*Mixed Methods and Cross Disciplinary Research* Janet McIntyre-Mills,Norma R. A. Romm,2019-07-12 This book uses mixed methods to extend the concept of “wellbeing stocks” to refer to dynamic ways of working with others. It addresses metaphors and praxis for weaving together strands of experience. The aim of the wellbeing stocks concept is to enable people to re-evaluate economics and to become more aware of the way in which we neglect social and environmental aspects of life. The pursuit of profit at the expense of people

and the environment is a central problem for democracy and governance. The vulnerability of cities is a symptom of the lack of balance between individual and collective needs. This book explores the potential for cities, specifically in the regions of Indonesia, Africa, and Australia, to become more productive as sites for food and water security through more creative use of technology. It highlights the need for partners that see food and security feasible at the household level if supports are provided at the community, national and international level. The book examines how these regions are affected by demographics, climate change and people movements, but also explores ways to establish an effective cultural ecosystem management.

*Thunderclap* Ronald Gaffney, 2020-06-21 "THUNDERCLAP: The Coming Struggle for Acadia" is a fictional tale set during King George's War in America (an offshoot of the War of the Austrian Succession in Europe, 1740 - 1748) and its aftermath. It tells the story of how two military officers - one who is French and one British- are caught up in events leading to the so-called French and Indian War in the theatre of Acadia, 1755-1763. The French officer, a Lieutenant André, finds himself serving in the increasingly desperate effort to oust the British once and for all from their decades-old conquest of Nova Scotia (1710). The British officer, a Captain Bradford, fresh from serving in the suppression of the Scottish Rising (1745-1746), arrives in the midst of the war waged by France and its First Nation or 'Indian' allies against the British in Nova Scotia. He finds himself

assisting the new British governor, Edward Cornwallis, with establishing an English `beachhead` settlement called "Halifax" and expanding British control over the restless French Acadian population through the construction of a series of forts in and around existing Acadian communities. While the careers of the two officers follow parallel yet separate courses during King George's War, they inevitably cross paths and both participate in the cataclysmic clash known as the French and Indian War (1755-1763)-a final conflict which saw the Expulsion of much of the Acadian population from Nova Scotia and a determination of which European power- France or Great Britain- would ultimately emerge supreme on the battlefields of North America. A prequel to my novel "Fire Over Acadia", this new tale introduces readers to the "backstory" for several of my primary characters, and completes a trilogy of tales about the colonial wars impacting Nova Scotia.

**Colonial South Africa and the Origins of the Racial Order** Timothy J. Keegan, 1996  
Keegan disagrees with historians who see the origins of the racial state in the mineral revolution, and finds it instead in the early British rule up to the 1850s when the Cape was integrated into the trading empire. Synthesizing and reinterpreting an array of primary material, he

discusses such events as the emancipation of slaves, the 1820 arrival of British settlers, a series of frontier wars, and the Great Trek of the Boers. Paper edition (unseen), \$14.50. Annotation copyrighted by Book News, Inc., Portland, OR
