T&T Clark Handbook of Christian Theology and Climate Change ,2019-12-12 The T&T Clark Handbook of Christian Theology and Climate Change entails a wide-ranging conversation between Christian theology and various other discourses on climate change. Given the far-reaching complicity of North Atlantic Christianity in anthropogenic climate change, the question is whether it can still collaborate with and contribute to ongoing mitigation and adaptation efforts. The main essays in this volume are written by leading scholars from within North Atlantic Christianity and addressed primarily to readers in the same context; these essays are critically engaged by respondents situated in other geographic regions, minority communities, non-Christian traditions, or non-theological disciplines. Structured in seven main parts, the handbook explores: 1) the need for collaboration with disciplines outside of Christian theology to address climate change; 2) the need to find common moral ground for such collaboration; 3) the difficulties posed by collaborating with other Christian traditions from within; 4) the questions that emerge from such collaboration for understanding the story of God's work; and 5) God's identity and character; 6) the implications of such collaboration for ecclesial praxis; and 7) concluding reflections examining whether this volume does justice to issues of race, gender, class, other animals, religious diversity, geographical divides and carbon mitigation. This rich ecumenical, cross-cultural conversation provides a comprehensive and in-depth engagement with the theological and moral challenges raised by anthropogenic climate change.

A Birder's Guide to Washington Hal N. Opperman,2003 Few states show more dramatic contrasts in their environment than Washington. Elevations range from sea level to over 14,000 feet. Precipitation varies from over 200 inches annually on the Olympic Peninsula, nurturing a temperate rain forest and mountaintop glaciers, to a mere six inches in parts of the Columbia Basin, where near-desert conditions prevail. The primary reason for these contrasts is the Cascade Range, which runs from north to south the entire length of the state. Pacific storms slam into Western Washington for much of the year. The Wet Side is often cloudy and enjoys moderate temperatures at all seasons. East of the Cascades, Washington's Dry Side has a rain shadow climate. Summers are hot, winters cold; clear skies are the norm. Between these extremes, an array of aquatic and terrestrial communities supports a remarkable diversity of bird species. Typical of the Wet Side are Black-footed Albatross, Trumpeter Swan, Black Turnstone, Mew Gull, and Rhinoceros Auklet, while the Dry Side is home to the Spruce Grouse, Flammulated Owl, White-headed Woodpecker, Black-billed Magpie, and Brewer's Sparrow. A Birder's Guide to Washington details hundreds of birding routes and sites in the state and adjacent areas in British Columbia, together with year-round access instructions and birding advice. Over 220 maps pinpoint the most productive destinations in the field and offer regional overviews to help with trip planning. An annotated checklist of 478 species recorded in the state through 2002 gives information about status and habitat associations, while the seasonal abundance/regional occurrence bar graphs will assist birders in locating regularly occurring species. Authoritative lists of Washington's mammals, herps, butterflies, and dragonflies are provided. Members of the Washington Ornithological Society were instrumental in contributing site descriptions or information about their local areas as well as in field-checking the text and maps. Master Artist Tony Angell has illustrated the guide. A Birder's Guide to Washington, the eighteenth ABA Birdfinding Guide, is based on and expanded from Terence R. Wahl and Dennis R. Paulson's A Guide to Bird Finding in Washington, since 1971 the definitive source for birding the state.
