Morph Mastery: A Morphological Intervention for Reading, Spelling and Vocabulary Louise Selby,2021-07-29 Morph Mastery is an accessible, practical guide designed to support learners with specific learning difficulties (SpLD) who are struggling with spelling, reading and vocabulary. It is an effective, research-based and fun solution for when phonics-based teaching has run its

course. Understanding the morphological regularities in English helps to support both spelling and reading comprehension, yet there are few practical interventions that take a morphological approach. Morph Mastery combines this exciting new approach with tried-and-tested teaching methods that work. The activities in this book follow three engaging ninja-like characters, Prefa, Root and Sufa, who represent the three core components of morphology (prefixes, root words and suffixes) and use their sceptres to craft words. Key features include: • Exciting and engaging activities and games, designed to be used by individuals or small groups • Detailed, curriculum-linked assessments, enabling specific target setting • Photocopiable and downloadable activity sheets and resources Written in a user-friendly tone, for teaching assistants, teachers and other professionals with little or no specialist knowledge, this book is a must for any school with struggling readers and writers aged 9–13.

Featuring case studies and tasks throughout, Corpus Linguistics for Vocabulary provides a clear and accessible guide and is essential reading for students and teachers wanting to understand, appreciate and conduct corpus-based research in vocabulary studies.

Literary Lists Roman Alexander Barton, Eva von Contzen, Anne Rügemeier, 2023-05-23 This book provides a concise introduction to lists in literature from the early modern period to the twenty-first century. Tracing the changing functions of the literary list across time, it offers a broad range of case studies which situate selected enumerations in their respective

contexts and demonstrate the versatility and creative potential of the list form. Starting with a review of previous research on the literary list, the book discusses four main constellations of enumeration: series and the great chain of being; itemization and enumerative realism; 'letteracettera' and experimental list-making; 'white noise' and creative exploits of enumeration between formal playfulness and existential exploration. The epilogue offers an analytical toolkit for the study of literary lists based on rhetorical theory.

Lists Liza Kirwin, 2010-03-15 From the weekly shopping list to the Ten Commandments, our lives are shaped by lists. Whether dashed off as a quick reminder, or carefully constructed as an inventory, this humble form of documentation provides insight into its maker's personal habits and decision-making processes. This is especially true for artists, whose day-to-day acts of living and art-making overlap and inform each other. Artists' lists shed uncover a host of unbeknownst motivations, attitudes, and opinions about their work and the work of others. Lists presents almost seventy artifacts, including to do lists, membership lists, lists of paintings sold, lists of books to read, lists of appointments made and met, lists of supplies to get, lists of places to see, and lists of people who are in. At times introspective, humorous, and resolute, but always revealing and engaging, Lists is a unique firsthand account of American cultural history that augments the personal biographies of some of the most celebrated and revered

artists of the last two centuries. Many of the lists are historically important, throwing a flood of light on a moment, movement, or event; others are private, providing an intimate view of an artist's personal life: Pablo Picasso itemized his recommendations for the Armory Show in 1912; architect Eero Saarinen enumerated the good qualities of the then New York Times art editor and critic Aline Bernstein, his second wife; sculptor Alexander Calder's address book reveals the whos who of the Parisian avant-garde in the early twentieth century. In the hands of their creators, these artifacts become works of art in and of themselves. Lists includes rarely seen specimens by Vito Acconci, Leo Castelli, Joseph Cornell, Hans Hofmann, Franz Kline, Willem de Kooning, Lee Krasner, H. L. Mencken, Robert Motherwell, Barnett Newman, Jackson Pollock, Richard Pousette-Dart, Robert Rauschenberg, Ad Reinhardt, Mark Rothko, Clyfford Still, and Andrew Wyeth.

How to do Linguistics with R Natalia Levshina, 2015-11-25 This book provides a linguist with a statistical toolkit for exploration and analysis of linguistic data. It employs R, a free software environment for statistical computing, which is increasingly popular among linguists. How to do Linguistics with R: Data exploration and statistical analysis is unique in its scope, as it covers a wide range of classical and cutting-edge statistical methods, including different flavours of regression analysis and ANOVA, random forests and conditional inference trees, as well as specific linguistic approaches, among which are Behavioural Profiles, Vector Space

Models and various measures of association between words and constructions. The statistical topics are presented comprehensively, but without too much technical detail, and illustrated with linguistic case studies that answer non-trivial research questions. The book also demonstrates how to visualize linguistic data with the help of attractive informative graphs, including the popular ggplot2 system and Google visualization tools.
