Jaan Valsiner

Culture as Process Brady Wagoner,Bo Allesøe Christensen,Carolyn Demuth,2021-10-25 Jaan Valsiner has made numerous contributions to the development of psychology over the last 40 years. He is internationally recognized as a leader and innovator within both developmental psychology and cultural psychology, and has received numerous prizes for his work: the Alexander von Humboldt prize, the Hans Killian prize, and the Outstanding International Psychologist Award from the American Psychological Association. Having taught at Universities in Europe, Asia and north and south America, he is currently Niels Bohr professor at Aalborg University, Denmark. This book is the first to discuss in detail the different sides of Valsiner's thought, including developmental science, semiotic mediation, cultural transmission, aesthetics, globalization of science, epistemology, methodology and the history of ideas. The book provides an overview, evaluation and extension of Valsiner's key ideas for the construction of a dynamic cultural psychology, written by his former students and colleagues from around the world.

The Roots of Ayurveda Various,2003-04-29 Ayurveda, the ancient art of healing, has been practiced in India for more than two thousand years and survives today as a living medical tradition whose principles are at the heart of many alternative therapies now used in the West. This science of longevity has parallels with Buddhist thought, and advocates a life of moderation through which the three humors of the body will be brought into balance. The writings selected for this volume are taken from Sanskrit medical texts written by the first Ayurvedic physicians, who lived between the fifth century b.c. and the fourteenth century a.d. Here readers will find wide-ranging and fascinating advice on the benefits of garlic therapy, prayers for protection against malevolent disease deities, surgical techniques, exercise regimens, the treatment of poisons, the interpretation of dreams, and more. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The Reciprocating Pump John E. Miller,1987-11-03 The most complete collection of technical and practical information on reciprocating pumps ever assembled. Discusses pump theory, design, and maintenance. Practical aspects of reciprocating pumps are combined with theory to provide a convincing explanation of previous mysterious and misunderstood parameters, including liquid acceleration, acoustics, and NPSH. Discusses slurry pumping in detail, especially regarding the relatively new industry of transporting solids in the form of a liquid. Subjects covered include pump types, dynamics, net positive, suction head, pulsation, surge control and more. Many tables and charts enhance the utility of the book, and while the subject matter is broad and comprehensive, the language is clear enough to be understood by the engineer and maintenance man alike.

Learning Analytics Gwo-Jen Hwang,Hui-Chun Chu,Chengjiu Yin,2018-12-18 Learning analytics is one of the most important research issues in the field of educational technology. By analyzing logs and records in educational databases and systems, it can provide useful information to teachers, learners, and decision makers – information which they can use to improve teaching strategies, learning performances, and educational policies. However, it is a great challenge for most researchers to efficiently analyze educational data in a meaningful way. This book presents various learning analytics approaches and applications, including the process of determining the coding scheme, analyzing the collected data, and interpreting the findings. This book was originally published as a special issue of Interactive Learning Environments.

Seamless Learning in the Age of Mobile Connectivity Lung-Hsiang Wong,Marcelo Milrad,Marcus Specht,2014-11-02 The book departs from the approach of related titles by focusing on describing and reflecting upon the notion of seamless learning with regard to salient characteristics of learner mobility and bridging of learning experiences across learning spaces. It is the first such work that is solely dedicated to research on and the practice of seamless learning, uniquely combining interpretations, visions, and past research on and practices in seamless learning from diversified perspectives. The book also strikes a good balance between theoretical and practical perspectiveness, going beyond a collection of reports on specific research projects. Instead of thick descriptions of research processes and findings, readers will find significant insights and food for thought intended to inspire further advances in the research on and practice of seamless learning.

The Narrow Road to the Deep North and Other Travel Sketches Matsuo Basho,2020-02-27 'It was with awe That I beheld Fresh leaves, green leaves, Bright in the sun' When the Japanese haiku master Basho composed *The Narrow Road to the Deep North*, he was an ardent student of Zen Buddhism, setting off on a series of travels designed to strip away the trappings of the material world and bring spiritual enlightenment. He writes of the seasons changing, the smell of the rain, the brightness of the moon and the beauty of the waterfall, through which he sensed the mysteries of the universe. These writings not only chronicle Basho's travels, but they also capture his vision of eternity in the transient world around him. Translated with an Introduction by Nobuyuki Yuasa

Seamless Learning Chee-Kit Looi,Lung-Hsiang Wong,Christian Glahn,Su Cai,2019-01-30 This book introduces readers to the latest state of research and development in seamless learning. It consolidates various approaches to and practices in seamless learning from a range of techno-pedagogical, socio-situated and socio-cultural perspectives. Further, it details our current understanding of learning in both formal and informal settings, crossover learning, incidental learning, and context-based learning approaches, together with these aspects' linkages to the notion of seamlessness. The book is divided into sections addressing the theorization of seamless learning, understanding informal learning, research methodological issues, technology-enabled seamless learning and real-world applications of seamless learning.

