High Attention Reading Elizabeth Hale,2022 High Attention Reading offers a new way to get students of all reading levels to independently read informational texts with more effort, attention, and stamina. Hale argues that increasing the number of informational texts children read is important but not enough to achieve this goal. In order to prepare students for the reading demands of high school, it is essential that we provide strategic scaffolding for the habits of mind required to read this genre at a high level and the motivation to do so. The author introduces elementary and middle school teachers to a format called HART (High Attention Reading through Talking) that uses purposeful, intermittent student talk to heighten engagement and accountability during independent reading. The book includes easy-to-implement lessons to get started with HART, as well as discussions about the relationships among motivation, engagement, and content area reading. Chapters describe how HART scaffolds and supports student ownership of background knowledge, content vocabulary, and critical thinking about texts. Teachers will learn how to create conditions that foster motivation and engagement with informational text, while also creating authentic accountability to help students read to their potential. Book Features: An approach to independent reading that can be incorporated into any reading curriculum, from reading workshop to more structured comprehensive programs.Practical information for how to impact a difficult to reach aspect of reading—the internal effort students make while reading complex text independently.Strategies for building students’ critical thinking through discussion and writing. Guidance for how to increase student ownership of attending to background knowledge and content vocabulary. A framework that can be used by reading and content (science and social studies) teachers in both elementary and middle school. Dedicated discussions on how to differentiate HART for English Learners.Lessons that include descriptive transcripts, reproducible supportive materials, and access to downloadable PowerPoints.

Energize Education through Open Source Christopher Whittum, M.Ed.,2013-11 For many schools in today's economy, money is tight, and costs must be closely monitored. With this in mind, there is one area where educators can save: free, open source software. In *Energize Education through Open Source*, Christopher D. Whittum explains the ins and outs of a huge repository of educational and productivity software that is available and open source. Filled with practical examples, this guide shares how this software and hardware can be obtained, provides suggestions for integrating it, and shows how schools can find the options that work best for their students and teachers. Whittum, who has worked with computers for more than thirty years, addresses and explains the Linux operating system, discusses how the open source products can be integrated into existing curricula, and provides suggestions for applications that could serve as aids to learning. *Energize Education Through Open Source* provides a feasible technology solution for schools facing financial barriers.

Readers Writing Elizabeth Hale,2023-10-10 When faced with a blank page in their readers' notebooks, students often fall back on what is familiar: summarizing. Despite our best efforts to model through comprehension strategies what good readers do, many students struggle to transfer this knowledge and make it their own when writing independently about books. *Readers Writing*, ' Elizabeth Hale offers ninety-one practical lessons that show

teachers how students of all ability levels can use readers' notebooks to think critically,' on their own,' one step at a time. Each of the lessons uses a fiction or nonfiction book to address a comprehension strategyquestioning, connecting, analyzing, synthesizing, evaluating, visualizing, or monitoringby showing students one specific way they can write about their thinking. Each lesson also provides an example of how to model the strategy. All of the lessons follow a similar format with five componentsName It, Why Do It?, Model It, Try It, and Share Itand include time for students to actively process what they learn by talking about and trying out the strategy in their readers' notebooks. Elizabeth also provides suggestions for supporting student independence, managing independent writing time, scaffolding comprehension of nonfiction texts as well as assessing and conferencing with readers' notebooks. Helpful appendices include a table that illustrates how each lesson aligns with the Common Core State Standards and a list of additional titles that can be used to demonstrate each of the ninety-one lessons. ' ' ' ' ' Readers Writing' gives teachers a way to engage all children with readers' notebooks, to learn the language of thinking, one strategy at a time, and to become lifelong readers who can think and write critically on their own.

From Clery's Clock to Wanderly Wagon Damian Corless,2014-09-15 Kerrygold butter. The Dublin Spire. The Buntús Cainte booklet. The DeLorean sports car. All of these things are an indisputable part of Irish history, yet never quite made the school curriculum. Damian Corless uses his trademark wit to trawl through our past and capture fleeting moments on the way to modern Ireland. Old reliables like the Angelus Bell, the Aran sweater, the shillelagh and the Jack Charlton mug spring fresh surprises. This is a seriously entertaining ramble through an alternative history of Ireland that you weren't taught at school. Also by this author: Looks Like Rain: 9,000 Years of Irish Weather
