*HP-UHP Metamorphism and Tectonic Evolution of Orogenic Belts* Lifei Zhang (Dean of School), Zeming Zhang (Writer on tectonics), Hans-Peter Schertl, Chunjing Wei, 2019 High pressure (HP) and ultrahigh pressure (UHP) metamorphic rocks play a key role in understanding the tectonic evolution of orogenic belts. They have typically experienced complex changes during subduction and exhumation processes arising from recrystallization, deformation, fluid-rock interactions and even partial melting, and may therefore carry valuable records of evolving geodynamic systems in an orogenic belt. This special publication addresses the current work on HP-UHP metamorphism and its relation to the tectonic evolution of orogenic belts. This special publication contains fifteen papers covering the important orogenic belts of the Himalaya, Dabie-Sulu, Tian Shan, North Qaidam and others that have been grouped into three parts: (I) new developments in the determination of metamorphic pressure-temperature (PT) conditions and their timing, (II) overview papers of well-known HP-UHP metamorphic belts and (III) research papers for some newly discovered HP-UHP belts.

The IDA Pro Book, 2nd Edition Chris Eagle, 2011-07-11 No source code? No problem. With IDA Pro, the interactive disassembler, you live in a source code-optional world. IDA can automatically analyze the millions of opcodes that make up an executable and present you with a disassembly. But at that point, your work is just beginning. With *The IDA Pro Book*, you'll learn how to turn that mountain of mnemonics into something you can actually use. Hailed by the creator of IDA Pro as profound, comprehensive, and accurate, the second edition of *The IDA Pro Book* covers everything from the very first steps to advanced automation techniques. You'll find complete coverage of IDA's new Qt-based user interface, as well as increased coverage of the IDA debugger, the Bochs debugger, and IDA scripting (especially using IDAPython). But because humans are still smarter than computers, you'll even learn how to use IDA's latest interactive and scriptable interfaces to your advantage. Save time and effort as you learn to: -Navigate, comment, and modify disassembly -Identify known library routines, so you can focus your analysis on other areas of the code -Use code graphing to quickly make sense of cross references and function calls -Extend IDA to support new processors and filetypes using the SDK -Explore popular plug-ins that make writing IDA scripts easier, allow collaborative reverse engineering, and much more -Use IDA's built-in debugger to tackle hostile and obfuscated code Whether you're analyzing malware, conducting vulnerability research, or reverse engineering software, a mastery of IDA is crucial to your success. Take your skills to the next level with this 2nd edition of *The IDA Pro Book*.

*May the Best Man Win* ZR Ellor, 2021-05-18 A trans boy enters a throw-down battle for the title of Homecoming King with the boy he dumped last summer in ZR Ellor's contemporary YA debut. Jeremy Harkiss, cheer captain and student body president, won't let coming out as a transgender boy ruin his senior year. Instead of bowing to the bigots and outdate school administration, Jeremy decides to make some noise—and how better than by challenging his all-star ex-boyfriend, Lukas for the title of Homecoming King? Lukas Rivers, football star and head of the Homecoming Committee, is just trying to find order in his life after his older brother's funeral and the loss of his long-term girlfriend—who turned out to be a boy. But when Jeremy threatens to break his heart and steal his crown, Lukas kick starts a plot to sabotage Jeremy's campaign. When both boys take their rivalry too far, the dance is on the verge of being canceled. To save Homecoming, they'll have to face the hurt they're both hiding—and the lingering butterflies they can't deny.

*Covert Regime Change* Lindsey A. O'Rourke, 2018-12-15 States seldom resort to war to overthrow their adversaries. They are more likely to attempt to covertly change the opposing regime, by assassinating a foreign leader, sponsoring a coup d'état, meddling in a democratic election, or secretly aiding foreign dissident groups. In *Covert Regime Change*, Lindsey A. O'Rourke shows us how states really act when trying to overthrow another state. She argues that conventional focus on overt cases misses the basic causes of regime change. O'Rourke provides substantive evidence of types of security interests that drive states to intervene. Offensive operations aim to overthrow a current military rival or break up a rival alliance. Preventive operations seek to stop a state from taking certain actions, such as joining a rival alliance, that may make them a future security threat. Hegemonic operations try to maintain a hierarchical relationship between the intervening state and the target government. Despite the prevalence of covert attempts at regime change, most operations fail to remain covert and spark blowback in unanticipated ways. *Covert Regime Change* assembles an original dataset of all American regime change operations during the Cold War. This fund of information shows the United States was ten times more likely to try covert rather than overt regime change during the Cold War. Her dataset allows O'Rourke to address three foundational questions: What motivates states to attempt foreign regime change? Why do states prefer to conduct these operations covertly rather than overtly? How successful are such missions in achieving their foreign policy goals?