Practice as Research Estelle Barrett,Barbara Bolt,2014-06-10 Practice-led research is a burgeoning area across the creative arts, with studio informed doctorates frequently favoured over traditional approaches to research. *Practice as Research: Approaches to Creative Arts Enquiry* is specifically designed as a training tool and is structured on the model used by most research programmes. A comprehensive introduction lays out the book's framework and individual chapters provide concrete examples of studio-based research in art, film and video, creative writing and dance. Comprehensive in its approach, the volume draws on thinkers including Deleuze,

Bourdieu and Heidegger in its examination of the relationship between practice and theory demonstrating how practice can operate as a valid alternative mode of enquiry to traditional scholarship.

Striving for the Whole Jaan Valsiner, 2017-09-08 This unusual collection explores the development of ideas in psychology's past, and shapes them into a valuable resource for ideas in the discipline's future, with particular emphasis on holistic traditions in psychology. Diriwachter and Valsiner focus on developmental holistic psychology as advocated by the second school of Leipzig in Germany. Although largely neglected, this school of thought has provided some of the fundamental ideas necessary for a truly holistic approach in psychology. This volume includes Leibniz's dynamic holism and Ehrenfels' discussion about Gestalt qualities, which has generally been acknowledged as a major milestone in the formation of Gestalt psychology. Each chapter looks at the possible future of holistic psychology. *Striving for the Whole* contains several well-thought out discussions on possible elaborations of holistic psychology by contrasting it with Ernst Boesch's cultural psychology, Pierre Janet's theory on emotions, and Jan Smuts holistic approach to personality theory. Discussions of holistic approaches in biology and evolutionary psychology, as well as a renewed look at Lloyd Morgan's comparative methodology, complete the volume. *Striving for the Whole* has been written by an international group of authors and will be of interest to students of the social sciences and intellectual history, and anyone who wants to dive deeper into holistic approaches that maintain their ties with empirical methodology. It is ideal for graduate and upper-level undergraduate courses in psychology.

Knowledge Creation in Education Seng Chee Tan, Hyo Jeong So, Jennifer Yeo, 2014-06-12 This book arises from research conducted through Singapore's National Institute of Education on such topics as integrating knowledge building pedagogies into Singaporean classrooms, with both students and teachers across school levels, from primary schools to high schools. Additionally, international scholars contribute research on theories of knowledge creation, methodological foundations of research on knowledge creation, knowledge creation pedagogies in classrooms and knowledge creation work involving educators. The book is organized in two sections. Section A focuses on theoretical, technological and methodological issues, where sources of justification for claims are predominantly theories and extant literature, although empirical evidence is used extensively in one chapter. Section B reports knowledge creation practices in schools, with teachers, students or both; the key sources of justification for claims are predominantly empirical evidence and narratives of experience. The editor asserts that schools should focus on developing students' capacity and disposition in knowledge creation work; at the same time, leaders and teachers alike should continue to develop their professional knowledge as a community. In the knowledge building vernacular, the chapters are knowledge artifacts – artifacts that not only document the findings of the editors and authors, but that also mediate future advancement in this area of research work. The ultimate aim of the book is to inspire new ideas, and to illuminate the path for researchers of similar interest in knowledge creation in education.

Turner Franny Moyle, 2016-10-25 The life of one of Western art's most admired and misunderstood painters J.M.W. Turner is one of the most important figures in Western art, and his visionary work paved the way for a revolution in landscape painting. Over the course of his lifetime, Turner strove to liberate painting from an antiquated system of patronage. Bringing a new level of expression and color to his canvases, he paved the way for the modern artist. Turner was very much a man of his changing era. In his lifetime, he saw Britain ravaged by Napoleonic wars, revived by the Industrial Revolution, and embarked upon a new moment of Imperial glory with the ascendancy of Queen Victoria. His own life embodied astonishing transformation. Born the son of a barber in Covent Garden, he was buried amid pomp and ceremony in St. Paul's Cathedral. Turner was accepted into the prestigious Royal Academy at the height of the French Revolution when a climate of fear dominated Britain. Unable to travel abroad he explored at home, reimagining the landscape to create some of the most iconic scenes of his country. But his work always had a profound human element. When a moment of peace allowed travel into Europe, Turner was one of the first artists to capture the beauty of the Alps, to revive Venice as a subject, and to follow in Byron's footsteps through the Rhine country. While he was commercially successful for most of his career, Turner's personal life remained fraught. His mother suffered from mental illness and was committed to Bedlam. Turner never married but had several long-term mistresses and illegitimate daughters. His erotic drawings were numerous but were covered up by prurient Victorians after his death. Turner's late, impressionistic work was held up by his Victorian detractors as example of a creeping madness. Affection for the artist's work soured. John Ruskin, the greatest of all 19th century art critics, did what he could to rescue Turner's reputation, but Turner's very last works confounded even his greatest defender. *TURNER* humanizes this surprising genius while placing him in his fascinating historical context. Franny Moyle brilliantly tells the story of the man to give us an astonishing portrait of the artist and a vivid evocation of Britain and Europe in flux.

The Forgetting of Air in Martin Heidegger Luce Irigaray, 1999 A feminist critique of Heidegger's key concepts, arguing that he overlooks an implicit debt to the spatiality of air - the element and dimension within which a new style of thinking and existing becomes possible, a new and more balanced, feminist relationship between thinking and nature.
