Search History Eugene Lim,2021-10-05 Search History oscillates between a wild cyberdog chase and lunch-date monologues as Eugene Lim deconstructs grieving and storytelling with uncanny juxtapositions and subversive satire. Frank Exit is dead—or is he? While eavesdropping on two women discussing a dog-sitting gig over lunch, a bereft friend comes to a shocking realization: Frank has been reincarnated as a dog! This epiphany launches a series of adventures—interlaced with digressions about AI-generated fiction, virtual reality, Asian American identity in the arts, and lost parents—as an unlikely cast of accomplices and enemies pursues the mysterious canine. In elliptical, propulsive prose, Search History plumbs the depths of personal and collective consciousness, questioning what we consume, how we grieve, and the stories we tell ourselves.

The Regional Economics of Technological Transformations Roberta Capello,Camilla Lenzi,2021-08-30 The Regional Economics of Technological Transformations provides a comprehensive overview of 4.0 technological transformations in Europe and their socio-economic impact, with a particular emphasis on the regional dimension of the phenomena. The authors employ extensive original data and robust quantitative methods to analyse technological change in all regions of the 27 EU countries plus the UK and shed light on this trend for Europe and beyond. Structured in four parts, the book first looks at conceptual definitions, empirical measurements and expected impacts on both the economic performance (GDP and productivity growth) and the labour market, and then moves on to analyse where 4.0 technological transformation actually takes place in Europe and the reasons for this. Next, it offers original empirical evidence on the impacts of the different transformations, and of their intertwined effects, on both the economy and the society. Finally, the book explores the policy implications of this technological transformation. This book will be valuable reading for advanced students, researchers and policymakers working across regional economics, industrial economics and innovation policy. It will be of primary interest to regional scientists interested in the field, who may enjoy the conceptual and empirical solutions to the study of a very complex, timely and still largely unexplored theme. Sociologists, engineers and political economists can benefit from the book's analysis, noting the urgency of the development of new ethical rules governing the new digital and labour markets. Finally, the book may appeal to policymakers interested in opportunities to increase regional competitiveness and sustainability goals through the advent of 4.0 technologies.

The Hierarchies Ros Anderson,2021-09-07 In this stunningly original debut novel that will appeal to readers of The Power or Never Let Me Go, a synthetic woman—created solely to serve her human “Husband”—slowly comes to the realization that her Husband is far less invested in her well-

being than she is in his . . . sending her on a harrowing emotional journey of self-realization as she asks herself: WHAT IS LOVE—OR CONSENT—IF YOU'RE PROGRAMMED TO OBEY? Sylv.ie is a fully sentient robot, designed to cater to her Husband's every whim. She lives alone on the top floor of his luxurious home, her existence barely tolerated by his human wife and concealed from their child. Between her Husband's visits, deeply curious about the world beyond her room, Sylv.ie watches the family in the garden—hears them laugh, cry, and argue. Longing to experience more of life, she confides her hopes and fears only to her diary. But are such thoughts allowed? And if not, what might the punishment be? As Sylv.ie learns more about the world and becomes more aware of her place within it, something shifts inside her. Is she malfunctioning, as her Husband thinks, or coming into her own? As their interactions become increasingly fraught, she fears he might send her back to the factory for reprogramming. If that happens, her hidden diary could be her only link to everything that came before. And the only clue that she is in grave danger. Set in a recognizable near future and laced with dark, sly humor, Ros Anderson's deeply observant debut novel is less about the fear of new technology than about humans' age-old talent for exploitation. In a world where there are now two classes of women—"born" and "created"—the growing friction between them may have far-reaching consequences no one could have predicted.

The Cult of Smart Fredrik deBoer,2020-08-04 Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

Between the World and Me Ta-Nehisi Coates,2015-07-14 #1 NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • NAMED ONE OF TIME'S TEN BEST NONFICTION BOOKS OF THE DECADE • PULITZER PRIZE FINALIST • NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST • ONE OF OPRAH'S "BOOKS THAT HELP ME THROUGH" • NOW AN HBO ORIGINAL SPECIAL EVENT Hailed by Toni Morrison as "required reading," a bold and personal literary exploration of America's racial history by "the most important essayist in a generation and a writer who changed the national political conversation about race" (Rolling Stone) NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

