Nature's Year in the Kawarthas Drew Monkman, 2002-11-04

Nature's Year in the Kawarthas is an almanac of key events occurring in the natural world over the course of a year in the Kawartha Lakes district – and in cottage country in general. Covering all areas of our flora and fauna as well as weather and the night sky, the book is a month-by-month chronicle of the mileposts of the passing seasons. From the raucous Spring Peeper chorus of April ... through the sweet scent of milkweed blossoms in July ... and the early-morning mists of September ... to the arrival of the first eagles in December – all are noted for your interest. Whenever you head out on your next walk or look up at the stars, Nature's Year will be your informative guide. For each month, an introductory essay captures the spirit of the season, while an at a glance summary lists the key natural events occurring. Each category in the natural world – from birds to the night sky – is then covered in more detail. Finely detailed drawings complement the text. Author Drew Monkman is a teacher in Peterborough, Ontario. An avid naturalist in the Kawartha Lakes area, he is past president of the Peterborough Field Naturalists.

Regional Geography of the United States and Canada Daniel R. Montello, Michael T. Applegarth, Tom L. McKnight, 2021-03-29 The

fifth and thoroughly revised edition of *Regional Geography of the United States and Canada* provides a rich and comprehensive overview of both the physical and human geography of these two countries, and in the true spirit of geography, the interactions and interrelations of the physical and human. Following long traditions of the discipline of geography, this text incorporates words, maps, drawings, photographs, and numerical data to present its information in an engaging way. After covering beneficial precursor topics—such as the basics of physical and human geography—the text explores fifteen regions of the US and Canada. The authors observe and describe our planet’s geography in thorough and accessible detail, while laying out the spatial basics of the location, shape, and size of the different regions, and summarizes their most distinctive thematic qualities. Physical topics covered include the region’s topography and landforms, soils, climate, hydrography, vegetation, and wildlife. The human topics include the region’s population; the ethnicities and settlement history of its people; economic activities, including agriculture, forestry, mining, fishing, manufacturing, and service industries; cities; and transportation. In-depth essays expand on specific topics of interest and importance, while outlook sections prognosticate about the near future of the

regions. Each chapter concludes with a bibliography of books, articles, and reports that provide further sources for the interested reader.
