Geometric Beadwork Jean Power,2017-05-19 If you enjoyed the book Geometric Beadwork then this second volume in the series is the perfect next step. This book contains over 25 brand new projects covering all aspects of geometric beading as well as 3 of Jean Power's Designer of the Year projects (plus brand new variations on them!) This 128 page book is crammed full of geometric beadwork, techniques and projects to delight and inspire. Featuring over 300 diagrams and photos, and with bracelets, necklaces, chains, brooches, pendants and more there is something for everyone. The book begins with the basics of geometric beadwork before moving onto design & inspiration considerations then then separating into 4 different chapters: Triangles, Squares, and 'The Maths'. In addition to full page photos, so you can see all the detail, every project has: The quantity, size (and where relevant the colour number) of beads you will need The techniques needed (every technique needed is shown in detail at the start of the book or relevant chapter) Detailed step-by-step instruction using a mix of text, diagrams and photos A favourite feature: 'In a nutshell'. This distils each project down to its essential steps meaning you can read that and dive right in if you're more experienced

Type in Motion Jeff Bellantoni,Matt Woolman,2001 Exploding, liquidizing, floating, mutating--the use of type today knows no boundaries. Words on paper have become pictures in themselves, rather than simply segments of sentences. In the popular mediums of television and film, designers today paint moving pictures with words. Type in Motion features projects in video, film, mixed media, digital and event print that are thematically grouped into five sections by the way the kinetic type is used: its precursors; its narrative function; its message potential; its plastic form; and its possibilities for ambient, interactive environments. The work of internationally recognized design studios including Bruce Mau (Toronto), Jonathan Barnbrook (London), and the MIT Media Lab (Boston) are shown alongside the most daring student work from around the world. A dynamic design in itself, Type in Motion will set the standard for the future of typography and design.
