Making Sense of Muslim Fundamentalisms Nimrod Hurvitz, Eli

Alshech,2020-06-04 Studying Muslim fundamentalisms, this book compares key movements, examining their commonalities, differences, and intricate relations, as well as their achievements and failures. Muslim fundamentalisms have the sympathy of approximately half of the Muslim population in the world. Yet, they are divided among themselves and are in a constant state of controversy. The research dwells on the leading fundamentalist movements, such as the Muslim Brothers, Tablighi-Jama'at, al-Qaeda, and ISIS, and illustrates how differently they think about the West and its culture, democracy, and women's presence in the public sphere. By identifying these trends, and studying them comparatively, the book enables the interested reader to make sense of the plethora of fundamentalist movements, which are otherwise lumped together by the media and are barely discernible for the reader. Whereas most studies of Muslim fundamentalism focus on organizational or militant actions that the movements perform, this study concentrates on their efforts to Islamize society through everyday life in a peaceful manner. Identifying the different strands of Muslim fundamentalisms, the book will be a key resource to a wide range of readers including researchers and students interested in politics, religious, Islamic and Middle Eastern Studies.

Part clash of cultures, part meeting of minds, always fascinating and illuminating, this intriguing book will inspire teachers, students, and parents at all levels of the educational system - from kindergarten through school to university. Conversations include: What are the purposes of education? Does educational data speak for itself? What is the role of the teacher? Is learning a visible phenomenon? Is it important to teach and learn specific subjects? What is the role of neuroscience research? What is the relationship between educational research and educational politics? What is the role of the state in education?

South Asian Sovereignty David Gilmartin, Pamela Price, Arild Engelsen Ruud, 2019-07-24 This book brings ethnographies of everyday power and ritual into dialogue with intellectual studies of theology and political theory. It underscores the importance of academic collaboration between scholars of religion, anthropology, and history in uncovering the structures of thinking and action that make politics work. The volume weaves important discussions around sovereignty in modern South Asian history with debates elsewhere on the world map. South Asia's colonial history - especially India's twentieth-century emergence as the world's largest democracy - has made the subcontinent a critical arena for thinking about how transformations and continuities in conceptions of sovereignty provide a vital frame for tracking shifts in political order. The chapters deal with themes such as sovereignty, kingship, democracy, governance, reason, people, nation, colonialism, rule of law, courts, autonomy, and authority, especially within the context of India, Bangladesh, and Pakistan. The book will be of great interest to scholars and researchers in politics, ideology, religion, sociology, history, and political culture, as well as the informed reader interested in South Asian studies.
