Jaap van Ginneken

The Newspaper Reader Seth Frechie, Harold William Halbert, Charles William McCormick, 2004-08 This book allows readers to bring newspapers into their everyday lives by promoting the idea that newspapers give us the opportunity to perceive ourselves as intrinsically involved in local, national, and global discussions. The only book of its kind on the market today, it provides a base for the development of critical thinking, reading, and writing skills as it shows ways in which we can reference newspaper articles as we work through new ideas and problems we encounter. This reader contains timely and interesting selections, and its organization mirrors that of any typical newspaper. Selections are divided into a News section, a Business section, a Discovery section, a Sports section, and a Life section. Each storyline presented includes a sample of an editorial, a report, and a feature article. Storylines include: the Jessica Smart case; the USA Patriot Act; Jayson Blair and The New York Times; Amazon.com; lotteries; fast food; the Space Shuttle disaster; cyberspace; cloning; Michael Jordan; Nancy Kerrigan and Tonya Harding; The US Olympic Hockey Team and the Gold Medal; fashion and fads; diet; and the 9/11 attacks. An excellent and exciting book that provides an excellent tutorial on how to read a newspaper for maximum effect and benefit. Will provide special insight for ESL students and others learning about newspapers and article-writing.

The Function of Newspapers in Society Shannon E. Martin, David A. Copeland, 2003 The demise of the newspaper has long been predicted. Yet newspapers continue to survive globally despite competition from radio, television, and now the Internet, because they serve core social functions in successful cultures. Initial chapters of this book provide an overview of the development of modern newspapers. Subsequent chapters examine particular societies and geographic regions to see what common traits exist among the uses and forms of newspapers and those artifacts that carry the name newspaper but do not meet the commonly accepted definition. The conclusion suggests that newspapers are of such core value to a successful society that a timely and easily accessible news product will succeed despite, or perhaps because of, changes in reading habits and technology.

Cultures and Globalization Helmut K Anheier, Yudhishtir Raj Isar, 2008-09-17 The world's cultures and their forms of creation, presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization series is designed to fill this void in our knowledge. In this series, leading experts and emerging scholars track cultural trends connected to globalization throughout the world, resulting in a powerful analytic tool-kit that encompasses the transnational flows and scapes of contemporary cultures. Each volume presents data on cultural phenomena through colourful, innovative information graphics to give a quantitative portrait of the cultural dimensions and contours of globalization. This second volume The Cultural Economy analyses the dynamic relationship in which culture is part of the process of economic change that in turn changes the conditions of culture. It brings together perspectives from different disciplines to examine such critical issues as: • the production of cultural goods and services and the patterns of economic globalization • the relationship between the commodification of the cultural economy and the aesthetic realm • current and emerging organizational forms for the investment, production, distribution and consumption of cultural goods and services • the complex relations between creators, producers, distributors and consumers of culture • the policy implications of a globalizing cultural economy By demonstrating empirically how the cultural industries interact with globalization, this volume will provide students of contemporary culture with a unique, indispensable reference tool.

International Marketing Sak Onkvisit, John J. Shaw, 2004 Marketing is a universal activity that is widely applicable, regardless of the political, social or economic systems of a particular country. However, this doesn't mean that consumers in different parts of the world should be satisfied in the same way. The 4th edition of International Marketing has been written to enable managers and scholars to meet the international challenges they face everyday. It provides the solid foundation required to understand the complexities of marketing on a global scale. The book has been fully updated with topical case studies, examples of contemporary marketing campaigns, the most relevant discussion topics as well as the most up-to-date theories, references and research findings. It is this combination of theory and practice that makes this textbook truly unique, presenting a fully rounded view of the topic rather than an anecdotal or descriptive one alone. The book includes chapters on: * Trade distortions and marketing barriers * Political and legal environments * Culture * Consumer behaviour * Marketing research * Promotion and pricing strategies * Currencies and foreign exchange Accessibly written and designed, this book is the most international book on marketing available that can be used by undergraduates and postgraduates the world over. A companion website provides additional material for lecturers and students alike.

Media and Culture Richard Campbell, Christopher R. Martin, Bettina Fabos, 2011-02-23 It's no secret today's media landscape is evolving at a fast and furious pace — and students are experiencing these developments firsthand. While students are familiar with and may be using the latest products and newest formats, they may not understand how the media has evolved to this point or what all these changes mean. This is where Media and Culture steps in. The eighth edition pulls back the curtain and shows students how the media really works, giving students the deeper insight and context they need to become informed media critics.

Newspaper Journalism Peter Cole, Tony Harcup, 2009-12-01 Are newspapers faced with an existential threat or are they changing to meet the challenges of a digital world? With the newspaper's role in a state of fundamental redefinition, Newspaper Journalism offers a timely and up to the minute analysis of newspapers today, in the context of their historical importance to society. Drawing on their extensive experience in academia and also across local, national, mainstream and alternative newspapers, Cole and Harcup write clearly and engagingly from both industry and scholarly perspectives, and contend that, far from dying, newspapers are doing what they have always done: adapting to a changing environment. This text is essential reading for all students of the press, with comprehensive and critical coverage of the most important debates in the study of newspaper journalism - from ethics and investigative journalism to political economy and the future of the industry. Given the shifting boundaries and central importance of newspapers, it will be of interest to all students of journalism and the media. Praise for the Journalism Studies: Key Texts series: 'It is easy to describe a good textbook for a specific journalistic format... The ideal book has to satisfy a list of requirements that are also bullet-pointed in journalism assignment outlines. A text has to: synthesize the existing body of knowledge; explain concepts clearly; have a logical order of topics; and provide enough information and directions to pursue further study. One may also hope it would include real life examples and be lucid, vivid and a pleasure to read. Hard to find? Not anymore. The new SAGE series Journalism Studies: Key Texts satisfies the main requirements on the list. Carefully planned and meticulously edited by Martin Conboy, David Finkelstein and Bob Franklin, the textbook series is a welcome contribution to the literature of journalism studies... All three books follow the same structural template: an overview of historical development; explication of the political and economic frameworks within particular types of journalism; a review of contemporary practices; social demographics; a comparative analysis of practices around the world; a summary of main conceptual approaches; an indication of future directions; recommendations for further reading. This strong organization resembles a template for a course outline. This is intentional because the series is aimed both at students and their practice-based lecturers, who often come straight from industry and need time to adjust to the academic environment... [The series] achieves its aim to bridge the sometimes too evident dissonance between journalism theory and practice... They successfully situate discussions about journalism in social and historical contexts. We see the faces of individual journalists, the circumstances of news production, the relationship with owners, the battle between the public service and the profit nature of news, the relevance of journalism work. The detailed account of the conditions under which newspaper, radio and alternative journalism is produced and performed make the Journalism Studies: Key Texts series mandatory reading for both journalism students and their lecturers' - Verica Rupar, Journalism Studies

Understanding Global News Jaap van Ginneken,1998-01-23 A lively and critical introduction to the news media, this book has been written specifically for media students and trainee journalists. Understanding Global News invites the reader to explore contemporary journalistic practice, and questions the assumption that the media provide a mere window on the world. Challenging the often unquestioned notions of media objectivity, the author turns the classic questions: Who? What? When? and Why? onto the news media. By employing a range of theoretical perspectives and a large variety of examples, the author demonstrates the way in which our perceptions of the world are constructed by the news media.
