Shapers of Christian Orthodoxy Bradley G. Green,2010-10-05 The purpose of this volume is threefold: to introduce a selection of key early and medieval theologians, to strengthen the faith of evangelical Christians by helping them to understand the riches of the church's theological reflection, and to help them learn how to think theologically--From publisher description.

Philosophical Sovietology Helmut Dahm,J.E. Blakeley,George L. Kline,2012-12-06 On February 24-25, 1956, in a closed session of the 20th Congress of the Communist Party of the Soviet Union, Nikita S. Khrushchev made his now famous speech on the crimes of the Stalin era. That speech marked a break with the past and it marked the end of what J.M. Bochenski dubbed the dead period of Soviet philosophy. Soviet philosophy changed abruptly after 1956, especially in the area of dialectical materialism. Yet most philosophers in the West neither noticed nor cared. For them, the resurrection of Soviet philosophy, even if believable, was of little interest. The reasons for the lack of belief and interest were multiple. Soviet philosophy had been dull for so long that subtle differences made little difference. The Cold War was in a frigid period and reinforced the attitude of avoiding anything Soviet. Phenomenology and exis tentialism were booming in Europe and analytic philosophy was king on the Anglo-American philosophical scene. Moreover, not many philosophers in the West knew or could read Russian or were motivated to learn it to be able to read Soviet philosophical works. The launching of Sputnik awakened the West from its self complacent slumbers. Academic interest in the Soviet Union grew.

On the Road with Saint Augustine James K. A. Smith,2019-10-01 □ Publishers Weekly starred review One of the Top 100 Books and One of the 5 Best Books in Religion for 2019, Publishers Weekly Christianity Today 2020 Book Award Winner (Spiritual Formation) Outreach 2020 Resource of the Year (Spiritual Growth) Foreword INDIES 2019 Honorable Mention for Religion This is not a book about Saint Augustine. In a way, it's a book Augustine has written about each of us. Popular speaker and award-winning author James K. A. Smith has spent time on the road with Augustine, and he invites us to take this journey too, for this ancient African thinker knows far more about us than we might expect. Following Smith's successful *You Are What You Love*, this book shows how Augustine can be a pilgrim guide to a spirituality that meets the complicated world we live in. Augustine, says Smith, is the patron saint of restless hearts--a guide who has been there, asked our questions, and knows our frustrations and failed pursuits. Augustine spent a lifetime searching for his heart's true home and he can help us find our way. What makes Augustine a guide worth considering, says Smith, is that he knows where home is, where rest can be found, what peace feels like, even if it is sometimes ephemeral and elusive along the way. Addressing believers and skeptics alike, this book shows how Augustine's timeless wisdom speaks to the worries and struggles of contemporary life, covering topics such as ambition, sex, friendship, freedom, parenthood, and death. As Smith vividly and colorfully brings Augustine to life for 21st-century readers, he also offers a fresh articulation of Christianity that speaks to our deepest hungers, fears, and hopes.

Lake of Fire - Hope for the Wicked One Day? - Essays in First Christianity Jonathan Ramachandran,2019-01-01 Christ Centered Universalism has been a Hope in First Christianity among the earliest orthodox Christians as testified even as late in St. Augustine of Hippo's infamous quote in that even he didn't call them as heretics but soft hearted Christians who did not deny Holy Scripture. A form of Christian Universalism by Origen of Alexandria may have been condemned by a later council. For protestants, please take note that both St. Augustine and that later council consists of members who Pray to Virgin Mary something which is absent from even Origen of Alexandria. Therefore, just because something is majority by later early Christianity it does not necessarily mean that it was First Christianity Doctrine. In light of this, we discuss various viewpoints, quotes by Church Fathers and Ancient Christian Writings in support of this Hope. Since the time lapse and loss of records to these First Christians being replaced by later Christianity is hard to trace or prove due to scarcity of evidences, nevertheless we endeavour to present as much as we can including some rarely known quotes within Christian Universalism Hopefuls itself. An example of a set of rare quotes which point to Christ Centered Universalism in this book which may not be popularly known is that by St. Hillary of Poitiers, the Champion of Trinity in the West and a set of interesting quotes likewise by St. Ignatius of Antioch who was a direct disciple if St. John the Apostle of Christ himself. We see traces of such an understanding in a quote by St. Justin Martyr toward the Wicked being made subject to obey God eventually as one child while St. Ireneous of Lyons has a few interesting quotes especially those that relate to the Concept of Ages/Aeons/Olam to come where in a particular instance, St. Ireneus clearly shows that the strongest phrase

ages of Ages refers to the subset ages out of a larger set of Ages implying limitedness. Just like God of Abraham does not limit God to Abraham only, the phrase God's Glory to the Age/Aeon/Olam (singular) need not limit God's Glory to one Age only but may be highlighting it for that Age (unknown long time period). We do not need to teach it as a 100% certain doctrine but we may hope for it as the Bible Verses can also be understood consistently to present this Hope in some Way. One Day we will know and all things are possible with God Who Alone Decides. Peace to you.