Humans Need Not Apply Jerry Kaplan,2015-08-04 An "intriguing, insightful" look at how algorithms and robots could lead to social unrest—and how to avoid it (The Economist, Books of the Year). After decades of effort, researchers are finally cracking the code on artificial intelligence. Society stands on the cusp of unprecedented change, driven by advances in robotics, machine learning, and perception powering systems that rival or exceed human capabilities. Driverless cars, robotic helpers, and intelligent agents that promote our interests have the potential to usher in a new age of affluence and leisure—but as AI expert and Silicon Valley entrepreneur Jerry Kaplan warns, the transition may be protracted and brutal unless we address the two great scourges of the modern developed world: volatile labor markets and income inequality. In *Humans Need Not Apply*, he proposes innovative, free-market adjustments to our economic system and social policies to avoid an extended period of social turmoil. His timely and accessible analysis of the promises and perils of AI is a must-read for business leaders and policy makers on both sides of the aisle. "A reminder that AI systems don't need red laser eyes to be dangerous."—Times Higher Education Supplement "Kaplan...sidesteps the usual arguments of techno-optimism and dystopia, preferring to go for pragmatic solutions to a shrinking pool of jobs."—Financial Times

Work Bruce Pietrykowski,2019-05-07 Much of our life involves working, preparing for work, searching for work, or thinking and worrying about work. Whether paid or unpaid, free or coerced, full-time, part-time, or zero-hours, work defines us and helps shape our behavior both on and off the job. In this accessible book, leading labor economist Bruce Pietrykowski offers a highly engaging exploration of the history and contemporary organization of work under capitalism. His clear presentation of the theoretical debates is illustrated by real-world examples from across the globe and a skillful account of alternatives that point toward a post-capitalist future. Employing a progressive, worker-centered vision that goes beyond mainstream economics, he examines themes ranging from inequality, care work, and the gig economy to technological change and a universal basic income. His analysis emphasizes power, conflict, solidarity, and cooperation, interpreted through the lenses of class, race, gender, and place. This comprehensive and highly readable book will be of interest to students of economics, sociology, labor studies, and politics seeking to learn more about work and workers in the global economy, as well as interested general readers.

Emerging Technologies and International Security Reuben Steff,Joe Burton,Simona R. Soare,2020-11-25 This book offers a multidisciplinary analysis of emerging technologies and their impact on the new international security environment across three levels of analysis. While recent technological developments, such as Artificial Intelligence (AI), robotics and automation, have the potential to transform international relations in positive ways, they also pose challenges to peace and security and raise new ethical, legal and political questions about the use of power and the role of humans in war and conflict. This book makes a contribution to these debates by considering emerging technologies across three levels of analysis: (1) the international system (systemic level) including the balance of power; (2) the state and its role in international affairs and how these technologies are redefining and challenging the state’s traditional roles; and (3) the relationship between the state and society, including how these technologies affect individuals and non-state actors. This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space The chapters examine the implications of these technologies for the balance of power, examining the strategies of the US, Russia, and China to harness AI, robotics and automation (and how their militaries and private corporations are responding); how smaller and less powerful states and non-state actors are adjusting; the political, ethical and legal implications of AI and automation; what these technologies mean for how war and power is understood and utilized in the 21st century; and how these technologies diffuse power away from the state to society, individuals and non-state actors. This volume will be of much interest to students of international security, science and technology studies, law, philosophy, and international relations.

Self-portrait Gene Tierney,Mickey Herskowitz,1979 'I had no trouble playing any kind of a role, ' Gene Tierney writes. 'My problems began when I had to be myself.' In Hollywood's golden age, everyone knew the starring roles Miss Tierney played in her 36 films: the unwashed Ellie May in 'Tobacco Road, ' the demure Martha in 'Heaven can Wait;' her appearances opposite Clark Gable, Tyrone Power, Rex Harrison, Humphrey Bogart, Henry Fonda, and, best remmebered of all, as the haunting -- murdered? --beauty of the portrait painting in 'Laura, ' one of the most televised films ever. Her rollercoaster marriage to fashion designer Oleg Cassini and her globe-trotting affair with Prince Aly Khan were public property. Word of her dates with billionaire Howard huges and a lighthearted ex - naval officer named Jack Kennedy circulated over the years. But the inside story of her greatest, most heart-wrenching role -- herself -- has never been told until right now. Outwardly living every woman's fantasies, she became an emotional invalid. Her marriage collapsed. Her romances failed. Her father became a cruel disappointment. Her first daughter was born deaf, blind, hopelessly retarded, At the crest of her career, Gene Tierny attempted suicide, suffered a nervous breakdown, and spent the next seven years in and out of sanatoriums. With candor, humor, and sometimes with anger, but never with self-pity or self-indulgence, she tells of her meteoric career, her long, slow, uneven recovery from 'the black tunnel of mental illness'; the struggles with her doctors, her treatments, her escape from confinement, her depressions, her mad impulses, herself, always herself ... and finally on to a happy remarriage and tranquility.
