Straight To The Point - Word 2007 Dinesh Maidasani,2008

Recovery and Mental Health David Pilgrim,Ann McCranie,2013-10-18 For most of us, the term 'recovery' in mental health implies hope and normality for those suffering from emotional distress. It is understandable why recovery has therefore become a significant goal for mental health services. But what does recovery mean for those who are struggling to see it through? Is the emphasis on recovery always a positive thing. This book takes a critical sociological look at personal and public assumptions and understandings. In particular: - It explores what the recovery movement signifies today, offering readers a critical, reflexive view of its scientific, policy and political consequences - It considers what recovery means from social, medical and patient perspectives, and the implications of these conflicting views - It reveals some of the risks and benefits for people with mental health problems encountering a system that expects them to recover Offering a comprehensive and thought-provoking overview of the concept of recovery from mental illness, this book is a must-have for students studying mental health across a range of subjects, including sociology, social work, psychology and nursing.

Moving on with ... Microsoft Word 2007 for Windows Alexandra Chester, 2013-05

The EC Common Fisheries Policy Robin Churchill, Daniel Owen, 2010-03-04 The Common Fisheries Policy (CFP) is one of the more controversial of the EU's policies, and is widely blamed both for the poor state of Europe's fish stocks and the woes of its fishermen. Under the CFP, the EU is responsible for a wide range of issues. The EU manages fisheries in the waters of Member States and the fishing activities of Member States' fleets. It negotiates agreements permitting vessels from EU States to fish in the waters of other States, and acts as a member (in place of Member States) in regional fisheries management organizations responsible for fishery management beyond national waters. It regulates the marketing of fish, and lays down the rules governing trade in fishery products. The Common Fisheries Policy thus forms a key part of global fisheries law and policy and is an important factor in protection of the marine environment. This book examines all the varied issues in detail, providing a comprehensive overview of the CFP. It looks at the law relating to the Policy, considering the legislation, treaties and judgments of the European Court of Justice in this area. The policy issues crucial to understanding the law on the CFP and its operation in practice are also explored.

New Orleans Under Reconstruction Michael Sorkin, Carol McMichael Reese, Anthony Fontenot, 2014-05-20 When the levee system protecting New Orleans failed and was overtopped in August 2005 following the arrival of

Hurricane Katrina, 80 percent of the city was flooded, with a loss of 103,000 homes in the metropolitan area. At least 986 Louisiana residents died. The devastation hit vulnerable communities the hardest: the elderly, the poor, and African-Americans. The disaster exposed shocking inequalities in the city. In response, numerous urban plans and myriad architectural projects were proposed. Nearly nine years later, debates about planning and design for recovery, renewal, and resilience continue. This bold, challenging, and informed book gathers together a panorama of responses from writers, architects, planners, historians, and activists-including Mike Davis, Rebecca Solnit, Naomi Klein, Denise Scott Brown, and M. Christine Boyer-and searches for answers to one of the most important questions of our age: How can we plan for the urban future, creating more environmentally sustainable, economically robust, and socially equitable places to live? A 2014 grant from the Graham Foundation for Advanced Studies in the Fine Arts supported in part the publication of this book.