Sol-Gel Optics Lisa C. Klein,2013-11-27 Sol--Gel--Optics encompasses numerous schemes for fabricating optical materials from gels -- materials such as bulk optics, optical waveguides, doped oxides for laser and nonlinear optics, gradient refractive index (GRIN) optics, chemical sensors, environmental sensors, and `smart' windows. Sol--Gel--Optics: Processing and Applications provides in-depth coverage of the synthesis and fabrication of these materials and discusses the optics related to microporous, amorphous, crystalline and composite materials. The reader will also find in this book detailed descriptions of new developments in silica optics, bulk optics, waveguides and thin films. Various applications to sensor and device technology are highlighted. For researchers and students looking for novel optical materials, processing methods or device ideas, Sol--Gel--Optics: Processing and Applications surveys a wide array of promising new avenues for further investigation and for innovative applications. (This book is the first in a new subseries entitled `Electronic Materials: Science and Technology').

The History of the Jewish People in the Age of Jesus Christ: Volume 3.i Emil Schürer,Geza Vermes,Fergus Millar,2014-01-30 Emil Schürer's Geschichte des jüdischen Volkes im Zeitalter Jesu Christi, originally published in German between 1874 and 1909 and in English between 1885 and 1891, is a critical presentation of Jewish history, institutions, and literature from 175 B.C. to A.D. 135. It has rendered invaluable services to scholars for nearly a century. The present work offers a fresh translation and a revision of the entire subject-matter. The bibliographies have been rejuvenated and supplemented; the sources are presented according to the latest scholarly editions; and all the new archaeological, epigraphical, numismatic and literary evidence, including the Dead Sea Scrolls and the Bar Kokhba documents, has been introduced into the survey. Account has also been taken of the progress in historical research, both in the classical and Jewish fields. This work reminds students of the profound debt owed to nineteenth-century learning, setting it within a wider framework of contemporary knowledge, and provides a foundation on which future historians of Judaism in the age of Jesus may build.

Microscale Surface Tension and Its Applications Pierre Lambert,Massimo Mastrangeli,2019-10-21 Building on advances in miniaturization and soft matter, surface tension effects are a major key to the development of soft/fluidic microrobotics. Benefiting from scaling laws, surface tension and capillary effects can enable sensing, actuation, adhesion, confinement, compliance, and other structural and functional properties necessary in micro- and nanosystems. Various applications are under development: microfluidic and lab-on-chip devices, soft gripping and manipulation of particles, colloidal and interfacial assemblies, fluidic/droplet mechatronics. The capillary action is ubiquitous in drops, bubbles and menisci, opening a broad spectrum of technological solutions and scientific investigations. Identified grand challenges to the establishment of fluidic microrobotics include mastering the dynamics of capillary effects, controlling the hysteresis arising from wetting and evaporation, improving the dispensing and handling of tiny droplets, and developing a mechatronic approach for the control and programming of surface tension effects. In this Special Issue of Micromachines, we invite contributions covering all aspects of microscale engineering relying on surface tension. Particularly, we welcome contributions on fundamentals or applications related to: Drop-botics: fluidic or surface tension-based micro/nanorobotics: capillary manipulation, gripping, and actuation, sensing, folding, propulsion and bio-inspired solutions; Control of surface tension effects: surface tension gradients, active surfactants, thermocapillarity, electrowetting, elastocapillarity; Handling of droplets, bubbles and liquid bridges: dispensing, confinement, displacement, stretching, rupture, evaporation; Capillary forces: modelling, measurement, simulation; Interfacial engineering: smart liquids, surface treatments; Interfacial fluidic and capillary assembly of colloids and devices; Biological applications of surface tension, including lab-on-chip and organ-on-chip systems.

Heterotopia and the City Michiel Dehaene,Lieven De Cauter,2008-05-15 Heterotopia, literally meaning ‘other place’, is a rich concept in urban design that describes a space that is on the margins of ordered or civil society, and one that possesses multiple, fragmented or even incompatible meanings. The term has had an impact on architectural and urban theory since it was coined by Foucault in the late 1960s but it has remained a source of confusion and debate since. Heterotopia and the City seeks to clarify this concept and investigates the heterotopias which exist throughout our contemporary world: in museums, theme parks, malls, holiday resorts, gated communities, wellness hotels and festival markets. With theoretical contributions on the concept of heterotopia, including a new translation of Foucault’s influential 1967 text, Of Other Space and essays by well-known scholars, the book comprises a series of critical case studies, from Beaubourg to Bilbao, which probe a range of (post)urban transformations and which redirect the debate on the privatization of public space. Wastelands and terrains vagues are studied in detail in a section on urban activism and transgression and the reader gets a glimpse of the extremes of our dualized, postcivil condition through case studies on Jakarta, Dubai, and Kinshasa. Heterotopia and the City provides a collective effort to reposition heterotopia as a crucial concept for contemporary urban theory. The book will be of interest to all those wishing to understand the city in the emerging postcivil society and post-historical era. Planners, architects, cultural theorists, urbanists and academics will find this a valuable contribution to current critical argument.

