**Comeback Pitchers** Lyle Spatz,Steve Steinberg,2021-04 The careers of pitchers Jack Quinn and Howard Ehmke began in the Deadball Era and peaked in the 1920s. They were teammates for many years, with both the cellar-dwelling Boston Red Sox and later with the world champion Philadelphia Athletics, managed by Connie Mack. As far back as 1912, when he was just twenty-nine, Quinn was told he was too old to play and on the downward side of his career. Because of his determination, work ethic, outlook on life, and physical conditioning, however, he continued to excel. In his midthirties, then his late thirties, and even into his forties, he overcame the naysayers. At age forty-six he became the oldest pitcher to start a World Series game. When Quinn finally retired in 1933 at fifty, the “Methuselah of the Mound” owned numerous longevity records, some of which he holds to this day. Ehmke, meanwhile, battled arm trouble and poor health through much of his career. Like Quinn, he was dismissed by the experts and from many teams, only to return and excel. He overcame his physical problems by developing new pitches and pitching motions and capped his career with a stunning performance in Game One of the 1929 World Series against the Chicago Cubs, which still ranks among baseball’s most memorable games. Connie Mack described it as his greatest day in baseball. Comeback Pitchers is the inspirational story of these two great pitchers with intertwining careers who were repeatedly considered washed up and too old but kept defying the odds and thrilling fans long after most pitchers would have retired.

*Winningest Pitchers* Rich Westcott,2002 Since the beginning of major league baseball, more than 12,000 pitchers have thrown from the mound. Of them, only twenty have reached the ultimate goal of their profession: to be a 300-game winner.Rich Westcott, celebrated sports historian and journalist, offers in *Winningest Pitchers* profiles of each of those twenty pitchers, including Cy Young, Gaylord Perry, and Nolan Ryan. In small biographies, photographs, and stats, we gain a full picture of each of these rare players whose combined greatness contributes to baseball's continued importance to American athletic life. Author note: Rich Westcott has some idea of what it's like to stand on the mound and face an opposing hitter, having been a pitcher himself before it became apparent that his fingers were more useful pounding keyboards than gripping baseballs. He is the author of 12 previous, including, most recently, *Great Home Runs of the 20th Century* and *A Century of Philadelphia Sports*, both published by Temple. His career as a writer and editor has covered forty years, and he is the founder and for fourteen years served as editor and publisher of *Phillies Report*. Westcott lives in Springfield, Pennsylvania.

**27 Men Out** Michael Coffey,2010-05-11 The first in-depth look at baseball's nirvana -- a lyrical history of pitching perfection. There have been only fourteen perfect games pitched in the modern era of baseball; the great Cy Young fittingly hurled the first, in 1904, and David Cone pitched the most recent, in 1999. In between, some great pitchers -- Sandy Koufax, Catfish Hunter, Jim Bunning, and Don Larsen in the World Series -- performed the feat, as did some mediocre ones, like Len Barker and the little-known Charlie Robertson. Fourteen in 150,000 games: The odds are staggering. When it does happen, however, the whole baseball world marvels at the combination of luck and skill, and the pitcher himself gains a kind of baseball immortality. Five years ago, Michael Coffey witnessed such an event at Yankee Stadium, and the experience prompted this expansive look at the history of these unsurpassable pitching performances. He brings his skills as a popular historian and poet to an appraisal of both the games themselves and of the wider sport of baseball and the lives of the players in it. The careers of each of the fourteen perfect-game pitchers are assessed, not only as to their on-the-field performances but with a regard for their struggles to persevere in an extremely competitive sport in which, more often than not, the men and women who run the game from the owners' boxes are their most formidable adversaries. Along the way, Michael Coffey brings us right into the ballparks with a play-by-play account of how these games unfolded, and relates a host of fascinating stories, such as Sandy Koufax's controversial holdout with Don Drysdale and its chilling effect on baseball's owners, Mike Witt's victimization by the baseball commissioner, and Dennis Martinez's long struggle up from an impoverished Nicaraguan childhood. Combining history, baseball, and a sweeping look at the changing face of labor relations, *27 Men Out* is a new benchmark in sports history.

**The Tactics of Pitching** Branford McAllister,2014-02-04 There are two basic ways to win the pitcher versus hitter war:• Overpower the hitter (like Justin Verlander)• Fool the hitter (like Barry Zito).The first requires dominating stuff, generally velocity. (Verlander's average fastball in 2012 was 94.3 mph. He also showcased a superb curveball.) And, it requires a fair amount of control to go with the overpowering velocity. Not many pitchers have that kind of ability, even in the major leagues. At lower levels, very few pitchers have the kind of overpowering stuff to rely just on that to get hitters out throughout a game. Those who do have electric stuff can dominate hitters. They are the fortunate ones, but not everyone has this advantage. For them, and for the overpowering pitchers

at higher levels, something more than great stuff is required. So, in general, we need a more strategic, mental approach to get hitters out consistently. Pitching is a complex endeavor—both physical and mental. While there are many views on how to succeed as a pitcher, there are several principles that lead to success on the mound. Among these are the following: There is a limited number of things you can do with a ball: give it speed, give it direction, impart spin, and select an orientation of the seams. You can also combine pitches in different sequences and combinations. Otherwise, there is nothing you can do to the ball. Every other factor that you can control is mental, and therefore absolutely essential to success. You cannot succeed consistently on the hill without having a plan in mind beforehand. So, if you prepare well, with solid mechanics, you can win each battle with hitters. The objective on the mound is getting outs. There is a strategy to doing this and it relies upon a thoughtful approach that considers your abilities and the situation. If you combine great physical preparation with a sound mental approach, you greatly increase your chances to get those outs, succeed on the hill, and give your team the best opportunity to win games. There are many books on baseball, a few of them about pitching. But, there are very few good books on the art and strategy: the tactics of pitching—specifically, books dealing with how to throw specific pitches, why they do what they do, when to throw them, to what locations, and how to set up hitters. There are few books that help pitchers “pitch” a good game—the subtleties of how to throw pitches and how to formulate game plans for pitching. The Tactics of Pitching is a practical manual for learning and teaching the science, mechanics, and strategy of pitching, suitable for amateur players and coaches through the college level. The book focuses on the following topics: • Pitching Philosophy • How Air Resistance Affects the Flight of a Ball • The Strikezone • Pitches • Situational Pitching • Mechanics Checklist • Correcting Problems • Mental Aspects of Pitching.
