical to understanding short- and long-term developments, including the relationship among defense contractors, regulators, and end-users; civil-military integration; China's defense innovation system; and China's place in the global defense economy. Case studies look in detail at the Chinese space and missile industry. "Constitutes high-quality, cutting-edge research on China's defense industries. It should enjoy broad appeal—among academics, policy makers, security analysts, and business people in countries around the world." —Andrew Scobell, RAND Corporation "Forging China's Military Might belongs in any political science shelf interested in China's issues and international security and considers the nature of China's emergence as a world power." —Midwest Book Review

**Diagnostic Ultrasound** Peter R. Hoskins, Kevin Martin, Abigail Thrush, 2010-06-17 All healthcare professionals practising ultrasound in a clinical setting should receive accredited training in the principles and

practice of ultrasound scanning. Renal Replacement Therapy: Principles and Practice Penny Summers, 2021-11-16  
Renal replacement therapy is a kind of therapy in which the normal blood-filtering function of the kidneys is replaced. It is primarily used when the kidneys are not functioning well, which is known as renal failure. It includes acute kidney injuries and chronic kidney diseases. Dialysis, hemofiltration, hemodiafiltration, etc. are the various ways of filtration of blood involved in renal replacement therapy. It also includes kidney transplantation in which the infected kidney is replaced by the donor's kidney. These treatments are life-extending treatments and are not truly

cures for kidney diseases. The process of hemodialysis, hemofiltration, and hemodiafiltration can use an arteriovenous route or a venovenous route and can be continuous or intermittent. This results in various types of RRT such as continuous renal replacement therapy, continuous hemodialysis, continuous arteriovenous hemodialysis, intermittent renal replacement therapy, intermittent hemodialysis and intermittent venovenous hemodialysis. This book studies, analyzes and upholds the pillars of renal replacement therapy and its utmost significance in modern times. The aim of this book is to present researches that have transformed this discipline and aided its advancement. Researchers and students in this field will be greatly assisted by this book.

**Transnational Organized Crime in Central America and the Caribbean** ,2012  
This report is one of several studies conducted by UNODC on organized crime threats around the world. These studies describe what is known about the mechanics of contraband trafficking - the what, who, how, and how much of illicit flows - and discuss their potential impact on governance and development. Their primary role is diagnostic, but they also explore the implications of these findings for policy. Publisher's note.
