Academic Word Lists Keith S. Folse, 2023-05-25 In *Academic Word Lists*, Keith Folse explains how various lists like the Academic Word List (AWL) have become popular tools in the ESL classroom for teaching vocabulary. Following a discussion on the importance of teaching vocabulary, Folse explains why word lists are useful in language learning and how they can help address the lexical gap. He also outlines what words are on the AWL, how the word families are selected, and what teachers should know about other word lists. The book also includes 10 suggestions for using academic word lists in the classroom, including how to use vocabulary notebooks.

How to do Linguistics with R Natalia Levshina, 2015-11-25 This book provides a linguist with a statistical toolkit for exploration and analysis of linguistic data. It employs R, a free software environment for statistical computing, which is increasingly popular among linguists. *How to do Linguistics with R: Data exploration and statistical analysis* is unique in its scope, as it covers a wide range of classical and cutting-edge statistical methods, including different flavours of regression analysis and ANOVA, random forests and conditional inference trees, as well as specific linguistic approaches, among which are Behavioural Profiles, Vector Space Models and various measures of association between words and constructions. The statistical topics are presented comprehensively, but without too much technical detail, and illustrated with linguistic case studies that answer non-trivial research questions. The book also demonstrates how to visualize linguistic data with the help of attractive informative graphs, including the popular ggplot2 system and Google visualization tools. Handbook of Research Methods in Human Memory Hajime Otani, Bennett L. Schwartz, 2018-10-09 The *Handbook of Research Methods in Human Memory* presents a collection of chapters on methodology used by researchers in investigating human memory. Understanding the basic cognitive function of human memory is critical in a wide variety of fields, such as clinical psychology, developmental psychology, education, neuroscience, and gerontology, and studying memory has become particularly urgent in recent years due to the prominence of a number of neurodegenerative diseases, such as Alzheimer's. However, choosing the most appropriate method of research is a daunting task for most scholars. This book explores the methods that are currently available in various areas of human memory research and serves as a reference manual to help guide readers' own research. Each chapter is written by prominent researchers and features cutting-edge research on human memory and cognition, with topics ranging from basic memory processes to cognitive neuroscience to further applications. An Introduction to Religious Language Valerie Hobbs,2020-12-10 Religious language is all around us, embedded in advertising, politics and news media. This book introduces readers to the field of theolinguistics, the study of religious language. Investigating the ways in which people talk to and about God, about the sacred and about religion itself, it considers why people make certain linguistic choices and what they accomplish. Introducing the key methods required for examining religious language, Valerie Hobbs acquaints readers with the most common and important theolinguistic features and their functions. Using critical corpus-assisted discourse analysis with a focus on archaic and other lexical features, metaphor, agency and intertextuality, she examines religious language in context. Highlighting its use in both expected locations, such as modern-day prayer and politics, and unexpected locations including advertising, sport, healthcare and news media, Hobbs analyses the shifting and porous linguistic boundaries between the religious and the secular. With discussion questions and further readings for each chapter, as well as a companion website featuring suggested answers to the reflection tasks, this is the ideal introduction to the study of religious language.
