Mobile-to-mobile Wireless Channels Alenka Zajić, 2012-12-31 Present-day mobile communications systems can be classified as fixed-to-mobile because they allow mobility on only one end (e.g. the mobile phone to a fixed mobile operator's cell tower). In answer to the consumer demand for better coverage and quality of service, emerging mobile-to-mobile (M-to-M) communications systems allow mobile users or vehicles to directly communicate with each other. This practical book provides a detailed introduction to state-of-the-art M-to-M wireless propagation. Moreover, the book offers professionals guidance for rapid implementation of these communications systems. It offers engineers and students a thorough understanding of signal propagation and channel models for vehicle-to-vehicle, air-to-ground, and underwater vehicle-to-underwater vehicle communications.. This authoritative resource is packed with over 1000 equations and more than 100 illustrations. DVD Included! Contains time-saving MATLAB code for the models discussed in the book, providing valuable tools that engineers can use for their projects in the field.

Academic Press Library in Biomedical Applications of Mobile and Wireless Communications: Wireless UWB Body Area Networks Matti Hamalainen, 2014-03-05 Wireless sensor and body area networks (WSN and WBAN respectively) have been seen as a future way to monitor humans' psycho-physiological signs remotely. There are a number of standards that could be used for building WBAN systems. However, wireless UWB networks based on IEEE 802.15.4a offer the advantages of a large frequency range and low power spectral density, making it suitable for both WSNs and WBANs used for medical applications. The technology has matured sufficiently that it can be used to develop products for the marketplace. This book presents how the IEEE802.15.4-2011 (former IEEE802.15.4a) can be used in wireless body area networks (WBAN) for healthcare and welfare related applications. It gives a short overview on the IEEE802.15.4 family and then gives details of IEEE802.15.4-2011 based solutions.