Patterns of Christological Categorisation Marvin C. Sanguinetti,2023-03-28 This book focuses on Christological-Monotheism, an underexplored area which combines two disciplines of theological appraisal often addressed as separate subjects. Christological-Monotheism is underexplored in the literature, and even more underexplored are interpretations of Christological-Monotheism from the perspectives of Christian voices within the “Oneness Pentecostal” faith tradition. Oneness Pentecostalism offers opposing perspectives to what is considered ‘fixed orthodoxy’ within the Christian faith traditions: i.e., its views differ on doctrines relating to the nature of God and Christ from accepted norms. This project seeks to include various Oneness Pentecostal

interpretations to commonly held perspectives, and explore what such might look like when juxtapose with Christian orthodoxy. Moreover, it rereads perspectives about the relationship between God and Christ offered by both traditions in the contexts of earlier contributors to Christian history, all the way to the Second Temple Jewish periods, and includes similar patterns exposed by various groups/scholars along this trajectory.

Microbial Ecology in States of Health and Disease Institute of Medicine,Board on Global Health,Forum on Microbial Threats,2014-02-18 Individually and collectively, resident microbes play important roles in host health and survival. Shaping and shaped by their host environments, these microorganisms form intricate communities that are in a state of dynamic equilibrium. This ecologic and dynamic view of host-microbe interactions is rapidly redefining our view of health and disease. It is now accepted that the vast majority of microbes are, for the most part, not intrinsically harmful, but rather become established as persistent, co-adapted colonists in equilibrium with their environment, providing useful goods and services to their hosts while deriving benefits from these host associations. Disruption of such alliances may have consequences for host health, and investigations in a wide variety of organisms have begun to illuminate the complex and dynamic network of interaction - across the spectrum of hosts, microbes, and environmental niches - that influence the formation, function, and stability of host-associated microbial communities. Microbial Ecology in States of Health and Disease is the summary of a workshop convened by the Institute of Medicine's Forum on Microbial Threats in March 2013 to explore the scientific and therapeutic implications of microbial ecology in states of health and disease. Participants explored host-microbe interactions in humans, animals, and plants; emerging insights into how microbes may influence the development and maintenance of states of health and disease; the effects of environmental change(s) on the formation, function, and stability of microbial communities; and research challenges and opportunities for this emerging field of inquiry.

Medieval to Renaissance in English Poetry A. C. Spearing,1985-09-05 This is a critical book to study in depth the transition from the 'medieval' to the 'Renaissance' periods in English literature. What exactly, in a literary context, do those terms designate? Mr Spearing argues that, far from being fixed determinants, they demand careful critical reappraisal. He rewrites the literary history of the period from Chaucer to the early Spenser in a way that puts emphasis on the importance of Chaucer's influence on a tradition which in many important respects began with him. Many literary and cultural qualities, normally considered 'Renaissance', can be seen to have their origins, so far as the English tradition is concerned, in Chaucer's contacts with Italian culture. This book shows how Chaucer can be regarded as a Renaissance poet whose work was medievalised by his admiring successors. Traditions other than the Chaucerian are examined in this light, and the author engages with the larger problems of literary history through the detailed analysis of specimen texts.

Early Medieval Text and Image Volume 2 Jennifer O'Reilly,2019-06-19 When she died in 2016, Dr Jennifer O'Reilly left behind a body of published and unpublished work in three areas of medieval studies: the iconography of the Gospel Books produced in early medieval Ireland and Anglo-Saxon England; the writings of Bede and his older Irish contemporary, Adomnán of Iona; and the early lives of Thomas Becket. In these three areas she explored the connections between historical texts, artistic images and biblical exegesis. This volume brings together seventeen essays, published between 1984 and 2013, on the interplay of texts and images in medieval art. Most focus on the manuscript art of early medieval Ireland and England. The first section includes four studies of the Codex Amiatinus, produced in Northumbria in the monastic community of Bede. The second section contains seven essays on the iconography and text of the Book of Kells. In the third section there are five studies of Anglo-Saxon Art, examined in the context of the Benedictine Reform. A concluding essay, on the medieval iconography of the two trees in Eden, traces the development of a motif from Late Antiquity to the end of the Middle Ages.(CS1080)
