We Dig Worms! Kevin McCloskey, 2019-04-02 What do worms do all day? How do they see? And why are they so cold and squishy? Find out by going on an underground tour through the hidden world of earthworms. Kevin McCloskey's book even shows readers what's happening inside a worm's body— brain, crop, gizzard, and more. The book takes young readers from “ew!” to “wow!” as they learn about the different ways worms work hard to help the earth. Kids may pick up many of the life science lessons contained here on their first read, but they'll return to *We Dig Worms!* again and again to rediscover its story. Deceptively simple, humble yet charming, this little book reaches surprising depths...just like, well, a worm!

Parallel Computer Routing and Communication Kevin Bolding, Lawrence Snyder, 1994-09-28 This volume contains revised versions of the 23 regular papers presented at the First International Workshop on Parallel Computer Routing and Communication (PCRCW '94), held in Seattle, Washington in May 1994. Routing for parallel computer communication has recently experienced almost explosive activity: ever increasing processor speeds are placing greater demands on interprocessor communication, while technological advances offer new capabilities to respond to those demands. The contributions from industry and academia cover all areas, from details of hardware design to proofs of theoretical results. There are also many papers dealing with the performance of various adaptive routing schemes, new network topologies, network interfaces, and fault-tolerant issues.