**Secret Wars** Austin Carson, 2020-06-09 *Secret Wars* is the first book to systematically analyze the ways powerful states covertly participate in foreign wars, showing a recurring pattern of such behavior stretching from World War I to U.S.-occupied Iraq. Investigating what governments keep secret during wars and why, Austin Carson argues that leaders maintain the secrecy of state

involvement as a response to the persistent concern of limiting war. Keeping interventions “backstage” helps control escalation dynamics, insulating leaders from domestic pressures while communicating their interest in keeping a war contained. Carson shows that covert interventions can help control escalation, but they are almost always detected by other major powers. However, the shared value of limiting war can lead adversaries to keep secret the interventions they detect, as when American leaders concealed clashes with Soviet pilots during the Korean War. Escalation concerns can also cause leaders to ignore covert interventions that have become an open secret. From Nazi Germany’s role in the Spanish Civil War to American covert operations during the Vietnam War, Carson presents new insights about some of the most influential conflicts of the twentieth century. Parting the curtain on the secret side of modern war, *Secret Wars* provides important lessons about how rival state powers collude and compete, and the ways in which they avoid outright military confrontations.

**Archives for the 21st Century** Great Britain: Ministry of Justice, Great Britain Department for Culture, Media and Sport, Great Britain Department for Communities and Local Government, 2009-11-24 Publicly funded archive services have a vital role within the communities they serve to contribute to local democracy, strong and cohesive communities, social policy, education, research, history and culture. This document sets out the strategic vision for the sustainable development of a vigorous, publicly funded archive sector across England and Wales. It replaces the Government policy on archives that was issued by the Lord Chancellor in 1999 (Cm. 4516, ISBN 9780101451628) and focuses on actions for publicly funded archives while acknowledging that private archives remain vital to the archival health of the nation. Section 1 outlines how the landscape in which archive services operate has changed: large organisations now keep most, if not all, of their information in electronic form. Section 2 provides a vision of the true potential of publicly funded archives. Section 3 outlines the challenges facing archive services in the delivery of their core task of preserving authentic information and helping people to access and understand the past. Section 4 sets out five key recommendations: develop bigger and better services in partnership; strengthened leadership and a responsive, skilled workforce; co-ordinated response to the growing challenge of managing digital information; comprehensive online access for archive discovery through catalogues and to digitised archive content by citizens at a time and place that suits them; active participation in cultural and learning partnerships promoting a sense of identity and place within the community. Section 5 highlights the need for concerted action by all parties connected with the archive sector to ensure a sustainable future.

*Inside Installations* Tatja Scholte, Glenn Wharton, 2011 Anything is possible in installation art. The typically short lifespan of the materials and techniques used and the intended experience can be endless, often to the despair of the custodian of the work. The processes involved in preserving this complex form of art, reinstalling it, finding ways to recreate the experience over and over again, as well as the decisionmaking that underlies these processes, form the backbone of this book. What did the artist originally intend and how has that concept been realised in the past? How can one preserve and document the installation? What relation exists between the components and the space, and what is the spectator's part in the work? Questions of this kind are examined in connection with a number of case studies. At the same time, it reports on the results of an extensive research project *Inside Installations* (2004-2007) carried out by an international group of custodians active in the conservation of contemporary art. Tatja Scholte is programme manager at the Cultural Heritage Agency of the Netherlands (RCE) and specialised in the theory of contemporary art conservation. Dr. Glenn Wharton serves as Media Conservator at the Museum of Modern Art in New York. He is also on faculty in the Museum Studies Program at New York University, and was the founding Executive Director of INCCA-NA, the North American group of the International Network for the Conservation of Contemporary Art.
